Scrofula, r'King's Evil

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitlated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scráthous taint is variously saused by mercurial disease, low living, disordered or unhealthy, food, impure air, fifth and filthy habits, the depressing vices, said, above all, by the venercal infection. What ever be its origin, it is hereditary in the constitution, descending "from parents to children muto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

So wide is the field of its usefulness and so numerous are the cases of its curve, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been diseared, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced curves too numerous and too remarkable to be forgotten.
