

Democratic Watchman

Bellefonte, Pa., May 8, 1891.

A BOY'S PROMISE. The school was out, and down the street...

Who listened to another. And mildly said, half sad: "I can't—I promised mother."

A shout went up, a ringing shout, Of boisterous derision; But not one moment left in doubt...

"Go where you please, do what you will," Who calmly told the other; "But I shall keep my word, still; I can't—I promised mother."

Ab! who could doubt the future course Of one who thus had spoken? Could faith like this be broken?

God's blessing on that steadfast will, Unyielding to another, That bears all jeers and laughter still, Because he promised mother!

"In A Minute." Just Stop and Consider What May Happen in Sixty Seconds.

"Don't fret. I'll be there in a minute." But my friend, a minute means a good deal, notwithstanding you affect to hold it of no consequence.

In a minute, over all the world, about eighty new born infants have each raised a wail of protest, as if against thrusting existence upon them; while as many more human beings, weary with the struggle of life, have opened their eyes to utter their last sigh.

In a minute the lowest sound your ear can catch has been made by 600 vibrations, while the highest tone reached you after making 2,228,000 vibrations.

In a minute, night and day, by the official reports, the United States collects \$639 and spends \$461. The interest on the public debt was \$96 a minute last year, or just exactly equal to the amount of silver mined in that time.

The telephone is used 136 times. Of tobacco 925 pounds are raised and part of it has been used in making 6,673 cigars, and some more of it has gone up in the smoke of 2,292 cigarettes.

But I am afraid that you will forget that we are talking about a minute, sixty seconds of time. No? Well, then every minute 600 pounds of wool grow in this country, and we have to dig sixty-one tons of anthracite coal and 200 tons of bituminous coal, and of steel-iron we turn out twelve tons, and of pig-iron three tons.

Each minute, night and day, by the official reports, the United States collects \$639 and spends \$461. The interest on the public debt was \$96 a minute last year, or just exactly equal to the amount of silver mined in that time.

Boy Against Jaguar.

"Milkop Dan" Proves Himself To Be a Courageous Lad.

Night had fallen over the great mountain wall of the Andes, and the 1,000 miles between it and the coast were wrapped in a gloom which the rising moon was still too feeble to penetrate.

Any one would have needed good eyes to make out that the shadowy mass on the brink of a small stream, which runs down one of the higher valleys, was a huge iron cage with a man inside of it.

Was he a prisoner? Hardly, for he was unbound and armed with a rifle; but, on the other hand, if he was a free agent it was odd that he should be lingering at a spot which every one else carefully avoided after dark as the chosen haunt of all the wild beasts in the neighborhood.

And, stranger still, this strange watcher was a mere lad, barely twenty years old, whose local reputation was that of a "milkop"—a fellow with no spirit whatever.

Daniel Martin was the junior of the staff of a mine that had just been started at the head of the valley. With the other employes he was very unpopular, partly because he was the only "Americano" among them (for all the rest were natives), and partly because, instead of spending his evenings like them, he was always poring over scientific books or studying the construction and working of the mining machinery.

No one ventured actually to molest him, for, quiet as he was, there was a look about him that warned the most reckless not to go too far. But they all looked down upon him as a milkop, and whenever he passed they whispered spiteful jokes to each other, which he was luckily not so silly as to mind.

WAITING THE ATTACK. Now, in this wild and thinly peopled district, the best prey were so troublesome that the owner of the mine, a rich citizen of Lima, had offered a pretty high reward for every jaguar (panther) killed, but to kill them was no easy matter. The wary beasts seemed to avoid by instinct all traps and pitfalls, and would not touch poisoned meat. If a band of hunters went forth against them they were sure to where to be seen, while any man who ventured through the bush alone was apt to see more of them than he liked.

This was the perilous mission that had brought the brave American lad to the dangerous spot by night. He had set a trap for the jaguars and baited it with himself, and now he was watching to see what would come of it.

