

ALTOONA, PA.

THURSDAY, JANUARY 26, 1860.

Where parties are unknown to us, our rules for advertising in this paper are as follows: For each line of advertisement, we charge five cents for the first week, and ten cents for each subsequent week. For a month, we charge thirty cents, and for three months, we charge one dollar. For a year, we charge four dollars. For a longer period, we will give the best rates.

S. M. PETTENGILL & CO., Advertising Agents, 119 Nassau street, New York, and 10 State street, Boston.

We are indebted to Hon. Edward McPherson, for public documents; also, to Hon. L. W. Hall, of the Senate, Jacob Burley, Esq., of the House, and Geo. W. Patton, Esq., for various favors.

At a special election, held in Dauphin county, on Saturday last, to fill a vacancy, occasioned by the death of Marks D. Whitman, William Clark, the Peoples' candidate, was elected by a majority of 990 votes.

The Ladies' Home Magazine, edited by T. S. Arthur & Virginia F. Townsend, Philadelphia, for February has arrived, and is a welcome visitor. The engravings and fashion plate are equal to those of the \$3 magazine, and the reading matter is excellent. \$2 per annum; 4 copies \$5.

Peterson's Magazine, for February, is on our table, and we find it to be a very interesting number. Our lady readers will find the fashions and everything relating to domestic economy fully up to their minds. Address C. J. Peterson, 106 Chestnut st., Phila.

Senator Bigler has introduced a bill in Congress to punish hostile expeditions from one State against another, making the offense treason; and any person who happens to know about the fitting out of such expeditions and does not disclose, shall be fined and imprisoned.

We have received the January number of the "Farmer and Gardener," a magazine devoted to agriculture, horticulture, and rural affairs generally. It is a good journal, and, on account of its cheapness—one dollar per annum—should be in the hands of every Farmer. Address A. M. Spangler, Philadelphia.

TRIAL OF CONSPIRATORS.—The Legislature of Virginia having authorized a special term of the Circuit Court for the county of Jefferson, Judge Parker has directed notice to be given that the term will be commenced on the first day of February next. It is understood that Stephens and Hazlett, two of the Harper's Ferry conspirators, will then be tried.

THE POSTOFFICE CONTRACTORS.—A number of letters were received at the Postoffice Department in Washington, on Tuesday, from mail contractors in different parts of the Union, declaring their intention to break off the lines, if no appropriation is made by the 1st of March. The House of Representatives, in so long delaying the organization, is assuming a fearful responsibility.

CORNWALL ORE MOUNTAIN.—One of the elements of Pennsylvania riches is the Cornwall ore mountain, in Lebanon county. This Cornwall ore-bed is a geological wonder, containing, as it does, upwards of fifty millions of tons of the purest iron ore, which can be mined and loaded into cars for ten cents per ton. We are informed that in a single season more than two hundred thousand tons of this ore, more valuable than the gold mines of California, have been taken out. The Cornwall mines are owned by different proprietors, the Coleman heirs owning a considerable proportion.

TRAGEDY IN KANSAS.—The Territorial Legislature of Kansas, after organizing, passed a joint resolution adjourning from Leocompton to Lawrence, which Gov. Medary vetoed. The Legislature then passed the resolution over the Governor's veto, by a two-thirds vote. A question having arisen as to the constitutionality of the resolution, the majority adjourned to Lawrence, and the minority remained at Leocompton. Both factions claimed to be the only legal body. The alleged reason of the majority for quitting Leocompton is the insufficiency of accommodation. An attempt to reconcile the difference will be made by the introduction in both bodies of a resolution favoring an adjournment to Deavenworth.

PEW AND CIGARETTES.

There are two hundred and sixteen stalls left up in Chicago. The attendance is large. A Company with a capital of \$100,000, has been formed in Washington City, for manufacturing Wines. There is a surplus fund of ten thousand dollars in the treasury of the Pennsylvania State Agricultural Society. A resolution has been introduced into the Legislature of this State, to reduce the salary of the members from \$700 to \$500.

