WHAT IT WOULD TAKE TO FEED THE SUN .-- A philosopher has calculated that the amount of light which flows from

the solar orb could be scarcely produced by the d-ily combustion of two hundred globes of tallow, each equal to the carth in magnitude. A sphere of combustible matter, much larger than the sun itself,, would be consumed every ten years in mantaining its wonderful brilliancy. It would be a splendid sight to see an immense transparency illuminated by means of one of these tailow globes, and having written upon it, "Buy all your garments at the Brown Stone Clothing Hall of Rockhill & Wilson, Nos. 603 and 605 Chesnut Street, above Sixth, Philadelphia."

By During the summer that has just passed away thousand of sufferers from dysentery and diarrhosa have been relieved by the use of HOSTETTER'S BITTERS, a medicine which is evidently destined to mantain a permanent place in the public estimation. Billious diarrhoa is one of those discases which baffles the skill of the physician. The medicine they administer to act upon the bowels never seems to reach the source of the evil. The difficulty is to get a remedy that will reach all the digestive organs, and give them simultaneously a rush of vigor, to rid themselves of this disease. This problem is solved by

the BITTERS, which never fails to conquer the most stubborn cases. It is only fair to say, that during the season
