Our attention has been recently called to a cure for cancers, which is of su much an-portance that we wish to make it known as widely as possible. Soma eight months ago, Mr. T. B. Mason, who keeps a music store on Wisconsin street, and is a brother of the well known Lowell Mason, ascertained that he had a cancer on his face the size of a pes . It was cut by Dr, Walcott, and the wound partially healed Subsequently it grew again, and while he was in Cincin all on business it attained the size of a hickory nut. He has remained there since Christmas under treatment, and has come onck perfectly cured. The process is this A piece of sticking-plaster was put over he cancer, with a circular piece out out of the center a little larger than the cancer. made of chleride of zine, blood root and white flour was spread on a piece of muslin of the size of this circular opening, and applied to the career for twenty-four hours. On removing it the cancer will be found burnt into, and appear of the color and hardness of an old shoe-sole, and the circular rim outside of it will appear white and lar rim outside of it whit appear white have purbuiled, as (foralda) by hot steam. The wound is now drossed, and the outside run soon suppurates, and the cancer comes out the place heat up a hard lump, and the place heals up -

The plaster kills the cancer, so that it sloughsput like de sittesh, and never grows again This remedy was discovered by Dr Fell, of London, and has been used by him for sight years, with unfailing success, and not a case has been known of the reappearance of the cancer where this remedy has been applied. It has the sanction of the most eminent physicians and sur-been used in this country, and many of the faculty with their proverbial opposition to innovation, look on it with distrust. We saw Mr Mason at church yesterday, and have since conversed with him, and particular notice of the cicatrised wound and can only say that if cure is permaner. -and, from the evidence of six or gight years experience in other cases, we have no doubt it is-the remedy ought to be universally known. We have referred to this case, because Mr. Mason is well known both here and at the East. The experiment excited much interest in Cincinnati. and we call the attention of the faughty of this State to the remedy. If it is what is claimed for it, this terrible disease will be

shorn of most of its terrors. The application is painful, but the pain is of comparalively brief duration, which any one so afflicted would cheerfully endure.