Mr. H. H. Sheer, of Fairfax county, Virginia, lately found thirty rats in his grain-bin with their throats cut. The assassin was a weasel. The Harrisburg Telegraph says a child of Mr. Cowley, of that place, aged about four years, died on Sunday last, from that terrible disease, hydrophobia.

Jackson, the American Deer, was beaten by James Brown, at Hockley Wick, near London, on Christmas-day, in a ten mile race, in 58 minutes and 23 seconds. On Thursday last, the express freight train ran into a drove of cattle and sheep near Anderson's Station, killing five or six cattle and maiming and wounding others.

The members of the General Assembly of Tennessee paid their respects, in a body, on the 19th inst., to the widow of James K. Polk, at her residence in Nashville. The amount of taxable property in Kansas, as shown by the report of the Territorial Auditor, is \$100,000,000. The land-tenements of the Territory amounts to \$25,000,000.

The mayor of Trenton, N. J., was on Monday last arrested before an magistrate of that city, on a charge of not having served the writs, and fined \$5. All men come into this world alone, all leave it alone; king and priest, warrior and maiden, philosopher and child; all alike must walk death's mighty galleries alone.

Terrific Affair.—A man named Clark, residing in Lexington, Ky., on the 5th inst., killed his wife, child and negro-servant. He afterwards attempted to commit suicide. At Easton, recently, a German died on Friday morning before daylight, was buried about noon, and the same afternoon his goods were sold at auction. Rather quick work, that!

On Wednesday week the house of Mr. Michael Garfry, near Locke's Mills, Mifflin county, was destroyed by fire. Two children, aged five and ten years, perished in the flames. Mr. W. H. Radcliffe, formerly of Cleveland, has been notified by the Postmaster in New Orleans that the Republican journals of the former city are incendiary publications, and that he must stop receiving them.

A resolution has been introduced into the Virginia House of Delegates, inguiring into the propriety of taxing bachelors, past thirty years of age, \$10 per annum, for the education of poor children. In Jackson, Oregon, about a month since, a man named Oterbury was stripped, tied to a tree, and thirty lashes applied to his bare back with a raw hide, for selling whiskey to Indians who were camped near the place.

At the late term of Court at Peoria, Illinois, seventeen divorce cases were granted, all but three of them on application of the wives. A large number of cases, in addition were continued, one was withdrawn and several were dismissed. In Georgia they seem to have a law to prevent matrimony among the too old as well as the too young. The Legislature recently passed a bill allowing a man to marry, an old man 70 years of age, and allowing him to marry.

Judge Rram, of St. Louis, a prominent lawyer, following the lead of Judge Catron, of Tennessee, has published an earnest remonstrance against the bill to enlarge the free colored people of Missouri, now before the Legislature of that State. Prentiss says: "If the Northern abolitionists do not think it wrong to steal our slaves because they are men, they perhaps will recognize the fact that as negroes are the descendants of Ham, it is lawful to appropriate other people's Bacon."

Mr. Tenbroeck, the owner of American race-horses in England, it is said, stands to win \$200,000 upon his horse Umpire, at the next Derby races, or to lose only \$5,000. All his bets were made when the odds against his horse were 100 to 1. Now he is first favorite.

Milburn, in "Ten Years of Freedom Life," says: "Confine to a greater level of log cabins, and an much inclined to the belief that their humble roofs have sheltered a greater amount of health, content, happiness and virtue, than the best style of domestic architecture."

A young man, calling himself Davis Ferguson, and other aliases, has been traveling recently through Wisconsin and Iowa, and doing a large business in the way of marrying young girls and appropriating other people's property. Within three weeks he married no less than six wives.

George W. Parsons, of Hancock, Perry county, was killed, on Thursday week, by the fall of a tree, while he was engaged in cutting timber for the rebuilding of the Nail Factory at that place, which was recently destroyed by fire. He leaves a wife and six children to mourn his death.

The London correspondent of the Independent states that Joseph Moxon, who was recently in that city seeking aid to recover his stolen child. He met with much sympathy in high quarters, but the Pope, adds the writer, looked on the boy like grim death, and the chances of his recovering him are anything but flattering.

