other season of the year in the temptation to ent green fruit so strong as now, and the dren die of Summer complaints, and no one knows what occasioned their illness, when in nine cases out of ten, it was the result of cating groom frust. Apples which have been stung by insects, and all from the tree, prematurely ripened, are eagerly devoured, and are a most permicious poison. The trouble of preventing small children from getting them is much less than that of pursing them through an illness which probably ends in the gravet. Parents are entirely too careless on this subject. There is another source of mortality among children which is greatly neglected. Weather like we have been having lately, and which we usually have at this season of the year, children should be protected from the damps Realish.—Thomas Dunn English is an Ameri and chills of the morning and evening. The clothing they wear during the heat of the day should be increased in the evening, and care abould be taken to keep the extremittes warm. We often see very small children, scarcely able to walk, with bare legs and feet, neck and arms, late in the evenings, and we always think that there will be a funeral, and the mourning parents will wonder what occasioned the illness of their lost child If they had deliberately utended to murder it, they could scarcely have chosen a method more likely to succeed. Few children can survive exposure of the kind, and those, who do, most likely carry from their very infancy the seeds of a discase which will harass them throughout life, and bring them to an early grave.

The consequences are so awfully important that we wonder at the careleseness which parents display on this subject. There is no excuse for ignorance in regard to the laws of health now, for the means of knowledge are within the reach of every one, and

that sleep is "Nature's sweet Restorer," and it is a fact beyond commidcute in that an easy, quota and natural sleep at regular intervals, and especially at night, is absolutely necessary to beath. It is during repose that the system strengthens and fortiles itself against the exhaustive influence of waking hours. Infants and children require twice the sleep for of an adult, and unless they obtain it by some means they are irritable and restless, the system is more semitive to cold or other axing conseas, more exposed to the ravages of disease, and easily prostrated thereby. For producing a quiet, natural and refreshing sleep, one from which the child will awake, feeling refreshed and gloeful. Many of the articles put in market.

A CARD TO THE LADIES DR.DUPONCO'S

It is now over thirty years since the above lebrated Pills were discovered by Dr. Duosco of Paris, during which time they have seen extensively and successifully used in most of the public institutions—as well as in private practice—or both bemispheres with uniparalled success in every case, and it is only at the urgent request of the thousands of Ladies who have used them that he induced to make the Pills public for the alleviation of those suffering from any irregularities whatever, as well as to prevent an increase of family where health will not permit it. Pemales peculiarly situated on those supposing themselves so, are cantioned against using these pills while in that condition as the proprietor assume no responsibility, after the above admonition although their mildness would prevent any mischief to health otherwise the Pills are recommended.
