TMPORTANT DISCOVERY. CONSUMPTION AND ALL DISEASES OF THE LUNGS AND THROAT ARE POSITIVELY

Curable by Inhalation, which conveys the remedies to the cavities in the lungs which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the tubescular matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the first stages, and fifty per cent. in the second; but in the third stage it is impossible to save more than five per cent., for the Lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, lubslation affords extraordinary relief to the suffering attending this fearful scourge, which annually destroys ninety-five thousand persons in the United State alone; and a cor rect calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptive's grave.

Truly the quiver of death has no arrow so fatal as Con-Truly the quiver of death has, no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave, the heantiful, the graceful and the gifted. By the help of that Supreme Boing from whom cometh every good and perfect gift, I am enabled to offer it the afflicted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admission of air into the air cells, which causes a weakened vitality through the entire system. Then surely weakened vitality through the caire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than from these administered through the stomach; the patient will always find the lungs free and the breathing easy, after Inhaling remedice. Thus, Inhalation is a local remedy, never theless it acts constitutionally, and with more stitutionally, and with more power and certainty than remedies administered by the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a faw minutes, paralyzing the entire nervous system, so that a limb may be amputated without the slightest pain; in-heling the ordinary burning gass will destroy life in a few hours.

The inhalation of ammonia will rouse the system when fainting or apparently dead. The older of many of the medicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation, is the effect that sickness is always produced by breathing foul nir—is not this positive evidence that are

breathing foul air—is not this positive evidence that prop-er remedies, carefully prepared and judiciously administer-ed through the lungs should produce the happiret results cd through the lungs should produce the happiest results? During eighteen years' practice, many thousands suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that consumption is no longer a fatal disease. My treatment of consumption is original, and founded on long experience and a fluorough investigation. My perfect acquaintence and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tubercles, &c., enables me to distinguish, readily, the various
forms of disease that simulate consumption, and apply the
proper remedies, rarely being mistaken even in a single
case. This familiarity, in connection with pertain pathological and microscopic discoveries, chibles me to relieve
the lungs from the effects of contracted chests, to enlarge
the chest, purify the blood, impart to it renewed vitality,
giving energy and tone to the entire system.

Medicines with full directions sent to any part of the
United States and Canadas by patients communicating their
symptoms by letter. But the cure would be more certain United States and Canadas by patients communicating their symptoms by letter. But the cure would be more certain if the patient shouldpay me a visit, which would give me an opportunity to examine the lungs and enable me to prescribe with much greater certainty, and then the cure could be effected without my seeing the patient again.
