KEYSTONE POTATO DIGGER

Patented September 27, 1870

This great labor saving Invention is now complete and is the only Potato Digger and Packer in the United States. It is cheap, neat, strong and durable; does its work better than is usually done by the old process. The merits of this machine are given in the following words, viz: First it will clear the row of stones, tops and weeds, second, it will lift the potato clean from the row, third, it will separate the earth from them, fourth, it will pile them along the row nicely cleaned. We also may state that you can assort the large potatoes from the small ones, at the same time. All this labor can be performed by hand Power, once going along the row, and as fast as you can drive a team along the row, thus rendering Potato digging
