

Medicinal.

LOST 6 CHILDREN BUT SAVED THE SEVENTH.

By the Aid of Hood's Sarsaparilla—Read What Mr. Hilbert of Lawrence, Says.

"Ten years ago our child was born. Having lost six children we were naturally anxious as to the health of this one. What was our dis-

may and sorrow to find that she was apparently doomed to the same fate as the others. She seemed to have little strength as a baby, and did not improve as she grew older. When about 2 1/2 years old she began to have

FAINTING FITS, dropped wherever she happened to be. At these times she would turn black and appeared at the point of death. Doctors told us she was in a very bad way from heart trouble. Nothing that we gave her did any good until in utter desperation, we began giving her Hood's Sarsaparilla. She gradually began to improve, the fainting fits became less and less frequent, and finally ceased entirely. Her general health improved, until at the end of a year, having taken seven bottles, we stopped giving it to her. At this time she was 4 years old, and although anxious lest the troubles might return, we ceased to worry, she seemed so well. She is now 10 years old and is as

HEALTHY AND RUGGED a child as you will find anywhere and has never shown any indication of a return of the heart difficulty. During the past 7 years perhaps she has taken 3 bottles in all, we only giving it to her irregularly at times when she has complained of feeling tired in the spring and early summer. We feel that we owe a great debt to Hood's Sarsaparilla and cannot say too much in favor of it. It has also done me great good for dyspepsia and has cured my wife of sick headache." EDWARD HILBERT, hair dresser, 183 Broadway, Lawrence, Mass.

N. B. Be sure to get HOOD'S SARSAPARILLA, 100 DOSES ONE DOLLAR. Sold by all druggists. \$1; six for \$5. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass. 36 33

KENDALL'S SPAVIN CURE.

THE MOST SUCCESSFUL REMEDY ever discovered, as it is certain in its effects and does not blister. Read proof below.

KENDALL'S SPAVIN CURE.

BELVERNON, Pa., Nov. 27, 1890. DR. B. J. KENDALL, CO.

Gents—I would like to make known to those who are almost persuaded to use Kendall's Spavin Cure the fact that I think it is a most excellent Liniment. I have used it on a Blood Spavin. The horse was for years past for three years when I commenced to use your Kendall's Spavin Cure. I used ten bottles on the horse and have worked him for three years since and has not been lame.

Yours truly, WM. A. CURL.

GERMANTOWN, N. Y., Nov. 2, 1890. DR. B. J. KENDALL, CO.

Gents—In praise of Kendall's Spavin Cure I will say that a year ago I had a valuable young horse become very lame, look enlarged and swollen. The horsemen about here (we have no Veterinary Surgeon here) pronounced his lameness Blood Spavin or Thoroughpin, and all told me there was no cure for it. He became about useless, and I considered him almost worthless. A friend told me of the merits of your Kendall's Spavin Cure, so I bought a bottle, and I could see very plainly great improvements immediately from its use, and before the bottle was used up I was satisfied that it was doing him a great deal of good. I bought a second bottle and before it was used up my horse was cured and has been for some time doing heavy work all the season since last April showing no more signs of it. I consider your Kendall's Spavin Cure a valuable medicine, and it should be in every stable in the land.

Respectfully yours, EUGENE DEWITT.

Prices \$1 per bottle, or six bottles for \$5. All druggists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors.

DR. B. J. KENDALL, Vt. Vermont Falls, Vermont.

SOLD BY ALL DRUGGISTS, 35-40 ly

SAVE YOUR CHILD'S LIFE!

Bellefonte, Pa., Aug. 28, 1891.

The New Pest.

Has it Appeared in Tioga County?—Potter County Alarmed.

