SPRING MEDICINE

Seems more than ever a necessity this season, after the mild, unhealthful winter, and the unexpected prevalence of influenza, pneumonia, typhoid fever, etc., leaving nearly everybody weak, exhausted and tired. Hood's Sarsaparilla is just the medicine to overcome that tired feeling, to build up your whole system, purify your blood, impart a good appetite and promote healthy digestion. Try it this spring. I have been taking Hood's Sarsaparilla for four or five years as a spring medicine, and feel perfectly satisfied with its effects. My sister, too, has taken it for rheumatism, and has been much benefited by it. Mrs. E. C. Erickson, 22 Union Avenue, Worcester, Mass.

HEALTH IMPROVED

"For a long time I suffered with palpitation of the heart and chills. I have now taken three bottles of Hood's Sarsaparilla and am almost entirely cured. My general health and appetite are better than they have been for years. I have given Hood's Sarsaparilla to my children for catarrh and scrofula, and the help they have derived from it is wonderful!" Mrs. EDWARD MARY STRONBERG, Pa.

The Language of the Flag.

To "strike a flag" is to lower the national colors in token of submission. Flags are used as the symbol of rank and command, the officers using them being called flag officers. Such flags are square, to distinguish them from other banners. A "flag of truce" is a white flag displayed to an enemy to indicate a desire for a parley or consultation. The white flag is a sign of peace. After a battle parties from both sides often go out to the field to rescue the wounded or bury the dead, under the protection of a white flag. The red flag is a sign of defiance, and is often used by revolutionists. In our service it is a mark of danger, and shows a vessel to be receiving or discharging her powder. The black flag is a sign of piracy. The yellow flag shows a vessel to be at quarantine, or is the sign of a contagious disease. A flag at half mast means mourning. Fishing and other vessels with a flag at half mast announce the loss or death of some of the crew. Dipping the flag is lowering it slightly and then hoisting it again to salute a vessel or fort. If the President of the United States goes afloat, the American flag is carried in the bows of his barge or hoisted at the main of the vessel on board of which he is.

A Four-Footed Railroad "Hand."

A valuable railroad "hand," who in spite of his services, probably receives no salary, is thus described in the Scientific American. He resides at Sealed, Col., and belongs to an engineer of the Denver and Rio Grande Railroads. Napoleon has been engaged for the past two years in helping his master (an locomotive number 56). His apprenticeship began at the age of six years, and he can now go into the roundhouse where twenty-eight engines are kept, and, in the absence of his master and the fireman, defend it against all intruders. He rides on the fireman's side of the cab, with both his front paws and his exact nature of the affair could be learned. Race War in Alabama. BIRMINGHAM, Ala., April 7.—At Trondale, six miles from this city, Town Marshal England and Deputy Sheriff Fontenberry attempted to arrest a crowd of negroes on a charge of larceny. The negroes opened fire on the officers, shooting Marshal England at the first fire. Deputy Fontenberry took refuge behind a tree and shot three negroes dead. The other took to the woods and escaped. The shooting created the wildest excitement in the town on account of the political troubles there, and half the town were under arms before the exact nature of the affair could be learned. A Large Estate. A broad land in this which we live, dotted so thickly with thrifty cities, towns and villages! Amid them all, with ever-increasing popularity and helpfulness is Dr. Pierce's Golden Medical Discovery, giving hope and cheer where there is disease and despair. Wherever there is humanity there is suffering, and here is the best field for this great American Remedy. Consumption (which is lung-scurful), yields to it, if employed in the early stages of the disease, yield to it! If you want the best known remedy for all diseases of the blood, ask for Dr. Pierce's Golden Medical Discovery, and take no other. It is guaranteed to cure in all cases of consumption for which it is recommended, or money refunded. A Chinese dime museum has a curiosity in the shape of a woman who hasn't said anything but "yes" and "no" for three years. Some members of Congress, while in their seats, or on the floor, never say anything but "yes" and "no" during their entire term, but they are not considered enough of a curiosity for dime museum "franks."

