Dr. Harry Knorr, of Howard, was very seriously injured by being thrown from a His leg was broken shove the ankle, so that the bones protruded at the fracture. He has been in a very critical altuation, and it was feared that amputation would be necessary. We are glad to learn that he is recovering, and hopes are entertained of preserving the limb.

The holiday season is approaching, and we would say to those who desire to obtain a beautiful present which will be apprecisted by young or old of either sex, go to Barnhart's Excelsior Picture Car and procure one of his beautiful Photograph Albums. If you desire to make a rich and valuable present to a friend, he can accommodate you with an album to suit. If you have but little to spend on a gift, he has beautiful articles in his line at a small cost.

An accident occurred one day last week on the Bellefonte and Snow Shoe railroad, on the north side of the bridge over the Bald Ragis Creek, near Milesburg. Some work-men engaged on the road had taken up a rail, for the purpose of making some repairs, when a train came suddenly around the curve and was precipitated down an embankment, making a frightful smash. and threatening the lives of all who were near. The whole train went down, while the locemotive passed in safety, in what manner we cannot tell. We believe no one was seriously injured, though the danger must have been very great, and the escape of the hands almost miraculous.

We had the pleasure lately of riding over the Bald Eagle Valley railgoad, from this place to Howard. . The workmen entrusted with the ballasting of the road are deserving of the highest praise for the rapid and efficlent manner in which they have done their work. The road is very smooth, considering its recent construction, and promises soon to be one of the most pleasant in the State.

We were struck with the neatness and order of all the arrangements, as well as the politeness of the gentlemanly conductor of the passenger train. In a week or two track will be laid through, and trains run regularly between Tyrone and Lock

The weather for the last ten days has been what the almanao makers call variable. We have had a touch of all the seasons. First the balmy air and bright sunshine of Spring, then the sephyrs of Summer, the frosts and falling leaves of Autumn, and concluding with the snow and sleet of Winter. We were flattered several times in the last few days by the genial rays of the sun into the belief that our Indian Summer was approaching, but each time we have have had a touch of all the seasons. First was approaching, but each time we have been disappointed. We are now drawing so close to the domains of Winter that we need scarcely look for much fine weather, but make up our minds to bear the cold blasts, and tread the slushy streets as resignedly as possible. for months have been in most necessitous sircumstances. The Borough authorities were called upon to afford relief. One of the persons connected with the administration of our Borough affairs, (whose name we will suppress until the truth of the steiement can be ascertained), called at the house occupied by this woman and her children, at different times, and made altempts to have criminal intercourse with her. This she registed and made his attempts knows to some of her neighbors. In conse-'quence of this exposure and the persistence of the woman in maintaining her virtue against all his pursuasions and menaces, this Borough magnate wreaked his vengeance upon her by refusing to furnish her with the necessaries of life, in consequence of which the woman died on last Sunday morning from absolute destitution and maryation !!

This is the story as circulated about town. If it is true, there is no punishment too great for the villain who perpetrated this enormity. The fair fame of our town and the honor of common humanity require that the affirehould be investigated most

GUARD AGAINST FIRES .- The following cecept for extinguishing fires in case of This most wonderful remedy for the permisecesity will prove inopportune, now that receipt for extinguishing fires in case of the winter is at hand and accidents from fire are of such frequent occurrence. As the time is at hand for replacing stoves and lighting the first fires of the season in those that have not been used for a time, a word of caution may not be out of place, and may save us the unpleasant duty of announcing that some citizen has been burned out There is a charm about the first evening fires, and as the family and friends gather around them it is natural to pile on the kindlings in order to address the cheerfulness of the occasion at such times the chimneys are most likely to take fire and if the wind be high the buildings of the immediate neighborsare endangered. There is a simple method of extinguishing the fire in a chimney which may be used by any one on the instant It is this: Take a large handfull of salt, throw it on the fire in the store and close the stove as closely as possible. It will surely extinguish the flames at once.

N V A L I D Sit. IRON IN THE BLOOD!

It is wall known to the medical profession that iron is the vital principle or life element of the blood. This is derived chiefly from the food we cat; but if the food is not proparly digested, or if, from any cause whitever, the necessary deantity of irons is not taken into the circulation, or becomes reduced, the whole system suffers. The bad blood will irritate the heart, will clog up the lungs, will wisplity the brain, will obstruct the liver, and will send the disease producing elements to all, parts of the disease producing elements to all parts of the system, and every one will suffer in whatever or gan may be predisposed to disease.

The great value of IRON AS-A MEDICANE. IRUN AS A MEDICINE
Is well known and acknowledged by all medisal men. The difficulty has been to obtain such
a preparation of it as will enter the circulation
and assimilate at once with the blood. The
point, "says Dr. Hayer, Massachusetts State
Chemist, has been attained in the Peruvian Syrup, by combination in a way before unknown.
