

Bellefonte, Pa., March 21, 1890.

TOO MUCH FOR OLD BRUIN.

Twas out in the gloaming, A maiden sat combing her beautiful hair,
When heated with roaming,
All panting and foaming,
There came up and hugged her—a great griz

zly bear.

It did not affright her,
The bear did not bite her;
elay back and murmured, still tighter my dear!
This broke up old bruin,
He left off his wooin',
Sneaked backed to the mountains and hid for

a year.

The Boy of the Day.

Obstructions That Lie Across His Path to a Frade-The Girls Are Crowding Him Out of Employment.

The boy of to-day, while he has many advantages over the boy of twenty or thirty years ago, has also many stumbling-blocks in his path. His case is one calling for consideration, and is not to be dismissed with a wave of the hand. "What shall I do?" is a query in the minds of 50,000 boys in the United States to-day who have not decided on a trade or profession.

The great obstacle in the path of the boy of to-day who starts out to seek an opening to learn a trade is the rules made and rigidly enforced by the men who should have their welfare nearest at heart-the Knights of Labor and the trade unions. These bodies, every member of which had a better show than the boy of to-day has, have by-laws which forbid an employer from taking more than one apprentice to several journeymen. Shops which, fifteen years ago, had fifteen boys on the way towards learning a trade and being able to earn good wages, now run only three or five. While such action on the part of these bodies prevents a "duke," or half-finished apprentice, from coming in competition with them in the matter of wages, it cannot fail to prove a pernicious one in the end. The boy who has no chance to learn a trade can not become a producer. He must be supported by those who work. The chances are against his becoming a tax-payer. They are in favor of his becoming a bad While a few journeymen profit by this rule to the extent of a few dollars the community and country at large are heavy losers. There are plenty of cases in Detroit and every other city where fathers, bound by this rule and believing it to be a good thing, are making loafers of their sons who are barred out.

The question is not, therefore, "How much can I earn, and how long must I serve as a machinist, cabinetmaker, stove-moulder, etc?" but rather, "How can I manage to secure a place as an

The second obstruction did not exist, either, fifteen years ago. If any one had predicted twenty years ago that the time would come when the girls of the country would usurp the places rightfully belonging to the boys, and there-by become a menace to their future, he ld have been called crazy. And vet that time is here and from Maine to Texas the girl has crowded the boy out, and is keeping him out. It began first with the stores. There was a time when every clerk behind a dry-goods counter was a boy or man, To-day, in the North more especially, the boy and the man have been cast adrift and the girl has come in to fill their places at half the wages. It is so in post offices, railroad headquarters and many other places, and it is still spreading. Even the grocery clerk and the hardware salesman was losing their places. It is a move

But the question goes further than that of the salary-of the saving of a few dollars. Every girl takes a place which should by right go to some boy. The business of this country or any other country can never be turned over to the female sex to be conducted, and yet what is to be the result if this movement is continued: "Fifty thousmovement is continued: "Fifty thous-and females will have held places and drawn wages and kept 50,000 boys from learning the evention and learning its learning the avocation and learning it so thoroughly that they can conduct it.

They will not only have deprived the boys of their wages meanwhile, but will have a took the orator's the course and passed without recognition. Next morning, in perusing the newspaper, he read Webster's reply to Hayne. At once he took the orator's hve made idlers and vagabonds of a good | note and tore it to pieces, so prodigious share of them. There will be just that was the effect of the splended phillippic much loss of business energy and talent Another friend once found Webster

salary.

I do not say that a girl or woman has no moral right to go out and earn her own living, but any one who will inivestigate the matter will find that such action on their part is most commonly not a matter of stern necessity one time out of ten. They want better clothes than what the family income gives them -they are through with school or hateit -they desire to throw off parental restraint and the monotony of home life. Also, in nine cases out of ten, if you will Also, in nine cases out of ten, it you will follow them up you will find the girl working for three or four years, or just long to have kept a boy from learning had dislocated his jaw. The young sura wife. She has simply earned herself some fine clothes, got through with her work as easily as possible, and every body but herself has been the loser.— M Quad in Detroit Free Press.

Harrison as a Poker Player.

Chicago Herald. A well-known United States Senator says that Ben Harrison is a rather clever poker player. "When Harrison was in the Senate," he says, "he used to play poker, and, like most cold-blooded men, he plays a pretty good game. He doesn't bluff much, and it is seldom he takes little circle in which he lives better desperate chances, but he has excellent and happier; each of us is bound to see judgment, and when he has a good hand that out of that circle the widest good he will stay as long as anybody. I don't know whether he plays now that in his mind the thought that out of

Oil of Peppermint

When it is said that nine-tenths of the oil of peppermint used in the world comes from one little county in New York State, it seems quite improbable, yet such is the fact, and, at that, the best qulaity only. But a short distance east of Rhochester is located Lyons, the county seat of Wayne County, whose name comes from the revolutionary hero, General Anthony Wayne, who, by his bustle, earned the soubriquet of "Mad Anthony." It is a small county, but is one of the leading in point of agriculture in the great Empire State. One branch of agriculture is that of raising pepper-

Two crops of peppermint are raised on a field. The sets, or part of old plants, are planted in April and May, in rows two feet apart. They grow to the height of two feet. If the leaf is pressed the odor is very profuse. The gathering season is in August, and the plants are cut close to the roots with a scythe. They are cured by wilting in the sun like hay for about twelve hours, the oil being pressed more freely then than if From the roots the next year's

The oil is distilled in an easy way. The still is a vat with heavy staves hooped with iron, and is about 4 feet high and 6 in diameter. The mint is packed into the still by treading. When the vat is full it is covered airtight, and steam is forced in by a pipe in the bottom of the vat. The steam volatilizes the oil of the mint, and its vapor is condensed in a worm, as in ordinary stills. The mixed oil and waseparated by specific gravity. Some farmers distil their own oil, but there are 100 regular distillers in the county. They toll the crop the same as a miller does the farmer's grain for grinding. The waste from the vats is fed to cattle.

