

# Democratic Watchman

Bellefonte, Pa., August 23, 1889.

## Farm Notes.

In driving horses on the road let them drink at every opportunity; a dozen times a day in summer is not too often.

A judicious allowance of bran or oats at this season of the year will increase the milk supply and fortify the cow's system for larger production during the fall and winter.

The freshest eggs are the heaviest, and when placed in water will sink to the bottom at once; older eggs will sink partially to the bottom, while stale eggs float on top.

Don't forget to keep your poultry-house well whitewashed. It can be done once a month and benefit your stock. If you respect the health of your flocks their houses must be kept clean.

It will be noticed that Texas stockmen find profit in feeding boiled cottonseed. If English farmers can afford to feed cottonseed meal American farmers can afford to feed the entire seed.

One great secret of the development of a heifer for the dairy consists in putting off the return of progeny for a period of not less than four months, and better six months, after the birth of the first calf.

Charcoal is a wonderfully useful article to feed to poultry. It acts on the blood and tones it up, the results of which are readily noticeable in the bright color of the comb and wattles and activity displayed by the chicken itself.

There is no article of food of which the consumption is so regular as that of eggs. They are as indispensable as bread and meat, and it matters not whether the prices are high or low the demand still continues and yearly increases.

Ensilage and the silo are not beyond the ability of the small farmer. The supposition that ensilage can only be used on large farms is erroneous. It costs very little to construct a silo, while ensilage is more easily grown and prepared than corn-fodder.

All insects are not enemies. Some of them are the best friends the farmers have. Spiders, wasps, dragon flies and other insects prey upon insects that are injurious. There are also other numerous parasites that greatly assist in destroying insects.

Trees for the garden should be well cut back. For the field they should be cut back in a manner to allow of horse cultivation when the trees begin to bear. Cutting back the peach the first two years make the tree very stocky and compact.

The strawberry can be grown on small plots that do not afford room for a tree, and as it produces fruit in one year from the time the plants are set out, it is one of the most valuable fruits for the family that can be grown.

Once in a full year should be considered often enough for a milker to bear a calf, and for younger cows once in from fourteen to sixteen months. Older cows that may be considered fully developed and of established habit, cows 8 or 10 years of age, may, if their calves are of great value, be put to rapid breeding.

**Farm and Home says:** "To keep cows from kicking when being milked let a strap be buckled around the cow just forward of the hip bones and allowed to come nearly to the floor. In this let the milker put his foot as it hangs, drawing it tight over the kicker's back, and she will usually keep her feet on the floor."

Corn and sorghum grown for silage should be planted thin enough to mature ears and produce a crop of seed and not harvested until nearly ripe. The silage will thus contain a considerable amount of grain and be of more value to feed with cotton-seed and with cotton-seed meal, and produce a better quality of beef.

The principal want of a young chick is plenty of warmth. The brooder should never be below 90 degrees in temperature. Whenever the chicks crowd, dead ones are found in the brooder in the morning. It is a sure indication that there has been a lack of warmth. Chicks never crowd each other with comfortable brooders.

A "Lamb Club" has been formed by a party of Tennessee sheep men for the purpose of breeding and selling spring lambs to the best advantage, says the *Bural New Yorker*. The lambs are sent to New York market, great pains being taken to secure the best possible specimens as well as to ship them in good condition. By combining and concentrating their business the members of the club are enabled to secure lowest rates of transportation and to present lambs of uniform grade.

It will often be found that cows will prefer to drink stagnant water, even almost filthy, from pools, rather than to take that fresh from the well. It is not the cleanliness of the well water that the cows object to, but its coldness. Leave the well water in tubs or troughs exposed to the air a few hours in summer. The cows will drink more freely, give more milk and do better every way for it. Filthy water they should not be allowed to drink, at least while giving milk.

The largest, best-flavored and earliest vegetables should be retained for seed if the seed is to be home-grown. The smooth, solid tomatoes, and the earliest, should be laid aside for seed before using any portion of the crop.

After observations among hundreds of silos, and hearing the testimony of owners, John Gould concludes that there is no necessity of ever husking corn to be fed upon the farm, when the silo, with its later ideas of filling, preserves the grain so perfectly and gives such satisfactory results.

In reply to an inquiry for a remedy for a cow leaking milk, the *New England Farmer* gives this: Blue vitriol (sulphate of copper), two ounces, in six ounces of water, thoroughly mixed and applied to the end of the teat two or three times, or till the difficulty is removed. The efficacy of the solution is doubtless due to its astringency.

It requires only a few red raspberry plants to afford a large supply of fruit, and the plants quickly become very thick in the rows. The wood of the old canes are cut out during the winter and the new canes topped off in the spring. To have large, well-flavored raspberries use plenty of manure around the canes, and once a year give them an application of wood ashes. An occasional picking of fruit may be made until frost, as the canes bear for a much longer period than the regular period of harvesting the fruit. The better the cultivation and richer the soil the larger the fruit.

