THINGS ABOUT TOWN & COUNTY. -Mr. Daniel Lesh, of Zion, cut, during the harvest just past, a field of wheat containing 84 acres, that produced 410 dozen sheaves, or about 40 bushcls to the acre.

-----On the night of the 4th instant, a feavy hail storm, extending about one and a half miles in width, passed over Zion, cutting down and destroying corn, oats, fruit and every thing in its way.

-A horse belonging to Mr. George Miller, living near the toll gate on the Boalsburg turnpike, ran away with one ef his workman on Monday last, injúring him so severely as to probably prove fatal.

-We met with lots of good and true Democrats on the day of the county convention, and all seemed to be in the best of spirits and sure of the triumphant election of the Democratic State and county tickets.

PACKER OATS .- On Tuesday last, Mr. Daniel Houser, of Benner township., brought into our office a stock of outs measuring 6 feet and 10 inches in height, and containing 198 full-grown grains of onts If there is any body who can beat this for hig outs we should like to know who it is.

Pic-Nic-The St. Patrick's Temperance Society, of Bellefonte, will hold a pac-me, in the Pine Grove, near the Friend's burying ground, on Wednesday, Aug. 18, '69 A good dinner and refreshments will be served on the ground The friends of the Temperance cause, and the public generally, are cordially invited to join in the festivities of the occasion.

- A dry-looking set of dull, sleepy headed, seedy politicians, assembled in the court house, on Wednesday after noon last, calling themselves the "Republican county convention," and placed in nomination the following ticket

solitary lively incident, and the whole Meek thing put one in mind of a crowd gathered for a funeral. It was, indeed, a sorry sight, and one instituctively felt for his handkerchief to keep the moisture out of his eyes

--The eclipse of the sun on Saturday last was on time exactly, and eagerly observed by our citizens. About five welock or a little after, the moon's shadow was observed stealing over the suns face, and, as it progressed, the light of old Sol gradually lessened, until earthly things assumed a ghostly and unnatural appearance Smoked glass was was in great demand, and everywhere groups of citizens could be seen looking at the phenomenon The eclipse came very near being total in this locality, only a small portion of the sun being visible

The next total eclipse of the sun will occur in May, 1900. How many who, on Saturday last, witnessed the great wonder, will be living to see it at that time?

teachers are employed. Were I to wait on these reports, one half of the schools would not be visited at all. Only today, (July 1st), I received one of these reports from a district in which the schools closed in March. Instead, of this I commenced visiting immediately after the opening of the earliest schools about the beginning of November, and being blessed with good health, con-tinued uninterruptedly until the close of the *latest*, about the lat of May. I usually visited three schools per day, reaching the first one by 8 o'clock in the morning, and remaining at the last one till 5 in the evening. Very little time is thus left for attending Insti tutes. Were I to visit two schools per day, with our present average term of 4 13 20 months, some 50 schools could not be reached at all. Centre County extends over 1,000 square niles of ter ritory, about one half of it being in and among the Allegheny mountains, mak-ing it difficult to travel. It has now almost 200 sub-districts, all seeming to feel as if theirs was entitled to the spe cial attention and time of the Superin tendent, not considering that in justice to all he must divide four short months into 200 parts, and that one of these parts is all that is due them. Visiting chools day after day during the most inclement season of the year, through drenching rain, piercing wind, or a violent snow-storm, and over rough roads, 14 far from being that pleasant passtime which many people consider it to be. The percermations of the Su

perintendent are frequently fraught with incidents not entirely devoid of pleasantry, such as involuntarily slid ing down snow crusted, hill-side fields. among the slopes of the Alleghenics, to the infinite danger of the fence by the collision : a sudden disappearance of now, and dragging our sleigh home through the mud, are yet fresh in our memory. Yet with all these annoy ances this part of our work has its agreeable features. Teachers and pu pils are glad to receive the visits, and seem encouraged by them. My mode of visiting was about the same as last year; to judge of the merits of the leacher, and when necessary for his in struction hear a class myself; to col lect statistics : "to see that the scholars were persuing such studies and in suf ficient number us to occupy their time and burgy," (see decisions, school law, page 131), and encourage teacher and pupils.

I tried to secure the company of directors and found many who generou-ly accompanied me to all the schools in the district. It would be profitable to have the company of directors in all our visits, but 1 could not always find time to hunt them up , forty visit- on ly were made without their company however; some who had previously been rather opposed to the system were thus made its warmest friends

Institutes -- Our 22d Annual County Institute met at Umonville on the 28th of December, and continued five day It was one of the most interesting and profitable meetings of the kind everheld in the county, and in numbers of actual members the largest. Harmony and cheerfulness prevailed throughout The leading feature of the Institute was its undependence, the teachers of the county doing the bulk of the work Our High Schools and Academies were the well represented Ours was emphatic • cally a *working* Institute, every teach is raking part, and seeming to feel a personal interest in its welfare. in the Altoona Tribune: The Bellefonte National newspaper and fob-prioting office was recently sold at sheriff's may his always to be regarded as a misfor-time that any one whould fail into the sheriff's hands, yet when printers are foolish enough to court such misfortunes by doing job work at less than Ibing prices, for the purpose of undermining their neighbors, and making a jorade of their extensive business, we confose our bowell of coupassion are not severely la-cerated. Long since we were informed of the pricescituzges by the Bellefonte office, and the pricescituzges that we had no desire to be sold out by the sheriff. Our matter is "Live and let live," and when we canned get its ing prices for accating job work, in the printing line, we will quit the business and ge at something else.
