

# READ THE OTHER SIDE FIRST.

In the Treatment of the EAR AND EYE, and the other organs of sense, it becomes necessary to have a good knowledge of everything pertaining to Medicine and Surgery. What are called regular Physicians may have graduated in either the old or the new school College, and can boast of a one sided education. Dr. Jones has had a thorough education in both the old and the new school medical colleges, and of an Eye and Ear College, and in the Eye and Ear Infirmary and Hospitals of America and Europe, and his Diplomas from the same hang in his office. It is impossible for a physician who has but the usual medical education, to successfully treat the Eye and Ear. Therefore, Dr. Jones has availed himself of all the advantages the world affords to fit himself for his natural and chosen profession, and of his success the reader may judge by the following testimonials.

## NAMES OF MEDICAL GENTLEMEN.

Through whose Examination DR. JOHANNES A. JONES has gone, and who have testified to his ability in the strongest language possible, by placing their names to his Diplomas, which are suspended in his Office, open to the inspection of the interested.

VALENTINE MOTT, M.D., L.L.D.,	New York.	Prof. JOHN J. CRANE, M. D.,	New York.	Prof. W. A. REED, M.D.,	Philadelphia, Pa.
ALEXANDER MOTT, M.D.,	" "	" W. H. CHURCH, M. D.,	" "	J. R. COX, JR., M.D.,	" "
JOHN W. FRANCIS, M.D., L.L.D.,	" "	GEO. MEED, M.D.,	" "	C. J. HEMPEL, M.D.,	" "
A. CLARK, M.D.,	" "	Rev. ISAAC FERRIS, D.D.,	" "	Rev. A. V. PARSONS, D.D.,	" "
Prof. GEO. SAYRS, M.D.,	" "	DAVID S. ROGERS, M.D.,	" "	Prof. W. JONES, JR., M.D., L.L.D.,	London, Eng.
" J. W. GREEN, M.D.,	" "	J. P. GARRISH, M.D.,	" "	Sir A. MOORE, M.D.,	" "
" B. F. BAKER, M.D.,	" "	Prof. M. STEVENSON, M.D.,	" "	Prof. DEFFAFF, M.D.,	Paris.
" ISAAC WOOD, M.D.,	" "	" J. BEAKLEY, M.D.,	Philadelphia, Pa.	" PULASKI KADESKI, M.D., of	Vienna.
" JAMES N. WOOD, M.D.,	" "				

From the N. Y. Herald, June 4, 1860.

The eye and ear are skillfully treated for all the diseases and ills to which they are subject, by Johannes A. Jones, M. D., Chief Physician and Surgeon to Jones' Eye and Ear Institution, at 137 Fourth Avenue. Dr. J. performs all kinds of operations about the eye and ear in the most successful manner. He has had the advantages of an American and European Medical Education.

From the N. Y. Tribune of May 14, 1860.

Dr. Jones is a thoroughly educated physician, a graduate of the old and new school medical colleges, and of an eye and ear college. No oculist and aurist, now practicing, has had the advantage which Professor Jones has had. His office is 137 Fourth Avenue.

From the N. Y. Daily News, May 12.

He discards the usual barbarous practice, and cures those difficult cases that the profession consider incurable. The advantages and skill of this institution can not be had anywhere else.

My ear drum was destroyed by discharge from the ear, and I have been quite deaf with a noise in my head fourteen years. Dr. Jones has cured the discharge, put in a new drum, and enabled me to hear low talking, although my friends laughed at the idea of my getting in an ear drum. I wear it every day without inconvenience or feeling it. It is my opinion that what Dr. Jones can't do in the way of medicine or surgery, can't be done anywhere.

J. H. ARMSTRONG, Johnstown, Pa.

My daughter's eye, which was turned in, is now natural. It was done without pain, in two minutes by Dr. Jones.

GEORGE W. SPARKS, near Altoona, Blair county, Pa.

One of my eyes has been very much crossed from childhood. Dr. Jones straightened it in two minutes.

Miss M. M. ANDERSON, near Altoona, Blair county, Pa.

My left eye has been very badly turned in and disfigured from my infancy. Dr. Jones has operated upon it for me, entirely restoring it.

