Just the Thing They Want.

The present Tariff is just the thing the great capitalists and propopolists of the East want. It is just right for them, and they are content.

In old Whig times there were those who wanted a high Protective Tariff, that American manufactures might be built up, as they said, and this country be placed in an independent position beside the nations of the earth. It was urged that if the tariff were placed sufficiently high on all the articles we got from Europe, that they would be manufactured in this country, and thus give employment to thousands upon thousands of American mechanics. The adea was a splendid one to win party in a mass, and especially that greater number who give these nutters no very . close attention, but take much for !

There is no doubt but the old Whig see that the people-and they alone pay all the taxes and tariff, and that it one poor man to pay to a rich manborrowing without interest and nothing to show for the principal. However, the delusion was effectual and became popular.

What has been the result, pow, after years of protective tariffs-all sorts of tariffe? Look over the land. How great has been the increase in manufacturers among the masses—the very once whom it was eard it would materially aid? We fail to see that the number of manufactories have mereased in this country over a reasonable natural increase, corresponding with emigration and population. We find a num ber of overgrown, oppressive monopo lies in line, with their vast capital and vast operative mill and mine slavery; but if the people are benefitted by this, we are too imbecile to observe it. The people are no better off, because, for up of a few unscrupulous monopolies. as heartless and cold blooded as arctic seals. If the tariff meant to build up the material interests of the country, there would be more manufactories and fewer monopolies. If the tariff was a blessing to the mechanic arts. we would find more manufacturers who labor, for a song a day and have nothing to ent

But a protective tariff so high as to exclude foreign articles and to throw this people upon their own resources was never intended. The New Eng. land manufacturer would sooner have free trade than such a tariff, But he meither too high, nor too low. Under its operations the great capital of the East can coin money yearly, and the poor man or the artisan of small means is striken down and driven out He is tenfold worse off than if there were no tariff at all, and free trade the policy; for then he might be able to purchase for so much less the necessaries which he cannot now afford to make himself to sell, and yet he is compelled to pay the difference into the pockets of the overgrown tariff protested capitalists of the East.

When will the people learn the doe trine that taxes should not be laid on the many "unequally nor for the aggrandizement of the few. Until they learn that tariffs come from their pockets and go into those of the r worst enemies, we need never hope to have them see that they are deluded, imposed upon robbed. The present tariff is the rich man's tariff. It who made by rich men for the benefit of rich mon. For every pound of woolen cloths imported under it, the poor laborer pava twice the tariff which the rich man pays; for the duty on woolen goods is per pound, and the poor man's coarse cloths weigh 100 per cent, more than the rich man's fine goods! It is robbery from beginning to end, and needs no examples. The whole thing is a monstrous fraud, a traud which no other people have ever borne or ever will.

Better that we had free trade, cheap goods, and easy and prosperous times, Mr. Poor Man, than pay tythes, taxes and tariffs into the pockets of these or ganized highway robbers! What say

A Comparison.

A few days ago in the United States Senate, one Justin S. Morrill, who hails from "deown in Varmeount," undertook to tickle a certain class of fools who are now cursing this coun try by making a silly attack upon the Democracy. These are its achievements. You cannot look at the history of the Democratic party and charge it with the violations of the fundamental law of the land of which your party have been guilty. During the period of sixty years that the Democratic party administered the affairs of this gove inment it never arrested one-no, not even the humblest American citizen, and tried him on a criminal accusation, except by due process of law. No man's house was ever invaded, except under legal authority; during the whole sixty years that the Democratic party administered the government; not one public press was ever suppressed. This party of yesterday, when they cam into power, found a constitution under which the people of this country had lived for seventy-five or eighty years in the enjoyment of all the blossngs of civil and constitutional liberty: they found this constitution, made

the great and wise men who laid the foundations of your government deep in the principles of constitutional liberty, and without any experience in so great a work they set to work patching it up, until now, if the great men who made it could rise from the dead, or descend from heaven, they would scarcely recognize the instrument they had made.

-The Huntingdon Globe, one of the radical organs of that county, compliments the white Firemen of Harribburg, who, creditably to themselves, left the inaugural procession because negroes were placed in front of them, after this manner:

"During the war these obnoxious niggers were at the front; whilst the firemen of Harrisburg were skulking at home or 'rusticating' over in Canada, to the disgust of all loyal people and the delight of rebels. From all we can learn the niggers presented a "far wore creditable appearance than "the over-sensitive gentlemen who "run with the machine."
