Confidence Reports .-- We were not a little surprised on reading, in the Harrisburg Telegraph, of last week, an official document signed by Major Williams, in command of Camp Cameron, in which Capt. McNally, from this place, and his company of some 80 men are published as deserters from the camp. The statement given was that Capt. McN. was ordered to take his company to Harrisburg, to have the men sworn into the service. On arriving at Harrisburg they took the cars and went to Lancaster, and joined Col. (late Capt.) Hambright's regiment, which is attached to Gen. Jas. S. Negley's ment, which is attached to Gen. Jas. S. Negley's brigade, and Gen. N. was indirectly charged with inducing Capt. LIVER COMPLAINT.

This is a disease much talked about, but at the same time very imperfectly understood. Properly speaking, every derangement of the Liver or Billious system is a Livor Complaint, but the peculiar state of the Liver to which I now have reference is a Chronic of the Liver to which I now have reference is a Chronic Affection, and usually arises from a torpid or congestive state of that important organ. Sometimes the bile is deficient in quantity, or vittated in quality, or both these states provail at the same time. Sometimes the disease is owing to obstruction in the duct or pipe which conveys the bile from the liver into the bowels. This obstruction is very frequent, and is usually caused by the pipe being clogged up by thick tonacious silme or mucous, and sometimes by gall stones. The bile is then thrown back into the gall-bladder, where it is absorbed by numerous small vessels which convey it into the Thoracic Duct, a pipe that runs up along the spine, and terminates in and empties itself into the large vein of the left shoulder, near its junct in with the veins of the head and neck, and thence the bile is conveyed to the heart and becomes mixed with the blood. The bile in this manner being diverted from its proper course, and circulating in a part of the body its proper course, and circulating in a part of the body where it never was designed by nature, produces much cell, and often disastrous effects upon the health of the indi-vidual—because, for want of healthy bile to mix with the vidual—because, for want of healthy bile to mix with the half-digasted food, a complete separation never takes place between the chyle (the milky liquor which forms the blood) and those portions of the food designed by nature to be vicetea from the bowels—for the bile, when present, purifies and separates the healthy from the unhealthy portions, in the same manner that isinglass or white of eggs separate wins or cider from their impurities—and, consequently, the very fountain of life is vitiated and corrupted.

Co-viveness prevails—or olternately costiveness or diarrhica—wind in the stomach and bowels, and the patient is often half of the half of rh. a.—wind in the stomach and bowels, and the patient is often wino, and with worms, and frequently with the piles. The coarse particles of the bile thus mixed with the bloodmore or less obstruct the pores of the skin and small bloodwessels, and hence give rise to various diseases of the skin, such as crysipelas, coze...a. "chings, small watery ressols, blotchess tumors, pimples, scurfi. ess, boils, sore eyes, sores and ulcers of various kinds. The "kin is more or less yellow, and (when the disease is of long standing.) often very dark, and has a disagreeable, dirty, grass appearance, and sometimes there is a perfect jaundice. The white of the eyes also has a green or yellow tinge. the eyes also has a green or yellow tinge.

MORE OR LESS bile is strained from the blood in its passage through the kidneys, and, by its acrimony, produces pains in the back, and scales and irritates all the

other times there is a voracious appetite. There is often a feeling of chilliness, and coldness of the feet and kness, and slong the inside of the thights—sour or bitter eructa-tions, and sometimes a spitting or throwing up of the food

producing nausea and vomiting. If there be any expectoration, it is a tough, repy, tenacious phlegm, which adheres to everything it touches. There are also frequently chronic pleurisy pains in various parts of the chest, which shift about from one part of the breast or side to the other. Sometimes abscesses form in the liver, and pressing upward on the lungs, produce constriction and cough, and breaking, discharge their contents into the lungs, whence it must be ejected by expectoration, or the patient is destroyed. Some persons are troubled with spasmodic twitches in various parts of the body, sometimes faintness and sighling, difficulty of breathing; reading or talking producing wearlness. THERE IS A BEATING ENSATION near the pit of the stomach, with palpitation and fluttering of the heart; profusion of dandruff and loss of the hair; indeed, to, sum up in a few words—a yellow, dirty, greasy appearance of the skin, a yellow or green tings of the white of the eyes, an aching pain across the kidneys and hips, with irritation or heat in discharging urine—a sensation of fullness or distension across the abdomen, with tenderness on pressure—lowness of spirits, frightful dreams, acidity of stomach, with other dyspeptic symptoms, billious fevers, billious colics and billous diarrices and dysenteries, obstinate costiveness, intermittent and remittent fevers, jaundice, fever and ague, &c., all originate from the same cause—a deranged state of the liver. Violent remedies always do more harm than good; but, by a persevering use of those pills, all that can be desired will be accomplished.

THE MOST SUCCESSFUL TREATMENT is to give the patient, every night on going to bed, from two four Sanative pills; or enough of them to insure one and not more than two evacuations from the bowels next morning—The dose of the Fills can be increased or diminished at pleasure, so as to produce the above effect, and their use should be cough, or oppression about the throat or chest, then give the expectorant as often and in such doses as ma producing nausea and vomiting. dreadful period with perfect case and safety. There is no mittake about it.

THE CORDIAL IS ALL WE CLAIM FOR IT:

MOTHERS TRY IT!

And to you we appeal, to detect the liness or decline not only of your daughters before it be too late, but also your sons and husbands, for while the former from false

lelicacy, often go down to a premature grave, rather than et their condition be, known in time, the latter are often let their condition be known in time, the latter are often so mixed up with the excitement of business, that if it were not for you, they too, would travel in the same downward path until it is too late to arrest their istal fall. But the mother is always vigilant, and to you we confidently appeal; for we are sure your never-failing affection will unerringly point you to PROF. WOOD'S RESTORATIVE CORDIAL AND BLOOD RENOVATOR as the remedy which should always be on hand in time of need.