He had not long to wait. The savage brute had already scented him, and ere long a rustling and crackling was heard among the bushes, and the brightening moon showed him three long, gaunt bodies creeping steadily toward the cage in which he stood ready, rifle in hand.

There was a complete jaguar father and mother and son—the younger being almost full grown, and armed with teeth and claws well nigh as formidable as those of his terrible sire and dam. With their huge flat heads lowered, their great white fangs gleaming in the moonlight, and their striped, sinewy bodies gliding noiselessly over the ground with a fierce, elastic life in every movement, they were indeed a grim band, the sight of which might well have made even an old hunter look grave.

IN THE CASE. But Dan Martin had faced in his time the "painter" and grizzly bear of the far west, and he was not the lad to be scared by any wild beast upon earth. Coolly waiting till the fearful cub group came near enough to make his aim sure, he leveled his piece at the foremost beast, which happened to be the cub, and let fly.

His aim was true, and down fell the cub stone dead, but the fall was followed by a frightful yell as the female jaguar, maddened by the loss of her young, flew raging at one side of Dan's sheltering cage, while the male, either by accident or design, dashed at the other.

The attack on both sides at once, whether intended or not, brought the gallant lad within a hair's breadth of destruction, for the bars were wide enough apart to let his grim foes thrust their paws between so far as almost to touch him on either side, while he was standing as erect as he could betwixt the clutching talons (for he knew that one inch to right or left would cost him his life), relaxed with all his possible speed.

But all at once the she jaguar, mad with rage at being unable to reach the slayer of her young, rushed around to the other side of the cage and leaped up on the bars just as the male beast made a dash at them likewise.

Dan fired again and wounded her mortally, but it was too late. The weight of the two huge bodies, suddenly thrown both at once upon the same spot overbalanced the cage. It tottered on the edge of the cliff, turned over and fell with a loud splash right down into the stream, carrying Martin along with it.

Happily for our hero (who would otherwise have been drowned in this novel sentry box) the shock of the fall snapped the worn and rusty "catch" of the bolt, and Dan, bruised and dizzy as he was, was able to push back the door of the cage and scramble out into the shallow water, which was a little more than waist deep.

But just as he was about to clamber up on the bank a furious splashing in the stream drew his attention to the third jaguar, which, badly hurt by a blow from the corner of the water close by, was struggling in the water close beside him. Come what might it must not escape. Like lightning Dan whipped out his long hunting knife and buried it in the monster's throat—a blow that needed no repetition.

Just at that moment the other officers of the mine, startled by the firing, came rushing up to the spot in a body to see what was the matter, and stood in blank amazement at the sight of the dead monster and the "young milkop" by whom they had been slain.

"Senor Don Daniel," at length said the chief of the mining staff, who had always been hardest of all upon the young hero, "you are a brave man, and I for one will never say another word against you."—New York Dispatch.

Bulb Culture.

The centre of bulb culture in Holland, says Gardeners' Magazine, is still at Haarlem, as it has been during two centuries and a half.

Hyacinths are especially in favor just now, and ground suitable for their cultivation has sold for as much as \$13,500 an acre, as against about \$1,000 given for land of other kinds.

The expense of cultivation is placed at about \$300 an acre for hyacinths and \$100 for tulips; and it is noted that artificial manures are never used. Narcissus is also grown in vast quantities near Haarlem, chiefly for exportation to England.

Formerly the export trade in cut flowers was enormous, one Haarlem firm having exported in a single season 10,000 cases; but an agreement was last year entered into by a majority of the Dutch florists to abandon the sale of cut flowers as competing with the interests of purchasers of bulbs. Attempts have been made to extract the perfume of the hyacinth, but only with moderate success, especially from the commercial point of view.

Vegetables as Food. Vegetarians are frequently told that their diet is insufficient to maintain a proper amount of strength for hard labor, but let us ask where the ox gets his strength? He is a strict vegetarian.

By examining a table of food values it will be found that meat is not really the most nourishing food. All the grain preparations are three times as nourishing as meat, and the same is true of peas and beans. A pound of beans contains more of the albuminous elements than a pound of beefsteak.

