On Thursday last, quito an excitement was greated in this place, by the receipt of the following dispatch from the chief] ilirector of the flect engaged in laying the macy. Atlantic Cable, addressed to the President, at Bedford :---

NEW YORK, August 5, 1858. TO PRESIDENT BUCHANAN, Bedford Springs. On Saturday, July 17th, the Telegraph fleet sailed from Queenstown, and met in mid.ocean on the 28th. The cable was spliced at 1 o'clock P. M. on Thursday, the 29th, and the vessels then separated, the Agamemnon and Valerous bound for Valencia, Ireland, and the Ningara and Gorgon for Trinity Bay, where the latter arrived yesterday and this morning the end of the Cable will be landed. It is 1608 nautical miles or 1950 statute miles from the telegraph house at the head of Valencia Harbor and telegraph house at Bull's Arm, Trinity Bay, and for more than two thirds of the distance the

water is over two miles in depth. The Cable has been paid from the Agamemnon at the same speed as from the Niagara .--The electrical signals are sent and received through the whole Cable perfect. The machinery for paying out the Cable worked most satisfactorily, and it was not stopped for a single moment. Gapt. Hudson, of the Ningara, Messrs. Everett and Woodbouse, the engineers, electricians and officers of the ship, and in fact every man on board the telegraph fleet exerted himself to the utmost to make the expedition successful and by the blessing of Divine Providence succeeded.

After the end of the Cable has been landed and connected with the land line and the Nisgars has discharged some of the cargo belonging to the ficet, she will go to St. John's for coals and then proceed at once to New York. CYRUS W. FIELD.