**APPLE WATER.**—Quite a variety of drinks can be made from the jelly of apples, or it can be converted into a plain drink. The following is from Drs. Fortherrill and Wood's book of receipts: Cut up one pound of apples into quarters without paring; bake them until soft; put them in a pitcher; with half a pound of brown sugar, pour two quarts of boiling water over them. Let it get cold; pulp the apples, juice and all, through a colander, and bottle for use. If the mixture is too much of a jelly, add more boiling water. On this foundation you can vary the drinks. A piece of bread, toasted very brown, and added to the apples before boiling is poured on, makes a nutritious drink. Or you can boil half a pound of either barley or rice to a pulp, and add to the apple water.

**BOILED COCOANUT CUSTARD.**—To one pound of grated cocconut allow a quart of sweet milk, and six ounces of white sugar; beat very light the yolks of six eggs, stir them gradually into the milk, alternately with the cocconut and sugar; put the mixture into a pitcher, set it in a vessel of boiling water, place it on hot coals and simmer it till it is very smooth and thick, stirring it all the time. As soon as it comes to a hard boil take it off the fire, pour it into a large bowl, and set it to cool; when cold, put it into custard cups. Beat to a stiff froth the whites of the eggs that were left, and pile it on the custards; sprinkle over each a little powdered sugar.

**APPLE AND RICE.**—Peel and core apples, being careful not to break them, put them in a deep baking dish, and pour over them a syrup made of a pound of sugar to a pint of water boiled till thick; put a small piece of lemon peel inside the apple and bake slowly until done, but not broken. Take out the lemon peel and put any kind of jelly or jam inside the apples, and between them put little heaps of well-cooked rice. Serve either hot or cold.

**BLACKBERRY CORDIAL FOR MEDICAL PURPOSES.**—Express the juice from blackberries, and to every pint of it add three quarters of a pound of white sugar. To every two quarts of the juice add a quarter of an ounce each of mace, allspice, cinnamon and cloves slightly bruised. Boil these ingredients to a rich heavy syrup, and add when cold an equal quantity of French brandy. Bottle and cork tight.

**OPPRESSIVE SCIENCE.**—Colonel Kaw (of Kansas)—"It's gittin' so that science, once the friend of man, is fast becoming his bitter enemy. Here some son-of-a-gun of a scientist has discovered that chloride of lime is a better antidote for snake bites than whisky." Colonel Kent (of Kentucky)—"What of it?" Colonel Kaw (of Kansas)—"What of it? Why, man alive, you'd know what of it if you lived in a State where you have to get your whisky on a prescription!" —*Puck.*

**AN AWAKENING OF CONSCIENCE.**—First Tramp—"Look, Tom, this is the minister's house; the window's open and all the folks are at church, an' they don't keep no dogs; so that we couldn't have a softer snay?"

Second Tramp (with suppressed emotion)—"The minister's house, do you say? Ah, Bill, I have been a bold, bad man, but I have never yet robbed the clergy. They are a hard workin' lot an' their pay is small; besides, some of the tenderest recollections of an innocent boyhood is coupled with my Sunday-school, (wipes away a tear) But, Bill, you haven't got the same feeling in the matter I has, an' if yer've made up yer mind to enter the place why I'll stay outside an' keep watch, an' I'll give a whistle if I see anyone comin'!" —*Life.*

**Business Notices.**

**Children Cry for Pitcher's Castoria.**  
When baby was sick, we gave her Castoria.  
When she was a Child, she cried for Castoria.  
When she became a Miss, she clung to Castoria.  
When she had Children, she gave them Castoria. 34 14 2y

**RUPPERT CURE GUARANTEED.** Ease at once. No operation or business delay. Thousands cured. For circular, Dr. J. B. Mayer, 831 Arch street, Philadelphia. At Keystone Hotel, Reading, Pa., second Saturday of each month. 34 14 2y

**TO CONSUMPTIVES.**—The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease Consumption, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for Consumption, Asthma, Cough, Bronchitis and all throat and lung Maladies. He hopes all sufferers will try his Remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing will please address, Rev. Edward A. Wilson, Williamsburg Kings County, New York. 33-48-1y.

# Wines and Liquors.

SCHMIDT BUILDING.

THE LARGEST AND MOST COMPLETE WINE, LIQUOR AND CIGAR HOUSE IN THE UNITED STATES.

ESTABLISHED 1836.

DISTILLER AND JOBBER

FINE WHISKIES.

IMPORTER OF G. W. SCHMIDT, WINES, LIQUORS AND CIGARS, No. 95 and 97 Fifth Avenue, PITTSBURGH, PA.

All orders received by mail or otherwise will receive prompt attention. 34 11 1y

**To Farmers.**

**FARMERS' SUPPLIES.**  
—SEEDS.—  
Farmers are advised that we have a stock of Choice Reclaimed Western Clover Seed; the only seed of this quality in Centre county. We invite a comparison of seeds under magnifying glasses. Choice and Prime Clover Timothy Seed. Choice and Prime Timothy Seed. Alfalfa, Alsike Clover Seed, Blue Grass, Orchard Grass, Red Top, Lawn Grass, Broom Corn Seed, Hungarian Millet, and all other grass seeds sold at a seed store.