Besides that it has additionally fifty per cent. of the carbonaceous elements for the production of heat and strength, whereas meat is almost entirely deficient in carbonaceous elements. From a careful computation of the flesh foods and the vegetable foods, respectively, as given in a standard table of values, it is found that flesh foods are only two-thirds as nourishing as vegetable foods, while they require one-third longer for digestion. So, really then, vegetable foods are not only the most nourishing but the most easily digested and therefore of the greatest value.—Dr. J. H. Kellogg.

Saddlery.

SCHOFIELD'S NEW HARNES HOUSE.

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAYS OF Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made.

This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 10x74 feet and the store 26x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (3) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assertion that none of them can say, as we can say, "NO HOUSE DISCHARGED THEIR HANDS, THEY SOON FOUND WORK WITH US." THIS IS THE WHOLE STORY.

The following are kept constantly on hand. 50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards. LARGE STOCK OF HEAVY HARNESS per set \$25.00 and upwards. HORSE COLLARS from \$1.50 to \$5.00 each, over \$10.00 worth of HARNES OILS and AXLE GREASE.

\$400 worth of Fly Nets sold cheap. Big worth of whips from 15c to \$8.00 each. Horse Brushes, Curly Combs. CHAMBERS, RIBBING SADDLES, LAMBS HEAD LADDLES. Harness Soap, Knee Dusters, at low prices. Harness Leather as low as 25c per pound. We keep everything to be found in a FIRST CLASS HARNESS STORE—no change of price, over 20 years in the same room. No two shops in the same town to catch trade—NO SELLING LEATHER for the want of trade or price. Four harness-makers at steady work this winter. This is our idea of protection to labor, when other houses discharged their hands, they soon found work with us.

JAS. SCHOFIELD, Spring street, Bellefonte, Pa.

Farmer's Supplies. FARMERS' SUPPLIES AT ROCK BOTTOM PRICES.

GREAT REDUCTION IN PRICES. Reduced from 40 to 30 cents—other repairs reduced accordingly.

ROLAND CHILLED PLOWS are the best level landside plow on earth; prices reduced.

POTATO PLANTER. The Aspenwalk is the most complete potato planter ever made. Farmers who have them plant their own crops and realize from \$25.00 to \$50.00 per year from their investment. It is ingeniously planned for the use of an Aspenwalk Planter.

HARROWS—The Farmer's Friend Horse Shoe Spring Tooth Harrow, seventeen teeth, one side of which can be used as a single cultivator.

THE HENCH AND STEEL KING SPRING TOOTH HARROW. Allen's Celebrated Cultivators, Garden Tools and Seed Drills, which were practically exhibited at the Granger's Picnic.

CORN PLANTERS AND CORN SHELLERS, latest improved. HAY RAKES and HAY TEEDERS at our prices. Farmers who harvest fifteen or more tons of corn cannot afford to do without one of our Hay Rakes, which are built with a fork outside of each wheel, the same tetter can be operated by one or two horses.

CONKLIN WAGONS. CHAMPION Wagons, are superior in neat build, fine finish and durability.

BUGGIES, NOBBY ROAD CARTS, CARRIAGES, AND PLATFORM SPRING WAGONS. Churns—"The Boss," Bent Wood, Oval and Union Churns. Our sale of churns is constantly increasing.

WHEELBARROWS. Our steel and wood wheelbarrows are adapted to all kinds of work of which we have a large assortment at very low prices.

A large stock of FARM AND GARDEN SEEDS. Flower Pots and Urns.

FERTILIZERS. Agricultural Salt, our Champion Twenty-five Dollar Fertilizer, Lister's best make; Buffalo Bone Phosphate for use on barley, corn, potatoes, and wheat, as well as Mapes Potato Fertilizer, all of which have the highest reputation for producing an honest return for the money invested.

Our large trade justifies us in buying our supplies in large quantities, hence we buy at the lowest prices, which enables us to sell at the lowest prices; therefore, it will be to the interest of every farmer in Central Pennsylvania to examine our stock before purchasing.

