TMPORTANT DISCOVERY. CONSUMPTION AND ALL DISEASES OF THE LUNGS AND THROAT ARE POSITIVELY Curable by Inhalation.

which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralises the tubercular matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the first stages, and fifty per cent. in the second; but in the third stage it is impossible to save more than five per cent., for the Lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering attending this fearful scourge, which annually destroys ninety-five; thousand persons in the United State alone; and a cor rect calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptive's grave.

Truly the quiver of death has no arrow so fatal as Con-umption. In all ages it has been the great enemy of life, sumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave, the beautiful, the graceful and the gifted. By the help of that Supreme Being, from whom tometh every good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admission of air into the air cells; which causes a weakened vitality through the entire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs free and the breathing easy, after Inhaling remedies. lungs free and the breathing easy, after linkling remedies. Thus, Ir halation is a local remedy, nevertheless it acts constitutionally, and with more power and certainty than remedies administered by the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a faw minutes, paralyzing the entire nervous system, so that a limb may be amputated without the slightest pain; in-heling the ordinary burning gass will destroy life in a few

hours.

The inhalation of ammonia will rouse the system when fainting or apparently dead. The odor of many of the medicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional affects of inhalation, is the effect that sickness is always produced by breathing foul air—is not this positive evidence that proper remedies, carefully prepared and indicionally administered through the lungs should produce the happiest results? During eighteen years' practice, many thousands suffering During eighteen years' practice, many thousands suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkative cures, even at ter the sufferers had been pronounced in the last stages, which fully satisfies me that consumption is no longer a fatal disease. My treatment of consumption is original, and founded on longer averages. fatal disease. My treatment of consumption is original and founded on long experience and a thorough investiga tion. My perfect acquaintance with the nature of tuber-cles, &c., enables me to distinguish, readily, the various forms of disease that simulate consumption, and apply the proper remedies, rarely being mistaken even in a single case. This familiarity, in connection with certain patho-logical and microscopic discovering and microscopic the chest, purify the blood, impart to it renewed vitality, giving energy and tone to the entire system.

Medicines with full directions sent to any part of the United States and Consenses. United States and Canadas by patients communicating their symptoms by letter. But the cure would be more certain if the patient shouldpay me a visit, which would give me

an opportunity to examine the lungs and enable me to prescribe with much greater certainty, and then the cure could be effected without my seeing the patient again.
