

The Democratic Watchman.

BELLEFONTE, PA.

Friday Morning, January 28, 1870.

Card.

he undersigned, for favors received on Tuesday last, beg leave to return their thanks to the following gentlemen: To Messrs. Robert C. Owen, J. Wesley Gephart, Wilson Young, James Curtin and E. H. Kinlos...

THINGS ABOUT TOWN & COUNTY.

The coal miners about Philipsburg are still on a strike. Scarlet fever has made its appearance in this place. Typhoid fever is raging about Pine Grove. The first load of ice this season, we seen hauled up street on a wheelbarrow, on Tuesday.

Greeley's Lecture.—Well, Horace Greeley has come and gone. Our people have looked upon the face of the Tribune man—the bairn of Jefferson Davis. They saw a tall, fair-faced old man of sixty-five or thereabouts, with beard and hair as white as snow...

That is a good joke now going the rounds about a certain prominent citizen, living in the suburbs of town, who discovered a Medical Spring among the rocks and hills near his residence and used the water in preference to any other. It has transpired that certain other parties, discovering this preference of the party of the first part, determined to place a small bag of Epsom salts in the spring, which gave the water its peculiar medical taste.

questions except in the election of officers or when the yeas and nays are called. The secretary read a letter from G. W. C. T. S. B. Chase, stating his reasons for not being able to meet with us. Brother J. H. McMinn, R. C. Nelson and J. L. Butler, were a committee on business and reported the following, viz: Resolved, That for the good of the order, such instructions and suggestions be given to the members of the order that may tend to reinvigorate the weak lodges and encourage all to renewed energy in promoting the general interests of our order...

singing, while he pursued that chain of discoveries which culminated in his conviction of the truth of the Copernican system. To be the father of the greatest philosopher that ever lived, is no small boast for a fiddler. It should of itself make the old reproach obsolete. RAILROADS AND RAIN.—It has long been a desideratum of science to predict the weather, and as yet, except in a very general way, it is a desideratum to do so. But if what is said in regard to the meteorological effect of the Pacific Railroad be true, we may not only soon be able to predict storms, but also to enforce the existence of rain within given limits.

WASHING MACHINES. D OY'S WASHING MACHINE. LATESTLY MUCH IMPROVED—AND THE NEW UNIVERSAL CLOTHES WRINGER. Improved with ROWELL'S PATENT DOOR CO. WHEELS and the PATENT STAR, are now available. Those who have used them give testimony as follows: "We like our machine much; could not be persuaded to be without it, and with the aid of Duty, we feel we are masters of the position."
