Jacobs evening of last week, the books of the ore named company were opened at the Lo as done, and on Monday last ever \$8,000 of the Capital Stock the amount required to seentho charter) had been houseribed. While a se pleased to mote that the stock is bing taken so rapidly, we are nevertheless bend to learn that the property holders in this blee, those whom these improvements, when piece, tuosi benefit, manifest so little completed in the matter, and but few of their ents are yet found upon the books. Why is bit Do they not all desire that these improvesents should be made? Will it not enhance he value of every cents worth of real estate, ad we might add, much personal property, in Has it not been proven, and is it of almitted by all that the stock in the Comner must and will pay? Do not our citizens th a few exceptions, belong lo the "Progresse School!" Why then do they withhold their rames from the books of the Company, and thus, in a measure, retard the accomplishment of this great enterprise? We have heard that some persons want the water but not the as, therefore they will not subscribe because hence they will not subscribe because they can cess to it. but have a choice, This is all wrong. One inprovement will benefit our town as much as he other and contribute equally to increase the niue of real estate, which, after all, is a considestion of more importance to property holders than the dividends on the stock, unless they take a great number of shares. We hope that the pirit of enterprise will stimulate all to enter into this work at once and say what they will d. Those who look only to the benefits to be derived from the dividends which the stock will pay, are very short-sighted indeed. They do not consider that a good supply of water will be the means of inducing capitalists to start manfactories which must increase the value of property, bring people to our town, and revive pasiness generally. And who are to be benefited by this increase? The answer is plainowners of real estate, merchants and mechanics.

NOTICE. The commissioners named in the act incorpo sting the "Altoona Gas and Water Company." will meet at the LOGAN HOUSE, on Monday. May 9th, 1859, at 2 o'clock, for the purpose of opening books to receive subscriptions to the Capital Stock of said Company, The books to clock for five successive days.

JOHN SHOEMAKER, For the Commissioners.

CAN'T AFFORD Ir. -- We have frequently heard tuiness men. (or rather those who think they are business men,) remark that they can not afand to advertise. On asking the reason why, her reply that their business don't pay. Shortsighted mortals, thought we. They could not tes that by a judicious and continual system of for advertising it, but increase it to such an extent as to make it pay them also. In this country, where every person reads the newspapers, s man must be considerably behind the times who does not see that these are the cheapest and tut mediums through which he can speak to the public, where he is to find customers. man reads an advertisement of a mechanic or nutrhant, and because he does not want anything in their line at present, he pays no more attention to it; but when he does require an article of the kind advertised, he knows where to go to get it. As a general thing, men who do not advertise, these latter days, are considered "Old Fogy's," who buy and sell on that principle, consequently "Young America" goes to "Young America's" store or shop for what he wants. Let men put on the appearance of busisess, and the reality will speedily follow. The farmer plants his seed; and while he is sleeping his corn and potatoes are growing. So with advertising. While, you are sleeping, or eating, or conversing with one set of customers, your not been for your advertisement in the news- mously:-

Mav. This street has long been a disgrace to the town, and we are truly glad that this work, which should have been done years since, is to be done at this time. There are other streets in the town which require the same improvement, and will receive it in time but we think it right that the principal thoroughfares should receive first attention, on the principle of the "greatest good to the greatest number." The rapid manner in which our town is spreading and improving renders it impossible for our "Borough Fathers" to pay that attention to all their progeny that wish to, from