The Boston Patriot, after relating at length the recent persecutions of Powers, who was tarred and feathered in South Carolina, and of James Crutledge, who was summarily expelled from Alabama, warns the South to be careful how it treats Irishmen, or the may lose those in the North, who have hitherto been her warmest friends.

Bad writing.—The Postmaster General in his late report, makes a statement with regard to the supererogation of letters, which, though not new, is deserving attention. He says "the reason why letters do not reach their destination is traced in a large majority of cases to the writers themselves, who either misdirect or do not write a legible hand."

Chesler county, in this State, was the scene of some very terrible tragedy the other day. A negro man, named Alfred Miller, attempted to force an entrance into the house of Mary Foulson, with a view of getting some wood to light a fire, and was struck down by the latter with an axe and instantly killed. The murderer is in jail in West Chester and looks as if the occurrence had destroyed his reason.

Jan. Murphy, residing in Louisville, Ky., the day before Christmas, in attempting to strike a horse out of a log's throat, was badly bitten by the animal. In less than a week he was attacked by symptoms of hydrophobia, which lasted until Thursday, when he got better, but on the 5th instant he was again attacked, and soon died in horrible agony.

S. D. Sherman, of Beloit, Wisconsin, was caught in a machine shop by a shaft, the other day, and brought to the aid of the day's revolutionists. When his clothes were all dragged off he fell to the floor. The sole of his boots were entirely whipped off by striking against the frame of a griststone which stood nearby under the shaft. His back and one arm were badly bruised, as were also his legs, though it is thought his wounds are not fatal.

A conspiracy has just come to light in Providence, R. I., wherein it was shown that a woman and her daughter and son-in-law, had brought about an infamous crime against her husband. They hoped to have the husband and father convicted, and sent to the State prison, and so acquire possession of his property. The daughter, however, when brought into Court, swore that the charge was false, and that she made it up to drive her father from the house, and that she was at once committed, to take their trial for perjury.

Letter from Harrisburg.

HARRISBURG, Jan. 24, 1860. Our resolutions introduced by Mr. String were debated on Wednesday last, and passed, only 24 votes being recorded against them. So deeply is Pennsylvania interested in an increase of duties on iron and coal, that I think the resolutions would have passed without a dissenting voice, but for party rancor, which induced one of the Opposition members to add a resolution reflecting upon the President.—This is to be regretted, for in Pennsylvania there is no person opposed to a protective tariff, but politicians are forced into whatever attitude they may. But that these resolutions will have any effect, I do not believe. I am rather disposed to think that the independent sovereigns who sit at Washington, will be disposed to treat with contempt any effort to instruct them in their duty, especially when such instructions come from what they in their lofty grandeur look upon as a very inferior body.

Insuring against loss by fire in Philadelphia has become an uncertain business: Within the last few years the Legislature has granted a large number of charters for new companies, and it is said that many of them are now open and doing business upon fictitious capital. Under such circumstances it is the duty, as well as the interest, of the solvent companies to crush out the existence of these bogus institutions, or suffer hereafter for their short-comings.

To effect this, some gentlemen are now here, working for the passage of a bill having for its object a thorough monthly examination of the standing and condition of each insurance company in the city. This bill, if it passes, will be likely to knock some of the bogus companies higher than a kite, and it is not unlikely that it will send to Coventry some that have standing in the community.

The contested election case, Wiley vs. Duffield, resulted adversely to Duffield, who has taken his departure, and Wiley has taken his seat. The Committee, after a patient investigation reported, Wiley elected by a majority of thirteen votes. The case of Donnelly will not be decided for a week or ten days, as the Committee will probably move to Philadelphia to take the testimony.

The Philadelphia papers are after more Passenger Railway charters, notwithstanding nearly all the main thoroughfares are already occupied.—Broad street, it appears, was, by some means or other, overlooked last winter, and several companies are after it with several pieces of timber. It is supposed to be the last really profitable speculation left in that line.

