MEDICAL PROPERTIES AND USES.—Buchuleases are gently attinulant, with a peculiar tendency to the Crinary Organs, producing diuresis, and like other similar medicines, exciting disphoresis, when circumstances favor this mode of action.

Disease of the Prostrate, and Roten tion or Incuntinence of Urine, from a loss of tone in the partic concerned in its execution. The remedy has also been recommended in Dysposas, Chronic Rheumatism, Cutaneous Affections, and Dropsy.

Dear Mrr.—In regard to the upbestion asked me as to my opinion abou. Hacks, I would say that I have used and rold the article in various forms for the past thirty years. I do not think there is any form or preparation of it I have not used or known to be used, in the various diseases where such medicate agent would be indicated. You are aware, as well as myself, that it has been extensively employed in the various diseases of the bladder and kidneys, and the reputation it has acquired in my judgement is warranted by the facts.

I have seen and used, as before stated, every form of Bucks—the powdered leaves, the simple decocion, tincture, fluid extraots,—and I am not cognizant of any preparation of that plant at all caust to yours. Twolve years' experience ought, I think, to give me the right to judge of its ments, and without prejudice or partiality, I give yours precedence over all others. I do not value a thing according to its bulk, if I did, other Bucknew would out-do-yours, but I held to the dectrine that bulk and quantity do not make up value—if they did, a copper cent would be worth more than a gold dollar.

I value your Buchu for its effect on patients.

I have cured with it, and have seen cured with it, more diseases of the bladder and kidneys than I have ever seen cured with any other Buche, or any other proprietory compound of whatever name.

Respectfully, yours, &c., GEO. H. KEYSER, M. D.
