THE DEMOCRATIC WATCHMAN.

THURSDAY JULY 22, 1858.

LOCAL AND PERSONAL.

CAMP LOGAN.—Cheering intelligence relative to the Encampment, is pouring in from different portions of the State, and Companies from a distance are frequently reporting themselves in waiting for the twentieth of September. The purpose of the people is becoming more fixed in prosecuting things creditable at home, and the scale is almost universally turning in favor of the Bellefonte Encampment. We had no idea until recently so much feeling was manifested abroad. Letters have been received from Military men by officials in this place, stating that Huntingdon county is unanimous in our favor, and will turn out a much larger number of men than it has ever done to any previous encampment. It has become well known that only Companies composing the eleventh division of Volunteers will receive compensation for their attendance at Camp Susquehanna. This fact is working with admirable effect upon our prospects, and will enable us to perhaps even outstrip our enterprising friends at Williamsport.

Gen. R McGill will be on hand with his entire Brigade, and has already solicited information relative to the arrangements.—Capt. Geo. Dare of Spruce Creek, reports that he will be in attendance with his Company, which numbers about seventy men. A call has been made for a meeting of the committee of arrangements on the 31st inst, as will be seen in to-day's paper. Comment upon the local peculiarities of Bellefonte for holding an Encampment is almost unnecessary. Possessing advantages such as are seldom found—with scenery the most inviting—an atmosphere unequalled in purity—and a superabundance of the luxuries of life a stranger in attendance may reasonably expect a season of recreation and enjoyment. We are bountifully supplied with pure wholesome water, which gushes from the base of surrounding hills, and renders the locality to such as appreciate the sublimity of natures works, just the spot of all others the most to be admired. Our Encampment is to repeat is increasing in popular enthusiasm

DICKINSON SEMINARY By reference to another column will be found the advertisement of Dickinson Seminary, under the Superintendance of the Rev. Dashiell, to which we direct the attention of our readers. We deem it unnecessary to say anything favorable to this institution, as its character is too well known to require any commendation from us. The editors of the Lycoming Gazette in speaking of this institution makes use of the following language.

"The next academic year of Dickinson Seminary will commence on Thursday the 19th of August, under the direction of Rev John H. Dashiell, A. M., whose appointment as the successor of Rev. Dr. Bowman we announced several months ago. The new Principal brings with him—or, rather, it preceded—an eminent reputation for learning, and is said to possess, what is equally essential to the success of the institution, excellent business qualifications. The seminary buildings are undergoing a thorough renovation, and will be in excellent order at the time of opening. No institution of the kind will offer to parents and students more substantial inducements than Dickinson Seminary. The location is delightful. From the observatory and upper rooms the whole of the town and a long stretch, east and west, of the valley is under the eye. The buildings are nearly new—an important item to be taken into consideration by students, while another feature, important to parents, is that the faculty all reside in the buildings and have the students constantly under their observation. The accommodations are ample for several hundred, and the faculty are men of experience in their profession From the rapid advance of the institution since its foundation, we expect to see an attendance of five hundred students during the coming year."

MARRIAGES AND DEATHS.—We are frequently asked why we did not publish the death of such a person or the marriage of such a couple. To this question we can readily respond. We will cheerfully give all marriages and obituary notices an insertion when they are promptly handed in by a responsible person, but we cannot find time to run around the country and gather up these items, however interesting they may be to our readers, neither can we afford to employ a reporter for this purpose, hence it will readily be perceived that every person should make it a point to transmit such news to the office as soon as it occurs. By so doing the question need not be asked.

HOW TO MAKE MONEY.—We will tell the secret to our young men. Enter the Iron City College, as soon as you can, and gain a thorough business education from practical teachers, who have had large experience in active business. The tuition will cost only thirty-five dollars, and require from eight to twelve weeks. You are there qualified to fill the most respectable and lucrative situations in business, and receive two or three times greater salaries than you now get or can obtain. For circulars and specimens of rapid writing, address F. W. Jenkins, Pittsburg, Pa.

THE CEMETERY.—The Cemetery is becoming quite a pleasant place, and large numbers resort their on Sunday. It already begins to assume an air of neatness, and once all the improvements are completed, it will be the handsomest in the Northern part of the State. The proprietors deserve much credit, and the thanks of the community, for the labor they have bestowed in fitting up an appropriate receptacle for the dead.

OUR YOUNG FRIEND, S. T. Thompson, we are informed is on a pleasure excursion West. Sam is a clever fellow, and worthy the encouragement of the craft. He has our best wishes for his future happiness

HOG CHOLERA.—We are informed that the hog cholera has again made its appearance in this County, and is prevailing to an alarming extent. A friend at our elbow informs us that a farmer near this place lost the other day, some twenty-eight fine hogs. We would state for the benefit of our country friends, that Mr. William Wolf of this place, manufactures a medicine that has in every instance removed the disease.

RAN OFF.—A few days ago, a horse belonging to Doctor Green, ran away with a sulky and completely demolished it. The Doctor hitched up with the intention of making some of his patients a professional visit, and was about in the act of getting into the vehicle when the horse became freightened, and ran away before it was possible to seize the lines and prevent it.

GARDEN VEGETABLES.—Mr. Charles Brown on Bishop Street, is regularly in receipt of Garden Vegetables from the east, and is prepared to supply the citizens of Bellefonte with any thing of the kind that may be desired. Mr. Brown is a clever fellow and deserves to be liberally patronized.

(MALE AND FEMALE,)
WILLIAMSPORT, LYCOMING, CO., PA.

The next Academical year of this institution, divided into Three Terms, WILL COMMENCE, AUGUST 19, 1858, with a full Board of well qualified and experienced Instructors.

Williamsport, on account of its healthiness, convenience of access, and the intelligence and morality of its citizens, is a most desirable location for a school.

The buildings are large and convenient—with separate apartments for the ladies and gentlemen, and rooms for the Principal's family, and all the Instructors; thus placing the students under the immediate care of their teachers at all times, making all as one family.

The course of study is systematical and extensive embracing the COMMON ENGLISH, SCIENTIFIC, CLASSICAL and ORNAMENTAL BRANCHES.

Board (including washing, lights, fuel and room rent,) $2 25 per week Tuition, from $16 to $27 per year German, French, Drawing, Painting and Music, at low extra charges.

WEBB'S
Patent Galvanic Cement
FOR ROOFING.

THE undersigned having purchased the right for this Cement in Millin and Centre counties, are now prepared to furnish and put it on roofing whenever desired—the roof being sheeted by the owner Scientific men under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of *Imperviousness to Water, Incombustibility, Durability and Cheapness* No article now in use possesses these qualities Shingles are not fire proof, and cannot be used upon flat roofs Slate can only be used upon steep roofs The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof The various cements and compositions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded—As now applied,

First—It is completely impervious to water—Water may continually stand upon the roof without affecting it in the least

Second—It is fire proof It is so incombustible that it will afford ample and perfect protection against fire sparks and burning shingles from another building immediate adjoining

Third—It is durable It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse, N Y

Fourth—It is cheap Roofs will be put on for about half the cost of tin and will last much longer

Fifth Repairs are easily and cheaply made

Sixth—It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold and will remain perfect and solid in the warmest and coldest weather

Seventh—It is adapted to all kinds of roofs either flat or steep

Eighth—It is valuable for repairing old roofs Old shingle roofs may be covered without removing the shingles Old metallic roofs can be made perfectly tight and secure

Ninth It is especially adapted to all kinds of seaming around battlements skylights and chimneys, and for the lining of eave troughs and gutters Roofs which have given trouble for years and which have continued to leak in spite of all efforts, can be made perfect by secure by this Cement

Tenth It has been proved to be the best article ever used for covering car tops and steamboat decks.

Eleventh—This cement applied to new tin roofs prevents rust, thus saving by furnishing a coat which is at once impervious to water and an almost perfect non-conductor of heat

Twelfth—It is the only roofing material patented which contains India rubber and gutta percha

For information in regard to this cement we invite owners of property to address the proprietor at Locks Mills, Mifflin county, Pa

THE LIVER
INVIGORATOR!
PREPARED BY DR. SANFORD.

Compounded entirely from GUMS,

IS ONE OF THE BEST PURGATIVE AND LIVER MEDICINES now before the public, that acts as a *Cathartic* and a *Liver* remedy, acting first on the *Liver* to effect its morbid matter, then on the stomach and bowels to carry off that matter thus accomplishing two purposes effectually, without any of the painful feelings experienced in the operations of most *Cathartics*. It strengthens the system at the same time that it purges it; and when taken daily in moderate doses will strengthen and build it up with unusual rapidity

The Liver is one of the principal regulators of the human body, and when it performs its functions well the powers of the system are fully developed. The *stomach* is almost entirely dependent on the healthy action of the *Liver* for the proper performance of its function, when the bowels are out of order, it suffers in consequence—having caused nearly all diseases of that organ. The Liver has made it his duty, and has for more than twenty years, been in the practice of more and some remedy wherewith to counteract the many derangements to which it is liable

To prove that these statements are true, any person troubled with any of its forms has only to call and get a sample of the article, with which we are willing to test its virtues

These disorders remove from the system, and place a healthy flow of stomach, causing healthy blood, giving whole machinery, in the direction of health

Bilious Attacks are prevented, by the Liver Invigorator

One dose after evening, the Stomach and prevents sour and sinking.