There are some six or seven applications for bank charters, and also a bill pending for a free banking law. If there is to be any increase of banking capital in the State, I say let it be on the free banking principle. Let the people who have bank-notes in their pockets have the assurance that they will be redeemed, and it will put an end to the everlasting currency-tinkering.

No bills of any moment have as yet been passed, but I live in the hope that we shall soon have something to write that will, at least, be worth the ink and paper used. Yours, LOGAN.

THE SOUTH CAROLINA COMMISSIONER.—Mr. Meminger, the Commissioner sent by the Legislature of South Carolina to receive the ratification of the Constitution of the United States on the subject of his mission. He argued that if the Union must be continued, the South must demand other and more efficient guarantees, or make concession after concession until she has lost all influence, all consideration, and all respect in the Confederacy. He urged the propriety of a Convention of the Southern States to consider the questions growing out of the relations of the South to the Northern States. There is some diversity in the South as to the propriety of Mr. Meminger's mission.

THE BOSTON JOURNAL.—A correspondent of the Boston Journal explains this matter:—"Explosions are not generally considered as the most fearful of the misdeeds of the human race, but with a gas that is always escaping from the fluid when open to the air. People not understanding this fact, think they may safely fill the lighted lamp, if they do not allow the flame to go out, and when they do, they are surprised to find a lighted lamp within a foot, at the very nearest, of open fluid." Experience has demonstrated, by a great sacrifice of human life, that the fluid should never be brought within a foot of the lamp.

A most distressing occurrence lately took place in the town of Bloomer, Montclair county, Michigan. At the raising of a large barn, a couple of small boys were playing with a large broom, when one of them suggested to his playmate to lay his head on a block and let him cut it off, which was done, and the sharp edge of the broom severed the head from the body of the little fellow. Just at this instant a large "bent" of the frame was poised midair; but the men engaged in it were so shocked at the sight that they let go their hold, when the huge timbers, with a tremendous crash, fell to the ground, killing three men instantly.

Ten Consequoses.—Speaking of disunion, the Richmond Dispatch says: "It is impossible to exaggerate the horrors and sufferings which for years would follow a dissolution of the Union. For ourselves, we have no idea of a peaceful dissolution. As we have said before, it would be a war of extermination. The widely extended border between the North and South would be a line of blood. Every accessible bay and inlet of every river would be entered, and over and anon, large masses of men hurled upon the capitals and important points of Southern States."

The most powerful pumping engine in the world has just been put in operation at the Brooklyn water-works. At a test made about a week ago it raised 611,083 pounds one foot high, with one pound of coal, and delivered 15,600,000 gallons of water to the reservoir in 15,600,000 hours. The tubes which convey the water from the North River to the reservoir are 4,000 feet long, and three feet in diameter, and the amount of coal which it burns in twenty-four hours is fifteen tons. It is sixteen per cent more powerful than the great Leeward engine of the Holland marshes, and cost \$100,000.

The Virginia House of delegates has adopted resolutions instructing the Committees on Schools and Colleges to inquire into the expediency of reporting a bill prohibiting school commissioners throughout the Commonwealth from subscribing to any teacher, male or female, who has been expelled from the State by the State Board of Education, unless they shall have resided in the State of Virginia for at least ten successive years previous.

More Oil—Extraordinary Yield.

Since our last, says the Venango Spectator, a pump has been put into the oil well on the farm of Hamilton McClellan, on Oil Creek, two miles above the mouth, and the yield of oil is beyond expectation, being near double that of any other well in the neighborhood. A number of persons have visited the well, and all agree that one gallon of oil is pumped every minute! The quantity appears to be limited to the capacity of the pump, and no doubts are entertained of the supply holding out. The proprietors are busily engaged in making preparations to bore the oil, which appears to be the great difficulty in the way. California and Pike's Peak will have to knock under to this.

Other wells are being sunk in that vicinity.—One, a little further up the creek, in which our young friend Kim Hubbard is largely interested, has reached the oil, and bids fair to equal the best in productiveness. There is no difficulty in obtaining sights by giving a per centage of the oil, and they appear to be a general "pitching in" by those desiring to try their luck.