**Machinery.**  
JENKINS & LINGLE,  
[Successors to W. P. Duncan & Co.]  
BELLEFONTE, PA.  
IRON FOUNDERS  
and  
MACHINISTS.  
Manufacturers of the  
VULCAN CUSHIONED POWER HAMMER  
BELLEFONTE TURBINE  
WATER WHEEL,  
STEAM ENGINES, SAW MILLS,  
FLOURING MILLS,  
ROLLING MILLS, &c., &c.  
Works near P. R. R. Depot. 11 50 1y

**Financial.**  
TRUST FUNDS TO LOAN  
—ON FIRST-CLASS MORTGAGES—  
For a Term of Years,  
AT LOW RATE OF INTEREST,  
IN AMOUNTS FROM  
\$2,500 TO \$50,000!  
—A. BROCKERTHOFF—  
REAL ESTATE BROKER,  
31 10 1y BELLEFONTE, PA.

**Miscellaneous.**  
A GOOD RECORD.  
THE OLDEST HARNESS HOUSE  
IN TOWN.  
Over 18 years in the same spot—no change of firm—no fires—no going back, but continued and steady progress. This is an advanced age. People demand more for their money than ever before. We are up to the times with the largest and best assortment of everything that is to be found in a FIRST-CLASS HARNESS STORE, and we defy competition, either in quality, quantity or price. NO SELLING OUT! FOR THE WANT OF TRADE. NO COMPANY—NO PARTNERS—NO ONE TO DIVIDE PROFITS WITH BUT MY CUSTOMERS. I am better prepared, this year, to give you more for your money than ever before. Last year and this year have found me at times not able to fill my orders. The above facts are worth considering, for they are evidence of merit and fair dealing. There is nothing so successful  
—AS SUCCESS—  
and this is what hurts some. See my large stock of Single and Double Harness, Whips, Tweed Dusters, Horse Sheets, Collars and Sweat Pads, Riding Saddles, Leathern Saddles, very low. Fly-Nets from \$3 a pair and upwards. Axes, Coach and Harness Oils, Saddlery Hardware and Harness Leather SOLD AT THE LOWEST PRICES to the trade. Harnessmakers in the country will find it to their advantage to get my prices before purchasing hardware elsewhere. I am better prepared this year than ever to fill orders promptly.  
JAS. SCHOFIELD,  
Spring street, Bellefonte, Pa.

**WILHELM'S**  
IMPROVED  
MILK-COOLING CAN  
And System of Gathering Cream.  
Over 75,000 Cans in active use in the State of Ohio, and over 200,000 in the United States. One setting of milk in all that is needed to prove the merit of the Can. Usual size of Can 3 gals. Write for descriptive circular and testimonials. I also make a specialty of building Creameries and all the best improved machinery and apparatus.  
JOHN WILHELM,  
Wooster, Ohio, Jan. 18, 1887.  
The Milk Cans I bought of you give perfect satisfaction. We can utilize the milk just as much better in the most unfavorable season of the year by the use of your cans as at any other time of the year. I have four Cans. Have used them 3 years, and would not be without them. My customers say that the Cans are always the same in quality. The Cans are to be credited for the uniformity of the butter. 34 21m3 C. L. OSGOOD.

**Fine Job Printing.**  
FINE JOB PRINTING  
—A SPECIALTY—  
WATCHMAN OFFICE.  
There is no style of work, from the cheapest "dogger" to the finest  
—BOOK-WORK—  
but you can get done in the most satisfactory manner, and at  
Prices consistent with the class of work  
by calling or communicating with this office.

# Carriages.

BARGAINS! o BARGAINS!  
—In—  
o CARRIAGES, BUGGIES, o  
AND  
SPRING WAGONS,  
at the old Carriage stand of  
—McQUISTION & CO.—

NO. 19 SMITH STREET,  
adjoining the freight depot.

We have on hand and for sale the best assortment of Carriages, Buggies, and Spring Wagons we have ever had. We have Dexter, Brewster, Elliptic, and Thomas Coil Springs, with Piano and Wittechapel bodies, and can give you a choice of the different patterns of wheels. Our work is the best made in this section, made by good workmen and of good material. We claim to be the only party manufacturing in town who ever served an apprenticeship to the business. Along with that we have had forty years' experience in the business, which certainly should give us the advantage over inexperienced parties.

In price we defy competition, as we have no Pedlars, Clerks or Rents to pay. We pay cash for all our goods, thereby securing them at the lowest figures and discounts. We are accustomed to make or manufactured work from other places; so give us a call for Sarrises, Phaetons, Buggies, Spring Wagons, Buckboards, or anything else in our line, and we will accommodate you.

We are prepared to do all kinds of  
—REPAIRING—  
on short notice. Painting, Trimming, Woodwork and Smithing. We guarantee all work to be just as represented, so give us a call before purchasing elsewhere. Don't miss the place—  
—S. A. McQUISTION & CO.—