-Pittsburg Dispatch. A Reminiscence.

A reminiscence of Daniel Webster, never told before in print, was related the other day by a contemporary of the Massachusetts statesman. It illustrates was losing their places.

The description of reconomy's sake and there can be no question but what it has been a great saving. The average girl at \$5 per week will sell just as many goods as the week will sell just as many goods as the week will sell just as many goods as the his note for \$5,000. A miserly old Whightout the richest man in Alexandria—

the richest man in Alexandria—

through a colenger, return the saucepan, add one half cup of sugar; cook again until it is melted; pour into a dish to cool; when nearly ready to use beat with a fork the whites of two eggs to the richest man in Alexandria—

the richest man in Alexandr just as good a stenographer or typewrit-er at half or two-thirds of a man's admired Webster and trusted him. The note matured. The senator could not pay. The miser dunned Webster persistently, but without effect. Mr. Webster made a positive appointment to six teaspoonfuls of flour and three of meet him one morning, but was not to be found either at his home or in the senate.

The note-holder was walking when he saw Webster approaching with head to the country, saying nothing of the reading law with five and ten-dollar bills as book-marks in the volume before him.

The Bill Was Paid. Dr. McLine, of the College of Physicans and Surgeons, carries beneath his professional dignity an inexhautible store of wit, humor and anecdote. In a parlor, one evening this week, the conversation chanced to fall up Dr. Williard Parker, and he told the following geon promptly put the member in place. "What is your bill, doctor?' asked

the patient. "'Fifty dollars, sir.' "Great heavens!' And the man pened his mouth so wide as to dislocate jaw a second time. Dr. Parker

again put things to rights.
What did you say your bill was? again asked the patient. " 'I said it was fifty dollars; now it is one hundred.'

"The man grumbled, but paid it."-New York Sun.

-Each of us is bound to make the he is in the White House, but when he a single household may flow influences was in the Senate I have played with that shall stimulate the whole commonwealth and the whole civilized world.

Small Hints.

Lamp burners that have become dim and sticky can be renovated by boiling them in strong soda water, using a tin tomato can for this purpose; then scour the burners with sapolio and they will be as good as new.

To clean knives: Cut a small potato, dip it in brickdust and rub them. Grease may be removed from silk by applying magnesia to the wrong side.

New iron should be gradually heated at first; it will not be so likely to crack. The French method of administering castor oil to children is to pour the oil into a pan over a moderate fire, break an egg into it and stir up; when it is done flavor with a little salt or sugar or current jelly.

Dipping fish in scalding water will cause the scales to come off very easily, but if the fish are to be salted down they must on no account be scalded. You may pour over them vinegar with the same resulted. Sail ash will soak fresh much quicker in sour milk than in water.

"The Care and Feeding of Infants" is the title of a most valuable little book issued by the proprietor of Mellin's Food, the Doliber-Goodale Co. 41 Central Wharf, Boston Mass. It will be of great assistance to every mother in feeding her child. Send for a copy it will be mailed free to any address.

LIVER WITH ONIONS AND BACON .-Put about half a tablespoon of sweet drippings or lard in a hot frying-pan; cut into small pieces a large onion; slice your liver very thin and put into the boiling grease; let it brown well, turn it, put the onion on top of the pieces, sprinkle well with flour, and over all plentifully sprinkle salt and pepper; cover with a pan and let it ok until quite brown; mix the onion and flour into it with a knife when brown, and let it fry until the onions are done; pour a cupful of hot water into the pan, cover, and set it on the back of the stove; fry in another pan a few pieces of bacon; when brown add to the liver and dish.

-The only guaranteed cure for all blood taints and humors, eruptions, pimples, blotches, scalp diseases and scrofulous sores and swellings, is Dr. Pierce's Golden Medical Discovery. You get a cure or money paid for it promptly returned.

LEMON TEA CAKES .- Rub one ounce of butter into one pound of flour; add two ounces of castorsugar, one teaspoonful of soda, and one of cream of tartar, the juice and grated rind of a large lemon, and a well-beaten egg. Mix into a moderately stiff dough with milk and bake in patty pans or very shallow tins. Split and buttered while hot.

-"Don't stand on the order of going"—but go straight to the next corner and buy a bottle of Dr. Bull's Cough Syrup, if you want to cure your cold.

-A bar of iron worth \$5 is worth \$10 after it is made into horse shoes; collected in a receiver, and is d by specific gravity. Some into pen-knife blades, it is worth \$3,

> -Farmers and Horsemen read this! -I find Salvation Oil a most excellent liniment among horses, and I take pleasure in endorsing it as a certain remedy for scratches. JAMES THOMAS, Franklin Road, near Baltimore.

WHIPPED PRUNES .- Wash and soak two cupfuls of prunes; boil them in plenty of water until very soft; mash very stiff; whip lightly but thoroughly into the prunes and serve.

CORN BATTER BREAD .- Sift together cornmeal with a little salt. Whip up four eggs and add to the flour, with enough milk to make a thin batter Bake in small pans in a quick oven.

-"Do you want the earth ?" inquired the haughty hotel clerk of a meekly complaining guest." "No, was the reply, "you can keep it a while longer till I ask you for it."- Washington Post.