Rev. A. S. Finch publishes in the Brockport Advertiser a card of warning to the public, and his brethren, the clergy, in particular, against a woman who he married early last fall, and who has since deserted and ruined him. He explains how his ruin was accomplished, and how she has since been engaged in a woman, small in stature, wearing spectacles, and prepossessing in appearance, appeared, pursued him in a carriage, and told him of her estate and how much she was worth, and induced him to marry her. He consented, and once she had, she, having accomplished his ruin, forsook him, probably to find another victim. Mr. Finch asserts in his card that this woman has served two men, at least, in the same way before—one residing at Belleville, C. W., the other in Wisconsin. The Wisconsin man is left in a deplorable condition, with three children to provide for.

The Cleveland Plaindealer announces that Mr. J. W. Fitch, U. S. Marshal of Northern Ohio, on the preceding day received a bundle of official documents from the Chairman of the Harpers Ferry Investigating Committee, commanding him to summon Joshua K. Giddings, R. Plumb and John Brown, Jr., to appear before the committee and testify under oath all they may know of the organization of "The Sons of Liberty," or any other society connected with John Brown's work in Kan. If these witnesses refuse to obey the summons, they are to be arrested under warrants which accompanied the subpoena. The Plaindealer also states that the Sons of Liberty, at West Andover, Ohio, have decided to determine to refer to the committee, and to resist if any attempts are made to enforce it. The same action has been taken at Oberlin.

HUNTING A PANTHER.—Abraham Nivling, of Jamesville, and Amasa Smith, Sr., of Beccaria Mills, Clearfield county, went recently to the Moshannon woods to hunt panthers. They soon came to the trail of one very large one, which they followed for four successive days, camping at nights by a large fire, without shelter or any kind, during very cold weather. On the fourth day, 27th of December, the animal caught a rabbit, after devouring which, it proceeded about two hundred yards, and lay down. He then took the bait, and when it took to a tree, ascending to the height of about seventy feet. Nivling raised his gun, and brought it down the first fire, the ball entering the nostrils, and, after traversing the neck, lodged in the breast. The "varmint" measured and weighed six inches from end of nose to tip of tail.

AN ISHMAN OTHER.—In Cheango, N. Y., the other day, a woman named Julia Anne Coe was arrested charged with attempting the life of her illegitimate child. From the statement of the little one it would appear that its inhuman mother thrust it head foremost in the water, and that she was doing so, because she set on fire, and then leaving the house hurried to one of her neighbors, to whom she stated that her place was on fire. The child, in the meantime, recovered sufficiently to be able to leave the house, and when he returned, he found it on fire, and was so shocked at an extent that its life was despaired of. The wretch was arrested and committed to await the result of the child's injuries.

CAUSE OF CAMPBELL EXPLOSIONS.—A correspondent of the Boston Journal explains this matter:—"Explosions are not generally considered as the most fearful of the misdeeds of the human race, but with a gas that is always escaping from the fluid when open to the air. People not understanding this fact, think they may safely fill the lighted lamp, if they do not allow the flame to go out, and when they do, they are surprised to find a lighted lamp within a foot, at the very nearest, of open fluid." Experience has demonstrated, by a great sacrifice of human life, that the fluid should never be brought within a foot of the lamp.

A most distressing occurrence lately took place in the town of Bloomer, Montclair county, Michigan. At the raising of a large barn, a couple of small boys were playing with a large broom, when one of them suggested to his playmate to lay his head on a block and let him cut it off, which was done, and the sharp edge of the broom severed the head from the body of the little fellow. Just at this instant a large "bent" of the frame was poised midair; but the men engaged in it were so shocked at the sight that they let go their hold, when the huge timbers, with a tremendous crash, fell to the ground, killing three men instantly.

