

Medicinal.

VERY IMPORTANT.

The importance of taking a good Spring Medicine cannot be overestimated. The changing weather affects the human system in such a way that it is now in great need of and especially susceptible to the benefits to be derived from a reliable preparation like Hood's Sarsaparilla. To make your blood pure, give you a good appetite, and make you strong, this spring you should take Hood's Sarsaparilla the best

SPRING MEDICINE.

"Hood's Sarsaparilla is invaluable as a spring medicine; it invigorates the whole system and tones up the stomach, and since I became acquainted with Hood's Sarsaparilla I always take several bottles in the spring, and in occasion requires, the rest of the year." L. U. GILMAN, Aurelia, Iowa.

GOOD HEALTH AND ENERGY.

"We have been using Hood's Sarsaparilla in the family for several years. I do wish that every family had it in the house, as it would make things better, i. e., every one would have more confidence and energy after taking a few bottles. Good health and energy improve business, poor health the reverse; if all took Hood's Sarsaparilla there would be no dull times. I will always use it and advise others to."

Mrs. H. D. FERRELL, Rondout, New York.

KENDALL'S SPAVIN CURE.

THE MOST SUCCESSFUL REMEDY ever discovered, as it is certain in its effects and does not blister. Read proof below.

KENDALL'S SPAVIN CURE.

The type is invariably larger and the displays of advertisements and headings of news articles commonly coarser. The ink is not always spread evenly over the page. Nevertheless the business man opens the paper to the page devoted to village news and reads every line there. After that he not infrequently reads the village advertisements and gives a brief look at the editorials. The city man used to live in the village where that paper was printed, and he recognizes the names of people there as old acquaintances and commonly old friends. The village paper comes like a letter from home to the city man who was once a villager.

How to Wash the Hair.

For washing the hair, says the Ladies' Home Journal, a small piece of kitchen soap put in very hot water until a thick hot sud is achieved is best. Use this first water to cut out the dust, and after that wash the soapy water out of it with thoroughly with clear water that should be very hot, holding your head over a basin and letting it be poured from a small pitcher. Dry the hair first with towels, and then do not braid it while it is damp, but have it either fanned until it is dry, or if possible, stay in your room and let it hang loose until it is free from all moisture. Do not be induced, under any circumstances, to use a fine comb upon it; it is death and destruction to the hair and not good for the scalp. If there are obstinate spots of dandruff, rub in a little vaseline and brush that place well the next morning.

GENUINE HUNGARIAN MEDICINAL T-O-K-A-Y W-I-N-E-S

(SWEET AND DRY) Direct from the Grower, ERN. STEIN, ERAD-BENYE, TOKAY, HUNGARY. ERN. STEIN'S TOKAY WINES have a wide European reputation as fine, agreeable wines of delightful bouquet, ripe and rich color, and as appetizing and strengthening tonic; they are peculiarly suitable for luncheon wines, for ladies, and for medicinal use.

SUB AGENTS WANTED.

Write for sample case containing one dozen full pint bottles selected of four different qualities of these Tokay wines at \$10.

Bellefonte, Pa., June 12, 1891.

California Prices in 1849.

During the winter of 1849-50, the cost of living was extreme. As the season was a very wet one, the roads and trails were full of mud-holes, in which supply wagons were stuck and mules and oxen mired. Wagons and animals were unloaded several times a day to extricate them from the mud, and in one instance at least fourteen days were spent on the road from Stockton, fifty miles away. Flour reached a dollar a pound, rice the same, pork and bacon a dollar and sixty cents a pound, saleratus sixteen dollars a pound, and spermaceti candles a dollar each. An ounce of gold was the price of a pick or shovel, and almost anything needed, except fresh beef, commanded a proportionate price. That all miners did not get rich is accounted for in the statement that it took a fair claim to pay expenses. The short duration of a placer claim, the loss of time in finding another, and the too general restlessness, led the story of many failures to reach a fortune by even those who were the most lucky. Too often it was due to extravagance, gambling, or the guzzling of brandy or whisky, at eight dollars a bottle. But, drunk or sober, one was obliged to pay two ounces for a pair of pantaloons, a hundred dollars for a pair of long-legged boots, and four dollars expressage for a letter.

They Appreciate the County Paper.

The New York Sun says: It would do the hearts of country editors good to ride up town on the elevated cars in the afternoon of Friday and Saturday on any week in the year. On these two days a great many business men give only a hasty glance at the evening papers and then immediately draw from a pocket a copy of a paper that is marked in contrast to the city paper, so far as type and general appearance goes.

