

Medicinal.

VERY IMPORTANT.

The importance of taking a good Spring Medicine cannot be overestimated. The changing weather affects the human system in such a way that it is now in great need of an especially susceptible to the benefit to be derived from a reliable preparation like Hood's Sarsaparilla.

SPRING MEDICINE.

"Hood's Sarsaparilla is invaluable as a spring medicine; it invigorates the whole system and tones up the stomach, and since I became acquainted with Hood's Sarsaparilla I always take several bottles in the spring, and it occasions, requires, the rest of the year." L. U. GILMAN, Aurelia, Iowa.

GOOD HEALTH AND ENERGY.

"We have been using Hood's Sarsaparilla in the family for several years. I do wish that every family had it in the house, as it would make them better, i. e., every one would have more confidence and energy after taking a few bottles. Good health and energy improve business, poor health the reverse; if all took Hood's Sarsaparilla there would be no dull times. I will always use it and advise others to do so." Mrs. H. D. FERRIS, Rondout, New York.

HOOD'S SARSAPARILLA.

100 DOSES ONE DOLLAR.

Sold by all druggists. \$1 six for \$5. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass.

KENDALL'S SPAVIN CURE.

THE MOST SUCCESSFUL REMEDY ever discovered, as it is certain in its effects and does not blister. Read proof below.

KENDALL'S SPAVIN CURE.

DR. B. J. KENDALL CO. Gents—I would like to make known to those who are almost persuaded to use Kendall's Spavin Cure the fact that I think it is a most excellent Liniment. I have used it on a Blood Spavin. The horse went on three legs for three years when I commenced to use your Kendall's Spavin Cure. I used ten bottles on the horse and have worked him for three years since and has not been lame.

Yours truly, WM. A. OERL.

GERMANTOWN, N. Y., Nov. 2, 1889.

DR. B. J. KENDALL CO.

Enochsburg Falls, Nt. Gents—In praise of Kendall's Spavin Cure I will say that a year ago I had a valuable young horse become very lame, hock enlarged and swollen. The horseman about here (we have no Veterinary Surgeon here) pronounced his lameness Blood Spavin or Thoroughpin, they all told me there was no cure for it, he became almost useless, and I considered him almost worthless. A friend told me of the merits of your Kendall's Spavin Cure, so I bought a bottle, and I could see very plainly great improvement immediately from its use, and before the bottle was used up I was satisfied that it was doing him a great deal of good. I bought a second bottle and before it was used up my horse was cured and has been in the team doing heavy work all the season since last April showing no more signs of it. I consider your Kendall's Spavin Cure a valuable medicine, and it should be in every stable in the land.

Respectfully yours, EUGENE DEWITT.

Prices \$1 per bottle, or six bottles for \$5. All druggists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors.

DR. B. J. KENDALL CO., Enochsburg Falls, Vermont.

Horse Caprices.

All horses have their fancies, and know perfectly well whom they have to deal with. I am just now exercised with Whitefoot, a mare which I bought young and has lately come out of the hands of a professional breaker with two or three tiresome whims. I do not think that he understood her. When an unbroken filly she was most obedient to me. One day I found her in the drawing-room! To reach it she had walked into the house by the front entrance, and after traveling a corridor some forty feet long had passed through three doorways. There she was, examining furniture, smelling nicknacks and looking out of the window. I expected a scene, since she was as good as wild, having never been made acquainted with saddle or shoe. Yet she behaved like a young lady; not only daintily walking about chairs and tables without damage but exhibiting solitary self-consciousness, especially when she came to look at herself in a mirror. This she did with much interest, getting first one side of her face and then the other into the most appreciable position. It seemed to me that she smiled. When she had gazed her fill, I said, "Now, come out, dear." Then, she put her warm, velvety nose into the hollow of my uplifted hand, and followed me as I walked backward like a courtier, into the paddock. And yet the professional breaker had found her hard to manage. She was evidently too refined for him, and resented his course manners.

Griddle Cakes.

Sour Milk and Flour Makes Delicious Ones.

Some of the most delicious pancakes, or griddle cakes, as they are more properly called, are made of sour milk or buttermilk and wheat flour, with or without the addition of a little shortening.

A new fancy is to bake these cakes in the size of a large pan, butter them lightly while warm, heap them with strawberries slightly crushed and sprinkled with sugar.

Put a second pancake on top of this layer and heap it again with strawberries, sprinkled with sugar, as before. Cut the cake in triangular pieces, like pie, and serve it with whipped cream.

The proper rule for these cakes is a quart of sour milk or buttermilk a quart of flour, a half cup of butter and a heaped teaspoon of soda.