Mrs. JANE E. CALDWELL, Birmingham, Huntingdon county Pa.

I was afflicted with watery eye and partial blindness for seven years, I have been under the successful Dr. Jones' treatment three weeks, and am now cured.

JOSEPH HOLENCAMP, near Phoenixville, Pa.

Dr. Jones removed a tumor from my left Ear, and inserted an artificial eardrum—greatly improving my hearing, and he has cured an offensive discharge caused by scarlet fever.

ABRAHAM LONG, Phoenixville, Pa.

I have been near-sighted all my life. Dr. Jones fitted me with spectacles which enable me to see as other folks.

Mrs. A. SHELL, Birmingham, Huntingdon-Co., Pa.

### A LETTER ON CATARACT BY DR. JONES.

By the majority of mankind, Cataract is supposed to be seated on the surface of the ball or outside of the eye, but it is within, near the middle of the ball, and is an opacity of the crystalline lens or its capsule, or of both. The crystalline lens is the size of an ordinary bean, double convex, held in the centre of the eye by ligaments. In its natural condition, it is perfectly transparent, so that the rays of light which are admitted through the pupil must and do pass through it before they can reach the optic nerve and its fibres, which enter the eyeball from the (posterior) back part of the eye; and when this crystalline lens loses its transparency—as it does in that condition of the eye called Cataract—then the rays of light cannot pass through it, hence blindness of the eye must be the sequence.

Cataract may appear suddenly, but generally comes on gradually—the patient first begins to see things indistinctly, then objects assume a smoky appearance; then things look cloudy; finally the opacity of the lens becomes complete, and quite all the light is excluded from the sense of vision, and the patient is blind. This may come to pass in one eye or both. When one eye becomes blind from this cause, the other is apt to take on the same condition. CAUSES.—Many persons have a taint in the blood which produces Cataract (a peculiar diathesis); it is caused by mechanical injuries of various kinds; it is caused by the injudicious and ignorant use of drugs applied to the eye by old women and their followers; it is produced every day by old fogies, charlatans, and other similar persons who style themselves Doctors; and even some good family physicians, without a knowledge of the anatomy of the eye, with more temerity than science, apply nitrate of silver, and many other remedies equally as injurious, which may not only produce cataract, but generally leaves the cornea nebulous, causes the tunics to adhere, leaves specks on the eye, blunts the conjunctive, produces (hypertrophy) thickening of the lining membrane. We can cure cataract in some cases by absorbents; other cases require an operation, which we perform inside of two minutes, and with no more pain than the pricking of a pin. Specks on the eye, are the result of inflammation of the mucous membrane, and the usual severe remedies applied to cure it. Our method of removing them is original, without pain or danger. Finally, with the superior advantages that we possess the affections and diseases of the eye and ear are removed, and cured with a success hitherto unknown.

The friends of progression and Science, and of the afflicted, as well as those well meaning persons who may have allowed their own egotism, or their neighbors skepticism, to deprive them of the means of health, sight, or hearing, will be the gainers by carefully perusing both sides of this circular—and handing it to their neighbors; and if either or any of you, need the services of the Author, (Dr. Jones) you will find him to be what his friends claim for him a Gentleman and a scientific man with extraordinary advantages in his speciality. And his professional trip to distant Cities will bring his skill within the reach of suffering thousands who could not obtain it, if they had to go hundreds of miles from home.—Rev. Henry King, N. Y.

### Permanent address—

JOHANNES A. JONES, M. D.

Jones' Eye and Ear Institution, at 137 4th Avenue, N. Y.

From the New York Times, June 4.

Johannes A. Jones, M. D., No. 137 Fourth Avenue, is a graduate of a homoeopathic and allopathic medical college, and of an eye and ear college. He is the only scientific oculist and aurist now practicing.

"We have seen Cases of deafness and affections of the eye of various kinds that Dr. Johannes A. Jones has cured. We have seen an artificial eye introduced by him, which gives no pain, and cannot be distinguished from the natural organ. We have seen a number of persons in this vicinity, who have been cured of old standing diseases, by him. As a general physician, he is equal to the best; as an oculist and aurist, he is both scientific and natural, and his equal we have never met. He will bear any recommendation that the press can bestow. [Editor Patterson Guardian. Patterson, N. J., July 6, 1859.]

