AGRICULTURAL.

Ultimate Benefits of Droughts and the Modes in which they act to improve Land.

It may be a consolation to those who have felt the influence of the late long and protracted dry weather, to know that droughts are one of the natural causes to restore the constituents of crops, and separate cultivated soils.

THE QUANTITY OF MINERAL MATTER CARRIED OFF BY CROPS AND NOT RETURNED TO THE SOIL IN MANURE.

The mineral matter carried off by rain-water to the sea, by means of fresh water streams. These two causes, always in operation, and unopposed by anything, would in time render the earth a barren waste, in which no verdure would quicken, and no solitary plant take root.