Management of the Blackberry.

At a meeting of Indiana horticulturists Mr. N. Ohmer gave the following as the result of long and extensive experience: When the bushes have grown to about three feet high, and early in the season, the laterals are clipped back not to exceed eight or ten inches. This will reduce the berries in number, but they will be so much larger as to bring more money in market. This remark applies to the Snyder, and Mr. Ohmer said there was more money in that berry than in any other he had ever tried. Every bud where the bush is cut back will produce a large cluster of berries. Without this treatment you will have only small ones. Both cutting back and frequent-cultivation between the rows are necessary. The bushes should not be allowed to grow more than three feet high, and be cut back early in the season. The rows are eight feet apart, and the bushes four feet in the rows. The canes are set up through the berries." He has a sharp five blade tool, which cuts all the sprouts out of the way and gives clean ground.

Struck by a Falling Star.

One of the most remarkable accidents recorded in history occurred near Marlborough House, London, England, recently. At about 5 o'clock p. m., a gentleman, a well known public official, was passing from St. Mark to Pall Mall, when he suddenly received a violent blow on his right shoulder which caused him great pain and to stumble forward as he walked. He noted a crackling noise at the time, but had not the slightest idea of the cause of the shock he had experienced. Reaching home he discovered and submitted to a critical examination, but nothing was discovered which in the last accounts for the great pain in both shoulder and arm. A servant was sent to brush the gentleman's coat next morning and discovered a scorching streak about 11 inches long and an inch wide, extending across the shoulder of the coat and down the back. The mysterious shock was explained; he had been struck by a meteor or falling star.—St. Louis Republic.

ASK YOUR FRIENDS ABOUT IT.

Your distressing cough can be cured. We know it because Kemp's Balsam within the past few years has cured so many coughs and colds in this community. Its remarkable sale has been won entirely by its genuine merit. Ask some friend who has used it what he thinks of Kemp's Balsam. There is no medicine so pure, none so effective. Large bottles 50c and \$1 at all druggists. —Baritone at the piano sings, "Kiss me, darling, in the spring." And the fair accompanist murmurs softly, "What's the matter with doing it now?" AN IMPERATIVE NECESSITY.—What pure air is to an unhealthy locality. What spring cleaning is to a neat house-keeper, so is Hood's Sarsaparilla to every body, at this season of the year. The body needs to be thoroughly renovated, the blood purified and vitalized, the germs of disease destroyed. Scrofula, Salt Rheum, and all other blood disorders are cured by Hood's Sarsaparilla, the most popular and successful spring medicine.

Killed by a Pet Cow.

A Young Woman Frightfully Torn by Sharp Horns.

The Philadelphia Record of Tuesday says: Mrs. Lizzie Shoemaker, the young and attractive wife of J. H. Shoemaker, who resided near Melrose Station, on the Bound Brook Railroad, met with a Jersey cow, for which she had formed a remarkable attachment. Mrs. Shoemaker, who has been married only a short time, found one of her principal amusements in the care and training of animal pets. The cow was her special favorite, but she was also a lover of dogs, horses and chickens. The cow was allowed to roam about the field near the house during the day, and at about 5 o'clock on Sunday evening Mrs. Shoemaker called to the animal to come to where she was, in the rear of the dwelling. She began to caress it in an affectionate manner, as she had often done before, when suddenly the cow, in a playful way, broke from her, and instantly made a plunge striking her in the abdomen with one of its horns, and making two ugly wounds, fully fifteen inches long. The second plunge of the animal proved the most serious, as the horn penetrated an artery, from which the blood flowed freely. The lady bent forward as best she could, and so compressed the wound, that partially stopping the free running of the blood, but in two hours she expired. Her husband ran to the scene attracted by his wife's screams, and it was with difficulty that he could drive the cow away. The husband has been confined to the house since the affair, and is prostrated over his wife's awful death.