Ten Consequoses.—Speaking of disunion, the Richmond Dispatch says: "It is impossible to exaggerate the horrors and sufferings which for years would follow a dissolution of the Union. For ourselves, we have no idea of a peaceful dissolution. As we have said before, it would be a war of extermination. The widely extended border between the North and South would be a line of blood. Every accessible bay and inlet of every river would be entered, and over and anon, large masses of men hurled upon the capitals and important points of Southern States."

The most powerful pumping engine in the world has just been put in operation at the Brooklyn water-works. At a test made about a week ago it raised 611,083 pounds one foot high, with one pound of coal, and delivered 15,600,000 gallons of water to the reservoir in 15,600,000 hours. The tubes which convey the water from the North River to the reservoir are 4,000 feet long, and three feet in diameter, and the amount of coal which it burns in twenty-four hours is fifteen tons. It is sixteen per cent more powerful than the great Leeward engine of the Holland marshes, and cost \$100,000.

The Virginia House of delegates has adopted resolutions instructing the Committees on Schools and Colleges to inquire into the expediency of reporting a bill prohibiting school commissioners throughout the Commonwealth from subscribing to any teacher, male or female, who has been expelled from the State by the State Board of Education, unless they shall have resided in the State of Virginia for at least ten successive years previous.

PARENTAL AFFLICTION.

A remarkable benevolence has befallen the household of Michael Fitzgerald, of Fairfield, Vt., consisting of a father, mother and five children. On Friday morning, at five o'clock, four of the children died of the scarlet fever. On Tuesday following, the four were committed to one grave, and on the return from the sad office, the parents found the remaining child who had been left at home, and sick with the same disease, had also died. The cup of affliction could hardly be more trying to the parent's hearts.

The New Hampshire Patriot states that on Friday morning seventeen well dressed young ladies were seen marching up Main st., in Concord, drawing a barrel of flour on a hand sled, walking in couples and drawing by a rope, with the one on for a leader. Upon inquiry, it was ascertained that they were the girls employed in a tailoring establishment, whose proprietor offered a barrel of flour to a poor woman, on condition that the girls should draw it to her in this manner—a proposition very readily accepted by the girls, and very handsomely performed.

A CHILD MANGLED BY A DOG.—On Sunday last, a son of Mr. Christian Rider, residing in York township, about seven years of age, was mangled in a most frightful manner by a large dog kept on his farm. The boy was amusing himself in playing with the dog; when all at once the dog became enraged and fell upon the child with the ferocity of a tiger, and inflicted severe wounds upon his face, arms and one of his limbs. We are told that a piece of flesh was torn from the boy's leg by the encephal animal.—York Press.

GRAND DEPTH OF THE OCEAN.—The following account of the depth at which the ocean has been sounded, will give some account of the vast valleys that exist in its bed. The sounding was performed in the Atlantic, and the bottom was reached at 7,700 fathoms or 15,400 yards, being over eight miles. The time required for this immense length of line to run out was about nine hours and a half.

THE CLEVELAND PLAINDEALER announces that Mr. J. W. Fitch, U. S. Marshal of Northern Ohio, on the preceding day received a bundle of official documents from the Chairman of the Harpers Ferry Investigating Committee, commanding him to summon Joshua K. Giddings, R. Plumb and John Brown, Jr., to appear before the committee and testify under oath all they may know of the organization of "The Sons of Liberty," or any other society connected with John Brown's work in Kan. If these witnesses refuse to obey the summons, they are to be arrested under warrants which accompanied the subpoena. The Plaindealer also states that the Sons of Liberty, at West Andover, Ohio, have decided to determine to refer to the committee, and to resist if any attempts are made to enforce it. The same action has been taken at Oberlin.

CALENDAR FOR 1860.

Table showing the calendar for 1860, with days of the week and corresponding dates for each month from January to December.

SPECIAL NOTICES.

Benevolence.

