CAMPAIGN TRANSPARENCIES AND BANNERS

PAINTED TO ORDER, in Plain or Illuminated colors for all par-ties, by

JOHN G. KURTZ,

who having receded f. sm the publication of the Central Prets in Bellefonte, will hereaf-ter devote his time to the painting of Baa-mers, Transparencies and all descriptions of Gilt and Plain signs. M. THOMPSON, B. M'PARLAND, J. I. THOMPSON.

THOMPSON, M.FARLAND & CO., BANKERS. Agricultural College, P. O,,

these stoves is constructed for hurning the Pennsylvania Anthrucite coal. It is made on the base burning principle and possesses a novel and thoroughly scientific arrangment for preventing the mica windows from being smoked. The windows are placed in a revolving cylin er, which is closed while the fire is being kindled, and after the smoke has passed off, again reversed, showing a clear, bright, cheerful fire. In fact, after this operation had been performe, we obclear, bright, cheerful fire. In Jact, after this operation had been performe, we observed that the mica windows were as clear of smoke as a lady's mirror, and the light emitted from them was amply sufficient to read by without the aid of any other light A poet has well characterized this superb stove in the following lines, entitled

"LIGHT AT LAST."

Ben Franklin, with his cord and kite,
Draw lightning from the cloudy skies
Now. Spear, with his 'Revolving Light,' The power of darkness too defies.

The object so long sought in vain, By mechanician and by eage, ome on the from Spear's profibe brain— The wonder of this wondrous age.

As mornin · or as evening star, Shine from the firspament alar, So shines bear's stove in coay room.

No genius could a stove devise More perfect than this minor sun. Not Argus, with his hundred eyes, Nor Cyclops, with his single one.

'Tis free from deletirious gas,-'Tis free from smoke and free from rust,

And other excellence it has : It saves the fuel and saves the health,
Promotes good feeling and good cheer;
And those who'd learn the road to wealth, Will buy this poerless retove 'rom Spear.

This stove is composed partly of Russia iron and ornamental east iron work, peculiar to Philadelphia stoves, and the heating qualities of it far axcel that of any other stove that we have yet seen. We understand that a fre can be kept going in it during an entire will ter without re kindling, which is a kreat saving of labor.

The other stove refered to, was composed principally of Russia Sheet Iron with partial cast iron base, and is intended for burning either Bituminous or Anthractic coal

ing either Bituminous or Anthracite coa One of the chief excellencies of the latter stove, censists in its ingenious mode of poking the fire and demping the grate without causing any du-t or dirt in the room, being entirely different in this respect from any other stove manufactured in the United any other stove manufactured in the United States The stove, moreover, is very beautiful in appearance and perfectly air tight. By, an "air tight" we mean that are can be kept up in it for an entire day without the addition of any fresh fuel. The stove is for this reason, an extraordinary economiser as well as a decided orannent to any apart ment, and the most cleanly and convenient heating stoves that we have ever examined for Bituminosis cosi.

for Bituminous coal.

We are pleased to learn that this admirable stove has been 'made accessible to our citizens. Mesers' Haupt & Co, are the &uthorised agents for their sale in Bellefonte.
