The old story over again. tioned. If four m llions of white men, who Now, the careless and thoughtless, who had been captured as prisoners of war and are well to do, may toss their head, and say were now in the sonthern States reduced to that all this is inevitable-that a man has slavery, and we were marching our armies no business to be poor, &c., but the stubborn down there, then there would be some cause fact comes back to us, thousands of our in comparing Fremont's course to that of own kith and kin are poor, and more than Phillip of Macedon, when he made war on that, their poverty is a source of wealth to Athens. Mr, Sumner thinks that the Crea their rich neighbors. Their labor, the only tor made a mistake or an accident in crea thing they have to sel!, is purchased at the ting the nigger black, and that he is in relowest figure which will keep soul and body ality a white man under the disguise of a together. In large cities and towns, this is black skin! Who knows, then, but the too apparent for even the most casual obser. Creator may have also made a mistake in ver not to see. Often, it must be allowed, creating Summer, and that after all the classical Senator from Massachusetts is only a this decree of low prices is as inexorable on the employer as upon the employee. Nev- negro in the disguise of a white man ! The one is just as probable as the other. and we ertheless, the fact exists-that poverty and wealth-luxuriance and starvation go hand submit the latter supposition, considering in hand. Where the greatest poverty exists Sumner's constant devotion to the negro, is - the most heart-rending and soul-crushing not the most likely to be correct.

degradation, there will be invariably found the most profuse and overburdened wealth. The cause is obvious. When one man is be very much such an individual as Sumner robbed of his earnings, some one must get is. That is, he would have a large amount them, and the greater the extent of this of book learning, &c., which he would not robbery, why, of course, the greater the have sufficient brains to know how to use .gain to the party who secures it.

The Cotton Question

A Learned Fool.

When

The perrepial cotton tree of Western South America has been transplanted to Maryland, and has flourished in a most remarkable manner. The experiment was made by Mr. Kendall, of that State, who saw the tree in Peru and Chilli, in 1856, during a missi in which he was sent by our Government to collect seeds and plants, and to assist in king observations of transit routes across comes a curse to society and an injury to the Continent. He found the tree growing wild, and equally as well in the cold highlands and mountain regions, as in the sultry low lands. This suggested the idea that it might be adapted to the Northern portion of the United States, and he accordingly procured seeds and plants, and brought the to this country. From these he raised a number of trees on his own farm, with great success and ease, and he avers that they withstood, without injury, the severest win ter of our latitude. He says that the tree will thrive and produce abundantly wherever corn will mature. In its native condition and in the higher southern latitudes, its average size and altitude is said to equal the medium peach of North America, and the tree most nearly resembles the white mulberry. The leaves are abundant, the the flowers profuse, the balls, at maturity, are twice the size of those born by the herbaceous plant, while the fibre was found to be finer and the length of staple increased as the tree approached the cooler regions .-It may be propagated from seed, but more readily from cuttings simply thrust into the ground, and may be planted out as an apple, peach or pear orchard, in a field cropped with any of the cereals, until having reach ed its full growth, the tree should be allow .. ed to occupy the land exclusively. It bears cutting, also, as kindly as any known tree. and in field culture may be kept so pruned that its produc e shall be within reach of the hand. The Crop in South America has eached two thousand pounds to the acre, whereas the annual cotton plant of the Southern States vields but five hundred pounds to the same area. Peru already exports of this cotton about six thousand bales of one hundred and fifty pounds to the bale and we are told that the staple of the Peruvian free cotton, even when produced without care or culture, as it usually is in South America, 15 superrior to the best Upland staple of the cotton States of the South. In proof or this fact, it is said that the cotton grown in the valley of the Chira sold in the port of Paita at sixteen dollars per hundred pounds. Mr. Kendall is to lecture at the this theory. An "educated" negro would Cooper institute, New York on the perennial cotton tree of South America, and he proposes to show that it may be naturalized in all our Northern States. If his views are well founded, then better cotton than than that of the Southern or Gulf States may be pro duced, by free labor, North of Mason and Dixon's line; and more abundantly and econ-