We do not think a person can receive a more benevolent trait of character than being noted for the distress and suffering of others, and furthermore, anxious to do all in his power to alleviate of every possible human suffering. In this view of the case, we do not know how the humane and benevolent can do an action more in accordance with their philanthropic views, than by calling the attention of their fellow-citizens and acquaintances to the fact, that Dr. S. M. KESSLER'S CELEBRATED BALM, Baltimore, Md., has discovered a preparation, which is put up in the form of a pill, that has a specific action for curing Epilepsy, or falling fits, spasms, cramps, and all forms of nervous diseases. Among those who have been permanently cured, we might mention a member of the family of James H. Beadle, Huntsville, Alabama; Mr. M. P. Stogden, Cabin Point, Surrey county, Va., and Mr. W. P. Ligon, Grenada, Mississippi. We might go on enumerating a number of others, until we had entirely filled up this column of our paper; but we think we have said sufficient to satisfy every person that the earliest and most judicious use of this medicine, will save a life, and save a man a well worn woman, and have no need of a remedy, perhaps you know some person who is not equally blessed as yourself, if, cut out this notice, and send it to him or her. It will cost you but little trouble, and probably it will make you instrumental in curing some poor, afflicted mortal of that dreadful Vindictive, Epilepsy, or falling sickness.

Dr. Hance sends his pills by mail, free of postage, to all parts of the world, on the receipt of a remittance. His price are: one box, \$2; two, \$3; three, \$4. We have given his address above.

Mexican Mustang Liniment.

From rich and pure, bold and fresh, all colors grades and conditions of life, we have the same medal of prize awarded this wonderful article. Soreness healed, pains relieved, lives saved, valuable animals made useful, and untold ills assuaged by this great medicine, which is surprising to the judgment of man. What family does not require a standard Liniment? Who ever heard of the same effect produced by any other article? For cuts, bruises, sprains, rheumatism, swellings, strained horses, &c., it has no equal. Beware of imitations. The genuine Mustang Liniment is sold by all respectable Druggists and Livery Men in every town, parish and hamlet throughout North and South America, Europe, and the Islands of the Ocean. Buy at once. Beware of cheap imitations. BARNES & PARR, Proprietors, New York.

On THAT THE KEY OF AN INNOCENT SHEEP SHOULD be made into parchment, and written on to the wedding of a man's quoth Socrates. He might also have depicted the fuming of men's forms by the unaccountable manner in which some magicians induce betches in the cloth made from the wool grown by these same harmless sheep. To see the perfection of the act of working up cloth wisely and well, and so to set off to the best advantage, the forms of the weavers, call at the Brown Stone Clothing Hall of Rockhill & Wilson, No. 603 and 605 Chestnut St., above Sixth, Phila., and examine their stock of garments for gentlemen and women.

TOOTHACHE.

This disease can be cured by Dr. Kessler's Toothache Remedy, prepared by him in Pittsburg, Pa., which he put up in bottles and sold at 25 cents each. It is an excellent medicine, when diluted, for spongy and tender gums, and is worth ten times the price to all who need it. Sold here by G. W. Kessler, Druggist, No. 119 S. 3rd St., Altoona, Pa.

Carpet Bags, Trunks, Umbrellas, &c.

DR. HILL'S, &c., can be bought cheaper in this country, than at any other place in the country. [Dec. 6, 1859.]

CAMPBELL'S BURNING LIQUOR.

Imperial Oil, of pure Turpentine, which is a perfect disinfectant. [Dec. 6, 1859.]

DR. HOOGLAND'S GERMAN BITTERS.

The great standard medicine of the present age, have acquired their great popularity only through years of trial. Unbounded satisfaction is rendered by them in all cases; and the people have pronounced them worthy.

Liver Complaint, Dyspepsia, Jaundice, Debility of the Nervous System, Diseases of the Kidneys, and all diseases arising from a disordered liver or weakness of the stomach and digestive organs, are speedily and permanently cured by the GERMAN BITTERS.

The Balsamo Cordial has acquired a reputation surpassing that of any similar preparation extant. It will cure, WITHOUT FAIL, the most severe and long-standing Consumption, Cough, Cold, or Hoarseness, Bronchitis, Laryngitis, Croup, Pneumonia, Inflammation of the Throat, and all other pulmonary affections.

Confirmed Consumption. A few doses will also at once check and cure the most severe Diarrhoea proceeding from Cold in the Bowels.

