

Bellefonte, Pa. December 5, 1890.

Farm Notes.

Make your preparations for the window garder. Ladies will find much pleasure this winter with the indoor plants.

A tree near a well will send down the root to the vater. Some trees, such

A demand always exists for herbs, not only in the vegetable markert but also

Clean water and wholesome food a majority of cases disease results from filth, unwholesome food, or neglect.

The importance of beginning the winter with a clean cellar cannot well be overlooked. The health of the fam ily depends on how the cellar is kept.

Whether it is cheaper to grind the food, or allow the animals to grind it with their teeth, depends upon the age of the animal and the kind of food.

Now that the frost has put in an appearance, there will soon be an accumulation of dry grass and other rub-

Linseed meal comes in a cooked state. It is safe and reliable medicine and a nuritious food. It will soon make a rough hide smooth, and promote the thrift of the animal.

Old bones that cannot be conveniof putting them to a good use.

Soils that are rich are benefited by lime as well as soils that are poor. In the former the lime renders the plant ally effects a thorough cure of laziness. food soluble. In the latter the lime is itself an addition to the soil as plant

ed the difficulty, but it will be found in wrists.

Experiments showed that when hogs are given a proportion of ashes and bone meal they have larger bone, grow faster, and produce greater weight in proportion to food allowed. Ashes alassist digestion and promote

health. Just as soon as a variety of potatoes appear to "run out," which is often the case, a new variety should take its place; but as some varieties do better in some sections than in others, no variety should be used extensively until it has been thoroughly tested on the

are desired the hens must be given a mess of grain in addition to that picked passages and heals the inflamed mem up, and in every severe weather must brane, giving relief at once. Price 50c.

be fed morning and night. Hog cholera seems to be a disease that cannot be defined, so many diseases of hogs being designated as cholera. To guard against it avoid bringing hogs into the herd from elsewhere, give a variety of food, and do not inbreed the stock.

Freshly slacked lime applied on the asparagus beds, and another application made early in the spring, is one of the best remedies for the asparagus heetle. When the plants are up, next spring, dust lime over them also. The grub is easily killed by lime in its caustic state.

It is estimated that the surface of an acre of ground, one toot deep, contains about 4000 pounds of phosphoric acid, 8000 pounds of potash and 16,000 pounds of nitrogen. Much of this, however, may be beyond the reach of plants by not being in an available

Skimmed milk is now being recommended for colts. Something depends on how it is given. Nothing is so injurious as a drink of ice-cold milk to a young animal in the winter. To give milk to calves, colts or pigs is no doubt an advantage, but it must be fresh, and warmed before the animals are allowed to drink it.

It is possible to grow double the quantity of wheat in this country that is now produced. The time will come when a smaller area of land will be used and larger crops grown per acre. As the farm becomes restricted in area more appropriate fertilizers will be app'ied. Farmers are rapidly learning the fact that different kinds of crops require different foods, and the saving expense by the use of special crop fer-tilizers will be another source of gain.

It requires skill to be a successful farmer. A knowledge of the facts relating to the manner of the feeding of stock, supplying the proper fertilizers to plants, and the most suitable breeds and varieties for profit will more than compensate for a deficiency of capital. Knowledge is power in farming as well as in everything else, and the educated farmer has a great advantage over one who holds to old usages and relies sole ly upon his experience of the past, though experience is also an excellent

teacher. Make manure in the cold season. Keep it under cover. Add everything in Hsrat,88 Warren Street, New York. 35 19 to the heap that will conduce to its value but always aim to insure that all material will be in a fine condition when the time arrives for applying it to the soil. To properly and thoroughly prepare manure for use requires some care and attention. Every portion of the manure should be rotted, as the better the condition of the manure the more immediate its effects when it is given to the plants as food. There is always plenty of work in winter that can be profitably applied to the manure that the patient is a moderate drinker or an alcholic who have taken the Golden Specific in their coffee without their knowledge, and to day believe they quit drinking of their own free will. No harmful effect results from its administration. Cures guaranteed. Send for circular and full particulars. Address in confidence, GOLDEN SPECIFIC CO., 26-32 ly 185 Race Street, Cincinati, O.

The Cost of Going Into Society.

If you have a daughter to introduce into society, and you belong to the upper ten, make up your mind that it will cost you at least, for costumes, enter-tainments and so forth, \$20,000. That the game is not worth the candle need not enter into your calculations at all. And it is to be doubted if the girl launched on society at a cost of \$20,000 makes a better friend, wife or mother than the girl who, in the humbler ranks of life, gets three new dresses for her first season, and whose coming out party as the ailanthus, impart their odor to the water.

Herb growing should be profitable.

A demand always exists for herbs, not where they dance the Virginia reel with enjoyment, and don't go home until

morning. For my own part, I think it is a lovely and a blessed thing for the excessivekeep stock in a healthy condition. In ly rich to spend money in a lavish and even ridiculous way. It all helps trade.

-Mattie Sheridan in New York Press.

-Only a scrap of paper but it saved her life. She was going home with her breast racked with a distressing cough, aggravated by bending over a sewing machine all day, when she pick-ed up part of a letter. It read: "Dear J. I am delighted to inform you that my cough is entirely gone, and I feel better than for years. I was in despair when I last wrote you, but Mary recommended Hasson's Syrup of Tar, and bish. All such refuse should be raked no into piles and burnt.

I felt better in twenty-four hours, and was soon well." One 25 cent bottle cured her. For sale by C. M. Parrish, Bellefonte.

Tramps in Iowa are taken care of and so well attended that most of them are inclined to shun the State. Those that can work and won't work, and perently broken, leather scraps, dead ani- that can work and won't work, and permals, etc., should be buried near large sist in begging, are clapped into jail, grapevines, which is an excellent mode and put at hard labor. While there they are denied tobacco, liquor, and sporting or illustrated papers, and are allowed no amusement whatever. Two or three weeks of this treatment gener-

PAD ECZEMA ON LIMB FROM KNEE TO FOOT A MASS OF RUN-NING SORES. CURED BY CUTICURA

REMEDIES. TOTAL COST \$1.75. I have been afflicted with a sore limb, which the doctors called eczema. My limb from the knee to the foot was one mass of running sores. The dociors bandage it every day for a week, and every time the bandage was removed a large scab would come off, and the blood pour down. I got one bottle of Cuticura Resolvent one box Cuticura, and one cake Cuticura Soap, and they cured me. I told a lady who was similarly afflicted to use it, and it cured her also. I gratefully acknowledge that it was Cuticura that cured me.

MRS. KATE BEARD,
Orange Valley, N. J.

TNHERITED SCROFULA.

My nose was of a most pronounced crimson hue, the result of inherited scrofula. I suffered untellable mortification daily, and tried enough remedies to stock a drug store without deriving the slightest benefit. I tried the Cuticura Remedies, and the most flattering result followed their use. I am all right now, and I cannot find encomiums enough to bestow upon what I know to be the greatest and grandest gifts given by science to man. Please accept the most sincere and grateful thanks of one who has suffered.

C. STEVENS O'MAHOEY, 8 E. 67th St., New York, N. Y.
