Long have school sange of Time, Filling years with golden numbers , But the harp to build a shyme For the Mamenta, idly slumbers

Net by ages do we live These are but a world's bestowments-Gol to us will only give Life and pleasure by the Momenta

Nor have we an age's woo,

Rise were man o'orwhalmed with And we laugh again to-mo Yet a moment may seem years,

When some agony has ornshed us; And we've lived an age of fears, While double passing studyw hash But, when Love has tranged the soul, Inte moment years are cros

Under shiuing skies unclouded Then the bounding pulse of bliss Meither day nor senson theseures For the heart heads only this,— That it now is mad with plopeure But, when Death looks through the cloud,

And with bony fingers beckups; When between man and his shroud Linger but the floating seconds :-Then the mement grows sublime

And the Pes , through all its distance Scome a lightning flash of time. Fading with its fleet existence Drowned be sorrow, then, in Love,

Till ouralty above Shall the soul from Time deliver I says the Ages, then to esath;

These are not a man's bestowments: From the rosy dawn of birth, Life is made of fitting Moments STEAM es. WATER POWER.

The following article, interesting to millers, humbermen and manufacturers, we Had i The Scientific American:

power, but we have no heritation in answering the gorrespondent (in Lowa) from whose
letter we have quoted the above extract,
An abundance of cheap fuel and steam power, in our opinion, possesses the greatest advantages for manufacturing purposes. Few
manufacturing operations can be garried on
without fuel, even where there is plenty of
water power, therefore where fuel is scaroo
and dear manufacturing cannot be carried
and dear manufacturing expenses the greatest advalue to the beneficial action of
the leaves at its roots.

CIEGER'S SEWING MACHINES.—
Price \$130 and upwards. This unrivalled mashies is the most important and useful invention of
the age; and it has been worked a minused tength

manufacturing operations can be carried on without fuci, even where there is be party of water power, therefore where fuel is scarce and dear, manufacturing cannot be carried on but under a heavy expense.

In giving this opinion we do not forget that most of our manufacturing towns and pillages are insisted for their rise to water pawer. They are built on rivers and crocks where there are falls of water for driving machinery, but when they were first established. She have not dear the supply of the state of the viole world with the west fingery machinery, but when they were first established and fibsap in the neighborhoods. It has now become a period question with manufacturers uting water power, that their supply of waters becoming more unstable every year, as the forests are cleared off, and in many places where water power was acclusively used a few years ago, auxiliary atems power is required during certain, portions of the year, on account of a deficient supply of water. As these disappear, and they six proved out to the direct rays of the senger and thus it has occurred that many atreams once flowing with power for the land out to the direct rays of the senger and thus it has occurred that many atreams once flowing with power for the land of the power of steam of the power of steam of the power of steam. Water worn channels. The rains of grist and and waters and thus it has occurred that many atreams once flowing with power for the land of the power of steam. With a pier that the same flowing a number of places, manufactures have not decreased in our country, thanks, is the power of steam. With a pier title supply, of fuel, ateam forens a contact of the rare shave not decreased in our country, thanks, is the power of steam. With a pier title supply, of fuel, ateam forens a contact of the power of steam. With a pier title supply, of fuel, ateam forens a contact of the power of steam. With a pier title supply, of fuel, ateam forens a contact of the power is such as the power of steam. With a pier title supp with the great country of the control of the function of the country of the control of the country of the country of the control of the country of the count

ATTORNEY AT LAW.

is in a peculiar condition the present season.

In all the region over which the excessive drought of the past summer has extended, purchased with an eye to the varieties of taste and the potato had at one; time wholly ceased the potate had at one; time wholly ceased frowing; the rains of last month resuscitated it, and now the theors are growing as rapidly it, and now the theors are growing as rapidly to as at any time during the year. This condition of things, will winke the crop late and it is probable that severe frosts will find it watery and immature. If such be the circumstances, great care will be requisite in handling to prevent bruising and breaking the shin. It will not be safe either to store in large bears on account of the great liability to formentation in all imperfectly ripened regetables and fruit. Fifteen or twenty burshels will be as many as can be safely bursed in one pit.

A plan we tried last year, and which proved

A plan we tried last year, and which proved a most excellent one, is this: Take-twe pieces of inch board, four to eight inches wide, and long enough to reach from the bottom-of-the-pit that above the top about six inches, after the covering of winter is put on. For a pit of twenty bushels, four feet will be long enough. Lay these pieces os edge and tack on pieces of common lath, or something similar, three or four inches long an inch apart. This done, you, have a ventilator, which, if taken care of in spring, will fast: lifetime. When winter sets in, thrust in at the top a wisp of straw, and tack a shimple or board on to keep out rains. In spring, your potatoes, if well covered, will come gat in the course of vines, supply a healtby aliment, and are perhaps the best that can be applied.