These medicines are prepared by Dr. C. M. JACKSON & CO., No. 413 Arch Street, Philadelphia, Pa., and are sold by druggists and dealers in medicines everywhere, at 75 cents per bottle. The signature of C. M. JACKSON will be on the outside wrapper of each bottle.

In the Almanac published annually by the proprietors, called EVERETT'S ALMANAC, you will find testimony and commendatory notices from all parts of the country. These Almanacs are given away by all our agents.

For sale, in Altoona, by A. Roush and G. W. Kessler, and by all Druggists. [May 19, 1859.]

DR. M'LANE'S CELEBRATED LIVER PILLS.

Being unwell, and not knowing whether it proceeded from indigestion of the liver or merely hysteria, I was persuaded to purchase a box of DR. M'LANE'S CELEBRATED LIVER PILLS, prepared by Fleming Bros., Pittsburg, and before I had used them all, was entirely relieved. I am now enjoying perfect health, and cheerfully recommend Dr. M'LANE'S Celebrated Liver Pills to all similarly afflicted. New York, March 25, 1852.

Purchaser will be careful to ask for DR. M'LANE'S CELEBRATED LIVER PILLS, manufactured by FLEMING BROS., of Pittsburg, Pa. There are other Pills purporting to be Liver Pills, now before the public. Dr. M'LANE'S genuine Pills, which are called VERTIGES, can never be had at all respectable drug stores. Beware of cheap imitations. New York, Jan. 5, 1850.

IMPORTANT TO FEMALES.

DR. CHEESEMAN'S PILLS. The combination of ingredients in these Pills are the result of a long and extensive practice. They are mild in their operation, and certain in correcting all irregularities of the system, removing all obstructions, whether from cold or otherwise, headache, pain in the side, palpitation of the heart, whites, all nervous affections, hysteria, fatigue, pain in the back and limbs, &c., disturbed sleep, which arise from interruption of nature.

DR. CHEESEMAN'S PILLS. These pills are used in the treatment of those irregularities of the system, which have continued so many thousands of the young, the beautiful, and the beloved to a premature grave. No female can enjoy good health unless she is regular, and whenever an obstruction takes place the general health begins to decline.

DR. CHEESEMAN'S PILLS. are the most effectual remedy ever known for all complaints peculiar to Females. To all classes they are invaluable, as inducing, with certainty, periodical regularity. They are known to thousands, who have used them at different periods, throughout the country, having the sanction of some of the most eminent Physicians in America.

Explicit directions, stating when, how, and when they should not be used, with such Box, the Price One Dollar each Box, containing 40 Pills. A valuable Pamphlet, to be had free, of the Agents—Pills sent by mail, promptly, by enclosing price to the General Agent. Sold by Druggists generally, and by the Proprietors, B. B. M'UTCHINGS, General Agents, 14 Broadway, New York. Sold in Altoona by G. W. Kessler, in Hollidayburg by Geo. A. Jacobs. [Dec. 6, 1859-17.]

It is a common observation that there are more sufferers from debility, among Americans, than can be found among any other civilized nation. The reason is obvious. We take too much exercise, and have too great a quantity of food, and we have too much of the most common, ordinary medicines can do little good. What is required in such a case is a tonic and invigorant, as Dr. J. Heister has given to the world, in his CELEBRATED "BITTERS." The weak and nervous derive the most benefit from the "BITTERS," the exhausted laborer upon the depot, and the prostrated student of the midnight lamp, have found a wonderful restorative in the "BITTERS," and prefer it to more precious, but less efficacious medicines. It should not be forgotten that the agent which is so magical in its influence upon a frame which is merely debilitated, is equally powerful in assisting nature to expel the most terrible forms of disease. Who will not gratefully acknowledge the benefits of this medicine?

Sold by druggists and dealers everywhere. See advertisement in another column.

THE UNDERSIGNED WOULD

respectfully inform the public that he has a large assortment of CLOTHES, and HATS, and is prepared to make them to order, and at the lowest prices.