Sift the soda through the flour twice, rub the butter through it, add the milk to make the batter and a level teaspoon of salt. Beat thoroughly.

The milk must be very acid to neutralize the amount of soda given. If it is not quite sour enough, lessen the amount of soda. Some housekeepers prefer to soak the flour and sour milk used for these pancakes together overnight. In that case add in the morning the butter melted and the soda dissolved by itself in cold water.

The Girls Kept Quiet.

A pair of chattering young women met with a deserved rebuke at the exercises of the Brooklyn high school. As the different young men appeared on the platform to deliver their orations these young women kept up a running fire of comment and criticism most annoying to persons near. A gentleman sitting just in front of them looked around several times and frowned sharply at the continued buzzing, without, however, producing any appreciable effect. At length a young speaker came upon the stage in whom the gentleman was evidently deeply interested. If possible, the rear conversation was noisier than at any preceding moment, and nobody in the vicinity regretted when the gentleman squared himself about and said in a voice loud enough to be heard up and down the line.

"The lad speaking is my nephew. I will be obliged if you will allow me to hear him."

The silence that followed could be felt.—New York Times.

Pope Leo XIII is now in his 81 year. His eyes are still remarkably black and brilliant, but aside from this he has every appearance of an infirm old man. His features are thin and sharp, his complexion very pale, and his hand trembles to such an extent that he is no longer able to write unaided. In signing documents he is obliged to hold the right wrist with his left hand, and even then the result is not satisfactory. This convulsive trembling is attributed to a fever from which he suffered several years ago, and from which he has never fully recovered. The Pope has seldom been seen to laugh during all of his long life. He lives plainly, eats alone, according to the established custom of Popes, while he is in Rome, and is troubled with excessive nervousness which often prevent sleep.

ORANGE GINGERBREAD.—Two pounds and a quarter of flour, one pound of molasses, three-quarters of a pound of brown sugar, one ounce of allspice, eight ounces of candied orange peel, three-quarters of a pound of butter, one cupful of milk, yolk of one-egg; mix all of these together well and place in a cool place for five hours; roll it out half an inch thick; Cut into any form you please; brush each piece with beaten yolk of an egg mixed with a little milk; bake in a moderate oven.

It is estimated that a horse can pull twice as much on a macadam road as on a dirt road; three times as much on a road paved with granite blocks as on a macadam road, and two and one-fifth times as much over asphalt as over granite.

An English army officer says that it has rained only twice in twenty-nine years in Aden, Arabia, and then only enough to lay the dust. "The last time it rained was three years ago, after twenty-six years of drought."

Words of Praise.

Oliver Ellsworth, of Connecticut, who was one of the most conspicuous men of the country during the administration of Washington and Adams, seems to have had at the beginning of his career no expectation of becoming eminent. His ambition was limited to gaining a living for himself, his wife and children.

But one day, while arguing a case in court, he heard a stranger say: "Who is this young man? He speaks well."

These words made Ellsworth chief justice of the United States, minister to France and United States senator. He went home after court was adjourned, told his wife what he had heard and began to think of rising at the bar. In his old age, looked up to and respected as a christian statesman, he used to say that these words were the turning point of his life.

But young Ellsworth was not only sensitive to praise, he was an industrious young man, who did many things which had no reference to the law because it was his duty to do them.

When, after graduating at Princeton, and having become a member of the bar at Hartford, he began to practice law, his father gave him an ax and a wood lot.

"Oliver," said the old man, who was a pioneer, "if you wish to get ahead you must work for it."

Oliver settled on the wood lot, some distance from Hartford, cleared the land, split rails to fence it, built a log house and there received the clients who sought him.

When the term of court began he walked down to Hartford, argued his cases and then returned home to his wood lot. On coming into court the spectators observed that the young lawyer's hands were swollen and pierced thorns. That fact did not discredit him with the farmers who served as jurors and witnesses. But after he heard the words of praise, he paid more attention to his books and less to his farm.

Housekeeping Notes.

Ink stains on linen can be taken out if the stain is first washed in strong salt water and let to stand over night.

News tins should be set over the fire with boiling water in them for several hours before food is put into them.

If sponge cake is mixed with cold water it is yellow, but if the water be boiling hot the cake will be white.

In packing bottles or canned fruit for moving slip a rubber band over the body of them.

Hot solution of salt and vinegar brightens copper and tinware, also zinc tubs.

Never put tea leaves on a light-colored carpet; they will surely leave a stain.

Cold tea is excellent for cleaning grained wood.