We take great pleasure in entertaining farmers. It does not cost anything to examine the articles we have on exhibition. McCALMONT & CO., Hale Building, Bellefonte, Pa. Wholesale and Retail Business Managers. 35 4 1 y

Gas Fitting. W.M. GALBRAITH, Plumber and Gas and Steam Fitter, Bellefonte, Pa. Pays particular attention to heating buildings, steam, copper smithing, reboiling gas fixtures, &c.

Colleges.

THE PENNSYLVANIA STATE COLLEGE.

Located in one of the most beautiful and Healthful Spots in the Allegheny Region; Undenominational; Open to Both Sexes; Tuition Free; Board and other Expenses very low. New Buildings and Equipment.

LEADING DEPARTMENTS OF STUDY. 1. AGRICULTURE (Two Courses), and AGRICULTURAL CHEMISTRY, with constant illustrations on the Farm and in the Laboratory. 2. BOTANY and HORTICULTURE; the theoretical and practical. Students taught original study with the microscope.

3. CHEMISTRY, with an unusually full and thorough course in the Laboratory. 4. CIVIL ENGINEERING; ELECTRICAL ENGINEERING; MECHANICAL ENGINEERING. These courses are accompanied with very extensive practical exercises in the Field, the Shop and the Laboratory.

5. HISTORY; Ancient and Modern, with original investigation. 6. INDUSTRIAL ART AND DESIGN. 7. LADIES' COURSE IN LITERATURE AND SCIENCE; Two years. Ample facilities for music, vocal and instrumental.

8. LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course. 9. MATHEMATICS AND ASTRONOMY; pure and applied.

10. MECHANICAL ARTS; combining shop work with study; three years' course; new building and equipment. 11. MENTAL, MORAL AND POLITICAL SCIENCE; Constitutional Law and History, Political Economy, &c. 12. MILITARY SCIENCE; instruction theoretical and practical, including each arm of the service.

13. PREPARATORY DEPARTMENT; two years carefully graded and thorough. Winter term opens January 7th, 1891; Spring term, April 8th, 1891; Commencement week, June 28th to July 2nd. For Catalogue or other information, address GEO. W. ATHERTON, LL.D., President, 27 25 State College, Centre county, Pa.

Coal and Wood. EDWARD K. RHODES, Shipping and Commission Merchant, DEALER IN: ANTHRACITE, BITUMINOUS & WOODLAND COAL. GRAIN, CORN EARS, SHELLED CORN, OATS, STRAW and BALED HAY, KINDLING WOOD.

Respectfully solicits the patronage of his friends and the public, at HIS COAL YARD near the Passenger Station. Telephone 712. 36 18

Hardware. HARDWARE AND STOVES. JAS. HARRIS & CO'S. LOWER PRICES THAN EVER.

NOTICE—Thanking our friends for their liberal patronage, we desire to express our determination to merit a continuance of the same, by a low scale of PRICES IN HARDWARE. We buy largely for cash, and doing our own work, can afford to sell cheaper and give our friends the benefit, which we will always make it a point to do.

A FIRST-CLASS TIN SHOP. CONNECTED WITH OUR STORE. ALL OTHER THINGS DESIRABLE IN HARDWARE FOR THE WANTS AND USE OF THE PEOPLE WITH PRICES MARKED SO THAT ALL CAN SEE. AT LOWEST PRICES. For Everybody.

JAS. HARRIS & CO., BELLEFONTE, PA.

Machinery. JENKINS & LINGLE, [Successors to W. P. Duncan & Co.] BELLEFONTE, PA. IRON FOUNDERS and MACHINISTS. Manufacturers of the VULCAN CUSHIONED POWER HAMMER BELLEFONTE TURBINE WATER WHEEL, STEAM ENGINES, SAW MILLS, FLOURING MILLS, ROLLING MILLS, &c., &c. Works near P. R. R. Depot. 11 60 1 y
