The whole amount of the Loan authorized is Five Hundred Millions of Dollars. Nearly Four Hundred Millions have been already subscribed for and paid into the Treasury, mostly within the last seven months. The large demand from abroad, and the rapidly increasing home demand for use as the basis for circulation by National Banking Associations now organizing in all parts of the country, will, in a very short period, absorb the balance. Sales have lastely ranged from ten to fifteen millions weekly, frequently exceeding three millions daily, and it is well known that the Secretary of the Treasury has ampel and unfailing resources in the Duties on Imperis and Internal Revenues, and in the issue of the Interest bearing Legal Tender Treasury Notes, it is almost a certainty that he will not find it necessary, for a long time to come, to seek a market for any other long or premature Loans. THE INTEREST AND PRINCIPAL OF WHICH ARE PAYABLE IN GOLD.

Prudence and self interest must force the minds of those contemplating the formation of National Banking Associations, as well as the minds of all who have idle money on their hands, to the prompt conclusion that they should lose no time in subscribing to this most popular Loan. It will soon be beyond their reach, and advance to a handsome premium, as was the result with the "Seven Thirty" Loan, when it was all sold and could no longer be subscribed for at par.

It is a Six per Cent. Loan, the Interest and Principal payable in Chin, thus yielding over Nime per Cent. per amans at the present rates of premium on coin.

The Government requires all duties on imports to be paid in Coin; these duties have for a long time past amounted to over a Quarter of a Million of Dollars daily, as sum nearly three times greater than that required in the payment of the Interest on all the 5-20's and other permanent Loans. Sethat it is hoped that the surplus Coin in the

The world-renowned author, in this admirable Lecture clearly proves from his own experience that the awful consequences of Belf-abuse may be effectually removed without medicine, and without dangerous surgical operations, bougles instruments, rings or cordials, pointing out a mode of cure at once certain and effectual, by which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically. This Lecture will prove a boon to thousands and thousands.

right to pay them off in Gold, at par, at any time after 5 years.

The interest is paid half-yearly, viz; on the first days of November and May.

Supercibers can have Coupon Bonds, which are payable to bearer, and are \$50, \$100, \$500, and \$1000; or Registered Bonds of same donominations, and in addition, \$5,000, and \$10,000. For Banking purposes and for investments of Trust-monies the Registered Bonds are preferable. These 5-20's cannot be taxed by States, cities, towns, or counties, and the Government tax on them is only one and a-half per cent., on the amount of income, when the income of the holder exceeds Six Hundred dollars per annum; all other investments, such as income form Mortgages, Raifroad Stock and Bonds, etc.. must pay from three to five per cent. on the income. gages, Raifroad Stock and Bonds, etc.. must pay from three to five per cent. on the income.

Banks and Bankers throughout the Country will continue to dispose of the Bonds; and all orders by mail, or otherwise, promptly attended to.

The inconvenience of a few days' delay in the delivery of the Bonds is unavoidable, the demand being so great; but as interest commences from the day of subscription, no loss is occasioned, and every effort is being made to diminish the delay.
