What we can do for the Country.

There is now every prospect of perfeet harmony in the Democratic National Convention, which will secure the nomination of able and patriotic statesmen for the important positions of President and Vice President of the United States.

It is conceded by the most sagacious leaders of the opposition, that the choice of such men for our candidate will secure us the victory in November over any man they can put in the field.

For the first time in eight years, we will enter the field with samething like an equal chance with our- opponents, and the Democracy has never yet failed to win under such circumstan-

The all that time in the hands of the party which promised so much for the poor, and won tens of thousands of honest men to their support by the glittering hopes held out to them of bettering their condition. Now, grown sick with hopes deferred, crushed to the earth with taxes and lorded over by a bond aristocracy, the cheated, naked. suffering, starving people turn once more to the party which never promised what it could not do, but always fulfilled what it did promise, and implore us to give them once more the free, happy, prosperous and peaceful government which for more than half a century we maintained against ev-

What can we do towards fulfilling their wishes, and what shall we promise them as a result of our success? We do not desire to deceive, nor to raise hopes which can never be realized, and what can we accomplish with the divided, distracted; despotridden union which eight, years ago went into the control of the Abolition-

the principles which never yet failed to bring peace happiness and prosperity to every portion of the country.

It would be unreasonable for any one to ask us now to promise more. In the very nature of things, we cannot fail to restore the government if the above programme is faithfully carried out, and at present that is the all important duty. Lincoln undertook to run a Democratic government on anti-democratic principles, and the result now close upon us is ruin. The "machine," which went into his hands in perfect order, is crushing the people beneath its ponderous wheels. We propose to put them on top after we have carried the November election, and they propose to help us carry the election.