HE KNEW HIS BUSINESS.—A fond father took home some dainties for the table the other evening. The family gathered at the board and the children were prospecting.

"Go! but they look good!" said Johnny.

"Well," said the mother, "if papa's so good as to bring home such good things to eat, what ought you to do?"

Johnny's eyes glistened as he interpreted a suggestion in his mother's question and he answered energetically "Eat 'em."

ASTRONOMICAL DANGERS.—First Astronomer—I think that long straight line we see in the moon, and which is usually the "railroad," should be given another name. Let's call it the "highway," or the "aqueduct," or something of that sort.

Second Astronomer—But why not continue to call it the "railroad?"

First Astronomer (whispering)—I'm afraid Jay Gould will grab it.

THE ODD CENT.—Grocer—Better you try some of this Limburger. Only twenty-six cents a pound.

Vickwire—Why don't you make the price an even quarter? Why not knock off that extra cent?

Grocer—Vy, my friend, dot extra cent is not makes it sell.

COMES ONLY FROM EXPERIENCE.—"Why did you break off your engagement?"

"I accidentally learned that he was a widower."

"Are you sure?"

"Certain. Why he holds a baby just like a trained nurse."

TEMPEL TO IT.—Mr. Townly—I got a letter from our country cousins today.

Mrs. Townly—Inviting us out to spend the summer, of course.

Mr. Townly—No; stating that they do not intend to run a charity hospital this summer.

Something of a curiosity is an exhibition at Casper, Wyoming. It is an imprint of a monster palm leaf, caused by the leaf falling into clay, afterward petrifying. The rock was found on Salt Creek and indicates that ages ago, when the big coal beds were being formed, Wyoming possessed a tropical climate.

A woman appeared at College Point, Long Island, recently, with a beautiful collection of birds, which she called Australian warblers. She sold them rapidly at \$1 each. The birds turned out to be common English sparrows with their feathers artistically painted.

HE OUGHT TO SEE.—"That's a mighty poor poem you selected for the prize," said a man to an editor who had been conducting a literary contest.

"You think that was a poor one, do you?" replied the editor. "You ought to see the others."

Red stockings are generally colored from matters of aniline which contain large quantities of antimonial products. When perspiring this matter becomes soluble, enters the pores of the skin and produces a violent rash.

The Bible as a Bank.

MERIDEN, Conn., July 21.—Adam Lasoter was arrested to-day for stealing \$200 from Arthur Edwards, a Cromwell farmer. Mrs. Edwards had read that a Bible was the safest place in which to deposit money, and when her husband gave her \$200 to put away last Saturday she put it between the leaves of the family Bible. Lasoter saw the money stowed away, and took it and fled. The money was found tucked away in his stocking.

Watchmaking-Jewelry.

F. C. RICHARD, Jeweler and Optician, —o—

And dealer in CLOCKS, WATCHES, JEWELRY and SILVERWARE.

Special attention given to the Making and Repairing of Watches.

IMPORTANT—If you cannot read this print distinctly by lamp or gaslight in the evening, at a distance of ten inches, your eyesight is failing, no matter what your age, and your eyes need help. Your sight can be improved and preserved if properly corrected. It is a wrong idea that spectacles should be dispensed with as long as possible. If they assist the vision, use them. There is no danger of seeing too well, so long as the print is magnified; it should look natural size, but plain and distinct. Don't fail to call and have your eyes tested by King's New System, and fitted with Combination spectacles. They will correct and preserve the sight. For Sale by F. C. RICHARD, 27 40 42 High St., Ardmore, Bellefonte.

Medical.

A BAD HUMOR CURED.

\$5,000 EXPENDED ON DOCTORS AND MEDICINE WITHOUT AVAIL. GAVE HIMSELF UP TO DIE.

GOOD WIFE SUGGESTS CUTICURA REMEDIES. USES THEM 7 MONTHS, AND IS ENTIRELY CURED.

I was in the war during 1863-64, and took a heavy cold at Gettysburg, from which I never fully recovered. In 1875 I broke out in sores all over my chest and shoulder, which seemed impossible to cure. I tried all the famed doctors and to no avail. I expended some five thousand dollars trying to find a cure, but could not, and finally giving myself up to die, my good wife suggested to me, to try the Cuticura Remedies, which were so extensively advertised and used. I followed her suggestion, and am happy to say by diligent application of your Cuticura Remedies for seven months I was entirely cured after spending five years of time and money without avail, and am a sound and well man to-day. You may refer to me if you wish, as I will tell any one who may call on me my experience. C. L. PEARSON, 1 Fulton Fish Market, New York, April 18, 1890.
