Effort the Price of Excellerce. Nothing valuable is attained without codeavor on our part. It is a law of the Eternal that effort is the price of excellence This is true in all the interests and pursuits of life. The hu-bandman, the mechanic, the clergyman, the statesman, the scholar, all must earnestly and faithfully apoly the powers which God has given them before they can occupy an honorable position among their fellows, or exert any considerable influence in the world. Sad Condition of the Republican Party. There never before was a party in such a sad condition as the Republican party. There does not appear to be any possible chance of saving it from utter annihilation, if we are to believe its own followers. When the Administration was insugurated, they eried out that if the government yielded an inch towards compromise the party would be ruined; then, when the evacuation of Fort Sumter was talked of, they cried out again . if the troops are withdrawn the party will be ruined. Straw and Fodder Cutter.

A mong the many excellent Straw and Fodder Cutters which have recently come into use, the subscriber confidently offers Lash' Patent as embracing points in its construction of which render it superies to all others. It was put ented the 11th of techober, 1809, and so fully have the oxpectations of the Patentee been realized, in his efforts to get up a broap, simple and efficient machine, that it has already been adopted by the largest manufacturers in fitury counties in Ponn sylvania, who have warmly expressed their professions of the County Rights. The points in which Lash's Patent Straw and Fodder Cutter is claimed to be superior to all others, are, first its simplienty, being free from all complicated eng genring, see onto, that it cuts on a different principle, cutting down on the kalfe instead of a cutting bar, thus requiring less power to work it, so much so that, may be operated by almost any farmers a boy third, the power which is gained over other machine, so that by simply setting the labor of working it, fourth, the peculiar construction of the machine is constructed with provided and in the remembered that other machine is constructed with reaching of genring or, knives at considerable trouble and loss at time.

The machine is constructed with religra-far, crushing fodder as it passes through, and the organic operated by which the hand mackine is worked is on the right hand side, and thus more convenient to the operator.
