AYER'S SASSAPARILLA, FOR PURIFYING THE BLOOD. The reputation of this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inevitable cases of Scrofulous disease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this disease and unfelt taint of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases without exciting a suspicion of its presence. Again, it causes a blood infection throughout the body, and then, on some favorable occasion, rapidly develops into the skin, or any of the affections, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it radically cures in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.
