Dr. Cabill, of Ireland, recently made a tour through this part of the country, and while in Pittsburgh wrote a very interesting letter to his old home. The letter is mainly descriptive of his trip from Philadelphia to Pittsburgh, and lidaysburg, on Wednesday, August 15, 1860. although there are some inaccuracies, such as a notes as he passed along, yet he paints our sub- cers :-lime mountain scenery in the most glowing and gorgeous colors. A few extracts will suffice to ive the reader an idea of the learned Doctor's

impressions of the great State of Pennsylvania: "There was an additional reason for staying at Altoons on Friday night; because if I had proceeded to Pittsburgh by the night mail I should have lost perhaps the very most gorgeous and sublime mountain scenery in America. And moreover, I could not have seen the almost incredible fact of the steam carriage with five cars attached ascending the summit of a mountain seven hundred feet above the level of Altoona. There is the feat of American go-a-headism in steam locomotion; there it is to be seen by the European; viz: the iron horse galloping against the hill, at the rate of twenty miles an hour, the metal lungs of the cylinders puffing and panting as two hundred passengers ride up a gradient or elevation of ninety-six feet in the mile. This prodigious feat our metal steed performed in my presence without whip or spur; sometimes creeping over dry ravines two hundred feet deep; or again hanging on the side of the perpendicular nountain at least one hundred and fifty feet above the sucky, deep, yellow river Juniata be low. I shall write those two days' journey in a regular order; presuming that no description of mine can adequately paint or express the mar-velous, novel and wealthy landscape which presented and spread out its natural and cultivated beauties at every turn of this enchanting pass.

"All Europe goes in a slow coach, as compared with this American progress; and it is true to say that the entire genius of this country seems to be forever on the stretch to devise a more expeditious and a newer mode of arriving at the goal of all civil, social, commercial and political enterprise. And when one studies their nstitutions narrowly, it will be found that they that this country being a new world and every one in it learning all he can in this new school, American generation are outstripping their European sleepy cotomporaries in arts, in science,

and even in professional celebrity. "After having lost sight of Philadelphia, and valley I have ever seen. This valley, for the distance of one hundred and six miles, till we chain of fields, sown under all kinds of grain, viz: oats, rye, wheat and Indian corn. The valley, seen on each side of the road, varied from one mile to two miles wide; beyond these and if we say that each of these acres produce ten barrels of wheat, we have here upwards of six million barrels of wheat in this valley, in one narrow strip from Philadelphia to Harrisburg. Being all fee-simple estate without tithes, rents, or taxes, save the small local taxes of the slaves imported contrary to law might be detectives, and again the prosperous commercial district, one can well comprehend the wealth of position of the neighboring city.

"We crossed the Susquehanna river at Harrisburg by one of these wooden bridges which the Americans sink, construct, and finish in a month! Of all men living, the American tradesman is most skillful in works of wood. An American is born a carpenter, a coachmaker, sefections are political, the pen and seissors are wood, he is all wood, except his head, and I

A Great Medicine for Females Hundred of stimulants have been invented and sold, pur porting to be specific in the various diseases and derange ments to which the delicate form of woman render he subject. The result of these stimulants has been to in. part momentary activity to the nervous system, and false vigor to the misselfs; but this relief has been succeeded b a depression and prostration greater than before; and the repeated attempts of invalids to build themselves up by those false remedies, have finally ended in destroying what little vital orgination was loft. But in using "Borham" Hollands Bitters" you will find no such disastrous result It a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Hollian Professor, Boerhave. Under its influence every nerve and muscle receives new strength and vigor, appetite and sleep return, and finally, perfect health. See advertisement another column

W. Persons afflicted with the Fever and Ague though not spare either time, trouble or expense, to procure br. Hostotter's Celebrated Bitters, whose beueficent effects upon the human system has been clearly proved to those dim and sunken, with death staring them in the face, this compound must prove a blessing; anatching them as it were from the very mouth of the grave. None can know its true value until they have tested it. When all others have failed, these Bitters have restored the sufferers to pristine health. Their popularity in all the Western and Southern parts should introduce them to all families. Sold by druggists and dealers generally, everywhere 83. See advertisement in another column.

INPECTINE. THE PERSIAN FEVER CHARM. For the prevention and cure of Fever and Ague and Bl ious Fevers. This wonderful remedy was brought to the knowledge of the present proprietors by a friend who has been a great traveller in Persia and the Holy Land.

While going down the river Euphrates, he experienceds

evere attack of Fever and Ague. On discovering his con-

lition, one of the Boatmen took from his person an Ame-

let, saying, " Wear this and no Fever will louch you." Although incredulous as to its virtues, he complied, and exerienced immediate relief, and has since always found it an effectual protection from all malarious complaints. On further investigation he found that the boatman attri uted to it miraculous powers, and said that it could only be obtained from the Priests of the Sun. Sometime afterwards, the gentleman in conversing with a Priest obtained from him the secret of its preparation, and ascertained where the medicinal herbs were found, of which it was

compounded. The wonderful virtues of this article have induced a full belief in the minds of the natives in the miraculous healing powers of their Priests. Since his return to America, it has been tried with the applest effect by several ladies and gentlemen of high character, who have given it the most unqualified prate. This remedy having been a specific in Persia for hundreds of years, for the prevention and cure of Pever and Agus, and Bilious Fevers—is now offered to the American people. It will be sent by mail, prepaid, with full directions for

se, on receipt of one dollar. Principal Depot and Manufactory, 188 Main St., Bichnond, Va. Branch Office, Bank of Commerce Building, JOHN WILCOX & CO. New York. Address June 28, 1860.-1v.

OH THAT THE SKIN Of an innocent sheep should be ade into parchment, and written on to the undoing of a man!" quoth Slinkspeare. He might also have deplared the ruining of men's forms by the uncouth manner in which some ungracious tailors butcher up the cloth made from the wool grown by these same harmless sheep. To see the perfection of the art of working up cloth wisely and well, and so as to set off to the best advantage the forms of its wearers, call at the Brown Stone Clothing Hall of Rockhill & Wilson, Nos. 603 and 605 Chestnut St. above Sixth, Phila. and examine their stock of garments.