Whipping Horses.

Professor Wagner, in writing upon the subject of whipping horses, says: "Many think they are doing finely and are proud of their success in horse training by means of severe whipping, or otherwise arousing or stimulating the passions, and through necessity crushing the will through which the resistance is prompted. No mistake can be greater than this, and there is nothing that so fully shows the ability, judgment, and care of the real horseman as the care displayed in winning instead of repelling the action of his mind. Although it may be necessary to use the whip sometimes it should always be applied judiciously, and great care should be taken not to arouse the passions or excite the obstinacy. The legitimate and proper use of the whip is calculated to operate upon the sense of fear almost entirely. The affectionate and better nature must be appealed to in training children, but if only the passions are excited the object is depraving and injurious. This is a vital principle, and can be disregarded in the management of sensitive and courageous horses only at the risk of spoiling them. I have known many horses of a naturally good character to be spoiled by whipping once, and one horse made vicious by being struck with a whip once while standing in his stall."

Wire Finer Than Hair.

We are at work just now on some pretty small wire, says a manufacturer in an interview. It is 1-500th of an inch in diameter—finer than the hair on your head, a great deal. Ordinary fine wire is drawn through steel plates, but that wouldn't do for this work, because if the hole wore away ever so little, it would make the wire larger, and that would spoil the job. Instead, it is drawn through what is practically a hole in a diamond, to which there is of course no wear. These diamond plates are made by a woman in New York, who has a monopoly of the art in this country. The wire is then run through machinery, which winds it spirally with a layer of silk thread that is .0015 of an inch in thickness—even finer than the wire you see. This wire is used in making the receiving instruments of ocean cables, the galvanometers used in testing cables and measuring insulation of covered wires.

Crop Outlook.

Reports on the crops in western New York and then others tier of counties in Pennsylvania, shows that while last year late frosts and too much rain did much damage, the same results have been experienced this year by reasons of May frosts and a long spell of dry weather in the early part of the month. The farmers in this vicinity claim the oat crop looks as well as in other years. The chickens at present are that agricultural products in general will be short and possibly below the average in quality, and that prices will be above the average.

ANNIVERSARY.

The Pennsylvania State Normal School at Millersville is the oldest in the State. One of its principals, under whom it won almost a national reputation, was Dr. J. P. WICKERSHAM of Lancaster, Pa. In the summer of 1866, Dr. WICKERSHAM resigned the principalship of the Normal School to become Superintendent of Public Instruction of Pennsylvania. The twenty-fifth anniversary of his promotion will be celebrated by a general Re-union of his former students, at Millersville, at the time of the annual Commencement, July 1st, and 2nd, 1891. The sudden death of Dr. WICKERSHAM in the midst of the preparations for this celebration, will entirely change the character of the occasion, hundreds of the old students expect to be present to do honor to their former teacher, and the Alumni Exercises on the evening of July 1st will be Memorial Services.

A LAUGHABLE MISTAKE.

Little Lou's primary geography was made up of questions and answers. In the lesson on Brazil they ran thus: "For what are the wild cattle on the plains caught?" Ans.—"For their tall, hides and horns." "For what are the ladies of Brazil noted?" Ans.—"For their beauty." Lou learned readily by rote, and recited correctly when the questions were put in the order of the book. Sometimes the teacher "skipped about" and Lou made funny mistakes. "What are the ladies of Brazil noted for?" asked the teacher. "For their tall, hides and horns," answered Lou.—Youth's Companion.

A LEARNED LITTLE MAID.

The story is running the rounds, of a little maid who recently graduated from the infant class in the Sunday school, to pass examination being her ability to say the ten commandments. A while afterwards a friend of the family happened in and asked the young lady if she could say the ten commandments. "No, I can't say the ten commandments," said Miss Rose with a toss of her head. "I've nothing to do with the ten commandments now; I'm out of the infant class."—Jewish Messenger.

THE REASON.

Teacher.—Why does Great Britain support royalty? Pupil.—Because royalty cannot support itself.

Was it Hypnotism.

As I was coming down town a few days ago I met Grizzly in the car, and as we were old chummies and had not seen each other for a few weeks, I greeted him very cordially.

"What's new in the papers this morning?" I inquired, to set the conversational ball comfortably rolling.

"Paper is one of the best," said I. "I hear they have discovered gold in California."

I looked at him a little curiously, and before I could make up my mind what he was driving at, he said:

"No use talking, Gen. Taylor is our man for president."

