J. W. BRADLEY'S New Patent DUPLEX SLLIPTICI(or double) SPRING SKIRT.

Buy Swe ELLIPTICi(or double) SPRING SKIRT.

This invention consists of Duplex (or two) Riliptic Pure Refined Steel Springs, ingeniously irraided tightly and firmly together, edge to edge finking the toughest, most fiexible clustic and durable spring ever used. They sellon bond or break, like the sugle springs, and consequently preserve their perfect and beautiful shape more than twice as long as any single skirt that ever had or can be made.

The wonderful flexibility and great comfort and pleasure to any lady wearing the Duplex elliptic skirt will be experienced particularly in all crowded assemblies, operas, earringes, railroad cars, church pews, arm chairs, for promenade and house dress, as the skirt can be folded when in use to coccupy a small place as castly and convenience of yearing the Duplex elliptic steel spring skirt for a single day will never afterward; willingly dispense with their use. For children, misses and young ladies they are superior to all others.

The hoops ard covered with 2 ply double twisted thread and will went twice as long as the single yarn covering which is used on all single steel hoop skirts. The three bottom rods on every skirt are also double steel, and twice or double cowered to prevent the covering from wearing off the rods when dragging down stairs, stone steps, etc., etc. which they are constantly subject to when in use.

wearing off the rods when dragging down stairs, stone steps, etc., etc. which they are constantly subject to when in use.

All are made of the new and elegant corded tapes, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lighest, most desirable, comfortable and economical skirt ever made:

TO Dr. Keyser is a Physician of over thirty years' experience, and a gradual of the Jefferson Mödical College and of the Uni-versity of Medicine and Surgery of Philadal-phia.

Dear Sir.—In regard to the questies asked me as to my opinion about Buchs, I would say that I have used and sold the article in various forms for the past thirty years. I do not think there is any form pr preparation of it I have not used or known to be used, in the various diseases where such medicate agent would be indicated. You are awars, as well da myself, that it has been extensively employed if the various diseases of the bladder and Ridneys, and the reputation it has acquired in my judgement is warranted by the facts.

I have seen and used, as before stated, every form of Buchu—the powdered leaves, the simple decection, tincture, fluid extracts,—and I am not cognisant of any preparation of that plant at all equal to yours. Twelve years experience its merits, and without prejudice or partiality, I give yours precedence over-all others. I do-not value a thing according to its bulk, if ! did, other Buchus would out-do yours, but I hold to the doctrine that bulk and quantity do not make up value—if they did, a copper-went would be worth more than a gold dollar.

Nalue your Bushu for its effect on patients:
