SIXECTAPSES IN ONE YEAR. - According to the Cincinnati Inquirer there are to be six eclipses this year-two of the sun, two of the moon, one of the Know-Nothings, and one of the Black-Republicans. The last two will be total. In fact, neither body will ever make its appearance again. The celipse of the Black-Republicans will only be visible in the northern States, that body never having boon seen in the South. It can be seen with out the aid of smoked glass. This eclipse will commence on the morning of November 4th, continuing during a great part of the day: reaching the point of total obscurity about sunset, at which time the Democracy will shine out in it full glory.

PLATFORM OF THE BLACK-BEPUBLICANS. None but Africans to rule America. The Union must be dissolved.

Clay seemed to be much affected by floss demonstrations. In a very clear, modestand manly tone he proceeded to address them.

We were never, in our lives, more surprised that by the speech of this gentleman.

Mr. Breckinridge accordingly came, and he (the speaker) was present at the interview. Mr. Breckinridge stated to Mr. Clay that he had called to pay his respects to him; that, though of the apposite political party, he had been chosen to represent the district which he (Mr. Ully) had himself restranger; "take my cloak and hat, make the last of towns change even in Norway; and natural character, and the effect of that but when Kail found it, "the inhabited by presented with somether presen Mr. Clay was much pleased with this inter-view. ## PARMERS' DEPARTMENT THE VINEGAR PLANT.

For some time past, the sineger plant has een used abroad as a substitute for cider vinegar, to advantage. Frequent applica tions have been made to us to know what it is and whether introduced here. We cappet discover that it has been. It has been at hibited in a fiving state in the New Garden museum, and is called Mother of Vineger. It floats upon a liquid mixture of super and water, and is a minute flingus, allied to the mucars or moulds, Pencilliam glascum, of which the mycelium, or spawn, forms a ough leathery web. A bit of this thrown into the above liquid rapidly increases, inde-ces acctons formentation, and changes the sugar and water into good vinegar. The yeast plant, or "mother of yeast o" - a substance not so easily preserved -is also considered a Pencilium, and to its action is dec the formation of feast.

It is a well known fact, that much of the rinegar which is sold in the shops, is either natt 'ringgay 'vedackd' with water, and strengthened with sulphuric sold, or acetic acid. also diluted, neither of which is very acceptable or wholesome. Under their cfrcumstances it will be a comfort to know that one can make his own vinegar as well at year, and know what is in it. Take one gallen of water, fight a pound of molasses, and soil hem together for twenty minutes; when cool, add a quarter of an ounce of German yeast; put the whole into a jar, and lay the vinegar plant on the surface of liquor,-Cover the jar with the paper, keeping it in a warm place, and it will produce very good and wholesome vinegar in about aix wicks. As it appears to be popular and piscful in England, we have sent out to endeavor to