"Then I looked at him rather closely to see if he showed any symptoms of insanity in his eye; but he was in appearance as calm and rational as ever."

"Now that we've got the Mexican war closed up in good shape and the Oregon question settled, it is time we—"

"Say!" said I, breaking in upon him, "Are you crazy or just giving me a whirl of some kind?"

He looked at me blankly for half a minute, and then a smile began to speak over his face.

"I beg your pardon, old man. I believe I am getting a trifle off. You see, I got one of those forty-year-old dictionaries for subscribing to a newspaper that is if not earthly good itself, and it just keeps my mind working about forty years behind the times. Let's get off and take something."

Whipping Horses.

Professor Wagner, in writing upon the subject of whipping horses, says: "Many think they are doing finely and are proud of their success in horse training by means of severe whipping, or otherwise arousing or stimulating the passions, and through necessity crushing the will through which the resistance is prompted. No mistake can be greater than this, and there is nothing that so fully shows the ability, judgment, and care of the real horseman as the care displayed in winning instead of repelling the action of his mind. Although it may be necessary to use the whip sometimes it should always be applied judiciously, and great care should be taken not to arouse the passions or excite the obstinacy. The legitimate and proper use of the whip is calculated to operate upon the sense of fear almost entirely. The affectionate and better nature must be appealed to in training children, but if only the passions are excited the object is depraving and injurious. This is a vital principle, and can be disregarded in the management of sensitive and courageous horses only at the risk of spoiling them. I have known many horses of a naturally good character to be spoiled by whipping once, and one horse made vicious by being struck with a whip once while standing in his stall."

The World's Barley Supply.

The total production of the barley in the world is estimated at 825,000,000 bushels. Of this amount Europe produces from 630,000,000 to 650,000,000, valued at \$800,000,000. The following will show the average production for each country of the world: Algeria, 60,500,000 bushels; Austria Hungary, 88,500,000; Belgium, 3,655,700; Bulgaria, 15,125,000; Canada, 19,250,000; Denmark, 20,650,000; Egypt, 27,500,000; British Isles, 90,750,000; France, 49,500,000; Germany, 93,500,000; Holland, 4,400,000; Norway and Sweden, 22,000,000; Roumania, 19,250,000; Russia, 129,250,000; Spain, 77,000,000; Turkey, 13,750,000, and the United States, 57,750,000 bushels.

What Eastern Farmers Want.

MONTPELIER, Vt., June 6.—The Vermont Farmers' League is discussing ways and means of promoting the growth of the State. Hon. George T. Rowell, of New York, President of the National Farmers' League, was the chief speaker of the Convention. He said he was not an advocate of a farmer's political party, but he wanted ballot reform and the cessation of class legislation. The farmers of the East, he said, were utterly opposed to the free coinage of silver and to the Sub-treasury scheme promulgated at Cincinnati.

A Child Scared to Death.

WILKESBARRE, Pa., June 6.—Constables broke into the house of Patrick Duffy, at Scranton, and attempted to sell the household goods for a debt. The Duffys resisted; neighbors came to their rescue; there was great excitement and in the midst of it Duffy's infant child was seized with spasms and died of fright—the doctor says. Duffy will bring suit against the constables.

Medical.

A LIFE OF MISERY

FROM SKIN DISEASE. SUFFERINGS GREAT—USED CUTICURA. INSTANT RELIEF AND SPEEDY CURE.

I was severely afflicted with prurigo, which was not only annoying, but of misery. So after receiving your book, I read it carefully, then decided I would give your remedies a trial. Purchased one set of CUTICURAS. After ten days use I received great relief. I can pronounce the Cuticura Remedies the best skin medicine yet known to me. I would willingly recommend them to all who are afflicted with skin disease. For the one year of misery I suffered with prurigo is beyond my knowledge to express it. A thousand thanks would not pay the Cuticura Remedies the cure they gave me. I can freely say, give the Cuticura Remedies a trial, and I feel satisfied to say you will be happy.

LEWIS A. PRITCHARD, Box 13, Allport, Clearfield Co., Penn.

WORST CASE OF ECZEMA.

I am perfectly cured. My case was one of the worst kind of cases of salt rheum. My limbs were literally covered. In the fall, face was greatly affected with it. I used the Cuticura Remedies directed, and found them to do all you claim for them. I recommend them to all who suffer with skin disease.

FULTON, Otney P. O., 224 Ward, Philadelphia, Pa.