The fact of their singular applicability for this purpose was discovered, it is said, by a coldent, but to this course servanting that the top was discovered, it is said, by a coldent, but to this course servanting to the propose was discovered, it is said, by a coldent, but to this course servanting to the control of the part of the most approved styles, and at the tops wisp of straw, and tack a shimple or board on to keep out rains. In spring, your potatoes, if well covered, will come gat in this solton of country. We have also on hand the roots of vines, supply a healtby aliment, and are perhaps the best that can be applied.

Various correspondents have made inquiries respecting the relative value of steam. The fact of their singular applicability for suitwittin power; and one asks. Whether this purpose was discovered, it is said, by an inexhaustible water power or only water sufficient for steam purposes, with an unlimited supply of cheap fuel, are most advantageoms to the development of a manufacturing sid. A vine dresser, to get rid of the prunings of a vine, baried them at its roots. It is not possible to give a satisfactory re- The vine grew more luxuriantly, and proply to a general inquiry respecting the com-parative advantages of steam and water power, but we have no heritation in answer-subsequently experiments proved that the

DIGGING AND KREPING POTATORS.—Since the prevalence of the fatal potato disease, it should that early lifting, or digging, is a security against its attacks. Potatoes planted the first of May, may be harvested the latter part of September. The crop, however the security against its attacks.

NICTORY IS QUERTAIN.
VICTORY IS OURS.
Such is the progress of polence in this age, that nothing seems impossible. That there are new and scientific discoverice being made every day, no one will doubt. After a thorough investigation of the Vegetable Kingdom, with a view to obtain a positive or specific remedy for the more dommon tills of humanity. I have succeeded in bringing together such. Three years have elapsed since its introduction, and it is now elapsed the most popular remedy in the

Helfennt, April 9.765. H. ETRARULER.

I have purchased and used one of the Corn Shelvir manufactered by Dan'l Derr, called the Rough and Ready Corn Shelier, and unhesitatingly prenounce it one of the best in uso. It runs very easy, and shells more corn in a short space of time than any other machine I have ever mot with.

Michael Shark.

We fully condum in the above certificate.

R. C. Hukes & Bro., Bolletonte.

Jon's Martix.

Having examined and tried the patent Rough and Ready Carn Shellers, manufactured by Mr. Daniel Dew, Bellefonte, I find them to be practical and ascell in every respect. The corn which I shelled was green and full of milk, but-the Sheller parted every grain from the cob in a manner which could not possibly lave been done by hand. I freely recommend these machines to the farmers of Contre county.

Caratize Johnston.

Bellefoute, April 22, 1856-ap3-tf

LINCOURAGE HOME INDUSTRY.

The undersigned would respectfully furfamely to the Farmers of Centre county, that they have purchased the right of LIETZ & DUNHAM'S

CAM FOWER REAPER AND MOWER, and are prepared to furnish an article which will not get the back-ache. From those who have, used the machine we can produce shuedant evidence as to its superiority over any other machine now built, for the following reasons:

1st. Og account of its simplicity of construction, and the fact that the slekte is worked direct from the driving whelf, with a simple lover instead of r multiplication of cog wholes, journals, cranks, &c which makes it work tighter for the team.

2d. It is more compact, and is therefore casic handled.

2d Its porfect adaptation to uneven grounds.

Mi. It is more occupact, and is therefore casic handled.

2d Its perfect adaptation to uneven grounds, without hanging on the horses necks; the tongue being limber and turning on castor-wheels, which makes it turn easy.

4th. The perfect manner in which it does its work in both grain and grass; the resping apparatus being so arranged as to put the raker, in a convenient position to deliver the sheaves at that side of the machine, and for moving it has the iraping apparatus all off so as to gnable it to cut tangled clover.

This machine is warranted to cut all kinds off grain and grass, as well, if not better, than can be done with softhe or crafte, and all its parts warranted word of the machine. The second of the later of the parts of the later of the parts of the later of the parts of the later of

A TESTION FARMERS, AND ALL COMERS INTERESTED!

CONN SHELLERS!

The jaddersigned respectfully informs the Farmers and the public generally of Centre county, that

A REVOLUTION IS QUETAIN

JOY TO THE AFFLICTED!

giving health and vigor to the frame,

AND BLOOM TO THE PALLD CHEEK..

Debilly, hought on by abuse, a most terrible
disease, which has brought housende of the human
family to untimely graves, thus bissting the brilliant hepes of parents, and blighting in the bad the
uglorious ambitton of many a noble youth, be