Dr. Jones operated on my right eye for cataract, perfectly restoring the sight. There was no pain and I would most cheerfully recommend all persons afflicted to employ him, as he is a most skillful physician. JOHN ATWOOD, Pottsville, Pa.

Dr. Jones inserted an artificial eye for me which moves and appears natural, and gives me no pain. HARRIET WELLS, Allentown, Pa.

Dr. Jones has cured me of noise in my ears, and deafness with an awful discharge of 15 years standing. HENRY STEINMAN, Greenville, Montgomery County, Pa.

I have been cross-eyed all my life. The skillful Dr. Jones of N. Y., straightened my eye in one minute. JACOB ALLEMAN, Altoona, Pa.

My young daughter has been partly deaf, with a discharge and tumors in her ears, resulting from scarlet fever, for 9 years. My family physician could not cure it, and said it could not be cured.—But, seeing the superior advantage and skill, possessed by Dr. Jones, I placed my daughter under his treatment. She has been using his remedies and following his advice three weeks, and she is cured—and I have seen many others which he cured several years ago. If the reader or his friends are afflicted, I would advise them to go immediately to Dr. Jones, as he is right up to the times, and cures with ease those very diseases which are called by ordinary physicians beyond hope.

Rev. J. C. HAMMOND, Coshabcton, Pa.

I have been so deaf that I could not hear long conversation without it was very close. I was troubled with a noise, and continual roaring in my ears. Dr. Jones restored my hearing and quite removed the ringing in my head in one hour. JAMES FITZGERALD, Pleasant View O. P. Juniata Co., Pa.

### SYMPTOMS OF CATARRH BY DR. JONES.

1st. Of the head—Tingling, itching, with sense of dryness and obstruction of the nose, sneezing, running of a watery secretion; as it progresses the secretion becomes mucus, entire obstruction of one or both nostrils, hawking, tickling of the throat, coughing, &c. 2. Catarrh of the Chest—Prevails as an epidemic sometimes and is called influenza—with or without fever, and many of the symptoms just mentioned; there is oppression across the breast, rawness and burning of the throat, first dry, afterwards a copious secretion of mucus, which may become opaque or frothy, difficulty of breathing, pain in the head, and dull feelings, a sense of soreness, extending under the breast bone to the stomach pit; the fits of coughing may occasion vomiting oppression, prostration; as the disease progresses the sputa become rropy and viscid. This disease is called the Grippe by some. Catarrhal Inflammation of the eyes arises from colds, causes obstruction of the tear passages, watery eyes, fistula, lachrymalis, dimness of vision, &c. 3. Suppressed Catarrh—May produce inflammation of the lungs, brain or eyes, or give rise to rheumatism, nervous disorders, weeping, moaning, tremors, and convulsions, drowsiness, chilliness, starting, twitching, palpitation of the heart, &c. When the frontal sinuses above the eyes, posterior and anterior nasal passages become clogged up, and even the antrum or cavity of the cheek bone becomes filled or partly; it often produces a pressure on the nerves that supply these parts, and pains like the most excruciating neuralgia is the result. The disease follows the mucus membrane through the Eustachian tubes to all parts of the same membrane of the ear, causing hypertrophy of the drum, interferes with the functions of the glands of Wharton, which secrete the wax; a dryness follows, hardness of hearing, roaring, buzzing, singing, whistling, cracking, the ringing of bells and similar noise, which vary; and which are simple effects—and when the cause is removed the effects cease; this hardness of hearing increases by each additional cold, though not perceptible at the time, it cannot be denied, after the lapse of time.

### STRABISMUS OR CROSS-EYEDNESS

Is a contraction of one or more of the muscles of the Eye, it is remedied by dividing the muscle which is contracted, is attended with no danger, and is on the surface of the eye ball—we can restore all such cases to their natural appearance and sight in a few minutes.

Dr. Jones will be at the Conrad House, Bellefonte, from the 15th till 21st of April.
