33,463 Blanks

By this scheme at least the amount of the tickets will return to the fortunate adventurers, and yet the Federal City will gain its object thereby, in a magnificent building designed both for public and private convenience.

Although some expense must necessarily attend the conducting of the lottery, (which expense will be taken from the principal prize) the Commissioners having agreed to present in return a sufficient quantity of excellent free-stone, together with the best adapted lots for the hotel and for the out-houses, the value of the lottery entire may be fairly rated at something more than par: In this important instance it will be found, on examination, to exceed all the lotteries that have ever been offered to the Public in this or perhaps in any other country.

The drawing will commence on Monday the 9th of September next, at the City of Washington.

Tickets may be had of Col. Wm. Dickens, City Treasurer of Washington; Thayer & Bartlett, of Charleston, South-Carolina; Gideon Denison, Savannah; Messrs. James Wolf & Co. Baltimore; Mr. Peter Gilman, Boston; and at such other places as will be hereafter published.

N. B. ONE HUNDRED DOLLARS will be given for the best Plan of an elegant and convenient HOTEL or INN, with hot and cold Baths, Stables, and other out-houses, if presented on or before the 10th of April next; and a preference will be given to the Artist for a Contract, provided he be duly qualified to complete his plan. The ground on which the Hotel and out-houses are to be erected, will be a corner lot of about 90 by 200 feet, with a back avenue to the stables, &c. Sections and estimates of the expense will be expected with the elevations, &c. complete; and 50,000 dollars must be regarded by the Architect as the utmost limit in the expense intended for this purpose.

S. BLODGET, Agent for the affairs of the City.

PROPOSALS For re-printing a new, entertaining and instructive Work, intitled, THE Errors of Education. BY MRS. ELIZA PARSONS.

Vinall's Arithmetic.

THE Second Edition of this work, with improvements, will speedily be put to press. The rapid sale of the first edition, greatly beyond the author's most sanguine expectations, encourages him to print a second edition. He intends to have it printed upon much better paper than the former, and with a new type.

Those Booksellers who wish to take a number of copies in sheets, are requested to apply to the author for particulars. 1000 Copies.

At a meeting of the SCHOOL COMMITTEE, February 5th, 1793.

The Committee, appointed to examine "The Precceptor's Assistant, or Student's Guide," being a systematical treatise of ARITHMETIC, by JOHN VINALL, teacher of the Mathematics & Writing, in Bolton, reported, that they have attended that service, and are of opinion, that the work is executed with judgment, and is as well calculated for the use of schools, counting houses, and private families, as any of the same compals that has hitherto been offered to the public.

Voted, That the above report be accepted, and that Mr. VINALL be furnished with a copy of it, whenever he shall desire it.

Copy of the Records, Attest, CHARLES BULFINCH, Sec'y.

The following character of the above work, is given in the Review of the Massachusetts Magazine, for Jan. 1793:

"This is a very useful work, and is no ill proof of the judgment and industry of the author. The rules are laid down with propriety, and the examples annexed are sufficient for their illustration. One part of the work deserves particular commendation. We mean that which the author titles "Mercantile Arithmetic." It occupies a considerable portion of his book, but not more than its importance will justify. We would recommend to the young Arithmetician to pay a particular attention to this branch. He will find its principles well explained. And should he make himself master of them, he will always have reason to acknowledge his obligation to the judicious and laborious author. We cannot but congratulate the rising generation on account of the many useful productions which have lately appeared; and in which their improvement has been principally consulted.—Among those productions we must place this treatise of Arithmetic. We should be wanting in justice to the author, should we not acknowledge that his work is in reality that which its title imports—THE PRECEPTOR'S ASSISTANT, OR STUDENT'S GUIDE."