It is said that the peculiar worm which is creating such havoc with the hemlock forests in Potter county, has made its appearance in Tioga county in several localities. Mr. B. H. Butler, of the Bradford Era, who has been investigating the new pest in Potter county, informed the Wellsboro Gazette last Wednesday that in making the trip from Lawrenceville to that place he had observed many trees which had all the appearance of being ravaged by the same worm. Mr. Butler stated that last week during a trip through Potter county he had seen miles of hemlock trees that were turning brown through the ravages of the worm. He says that the worm is one of the "measuring worm" species, about an inch long and barely an eighth of an inch in diameter. A late dispatch sent out from Bradford by Mr. Butler says:

"Potter county is alarmed, and with good cause, over the ravages of a worm that is destroying the foliage and killing off the hemlock timber. A remarkable scene is presented in the 'choppings' where the bark peelers are at work. The worms are swarming about the men by the millions, while all the trees were turning brown and ruin is threatened to the vast lumber interests in that section. Reports from Glen Hazel, Elk county, and from the east side of the county, state that the same worm in countless numbers is devastating the hemlock there. "If this worm means the destruction of the trees upon which it feeds, a grave crisis confronts the whole population of the entire hemlock region of New York and Pennsylvania. Not only are the lumbermen concerned; but the tanners, railroad men, farmers, everyone, for this is pre-eminently a hemlock country from Elmira to Punxsutawney."

Secretary Edge, of the State Board of Agriculture, speaking of the insect which is threatening the hemlock forests says: "It is evidently not a new insect but is probably an old enemy of the hemlock which through some unknown cause is more abundant this year. Next season it will probably not exist in more than usual numbers and will not be noticed more than in former years. I do not think that any serious evil is to be feared from the worm, as it has been at work for years past, and is well known to entomologists."

Gettysburg and Waterloo Compared.

At Gettysburg there were present in action 80,000 to 85,000 Union troops, and of the Confederates some 65,000. At Waterloo there were 120,000 soldiers of the allies under Wellington and Blucher, and 72,000 French under Napoleon; or, there were about 150,000 combatants at Gettysburg and about 190,000 at Waterloo. In each case the weaker army made the attack and was defeated. Lee did not have to face such heavy odds as Napoleon: but, whereas, Napoleon's defeat was a rout in which he lost all his guns and saw his soldiers become a disorganized rabble, Lee drew off his army in good order, his cannon uncapured, and the morale of his formidable soldiers unshaken.

The defeated Confederates lost in killed and wounded 15,530, and in captured 7,467, some of whom were likewise wounded, or 23,000 in all. The defeated French lost from 25,000 to 30,000—probably nearer the latter number. The Confederates thus lost in killed and wounded at least 25 per cent. of their force, and yet they preserved their artillery and their organization, while the French suffered an even heavier proportional loss and were turned into a fleeing mob.

Good Hands.

That is a good hand which is put out to help some one who has fallen by the wayside.

That is a good hand which knows how to make pain easier and headaches vanish.

That is a good hand which knows how to give heartily and freely.

That is a good hand which is put out to help you or me as we walk along in life; when we feel we need some one to protect us.

That is a good hand which never wrote anything of which it was ashamed, and which never put its hand to fraud and dishonesty.

That is a good hand which helps along the sick and the weak, the helpless and the poor.

That is a good hand which does its work well; whatever it may be, wherever it may lie, it doth not grow weary, and it doeth its work so it is worth its wage.—Atlanta Constitution.

Victoria Mours Lowell.

Acting Secretary of State Wharton received, through the British Minister at Washington, a cablegram from the Marquis of Salisbury, in the following words: The Queen desires to express her sorrow and regret at the news which has just reached this country of Mr. Lowell's death. The British Minister was requested that the telegram be laid before the President, and by his direction a copy was immediately transmitted to the family of the deceased.

COLD COMFORT.—A couple from the humbler walks of life came before justice of the peace to be married, when the ceremony being over, the bride began to weep copiously. "What's the matter?" asked the new husband. "I never told you that I don't know how to cook," sobbed the bride. "Don't fret. I'll not have anything to cook. I'm a poet."

For three weeks I was suffering from a severe cold in my head, accompanied by a pain in the temples. Ely's Cream Balm was recommended to me. After only six applications of the Balm every trace of my cold was removed.—Henry C. Clark, New York appraiser's Office.

Rain Makers at Work.

They produce a Six Hours' Storm by Using Explosives.

MIDLAND, Texas, Aug. 19.—General Dyerforth's party of rain-makers are jubilant to-day. The first important experiments have met with great success. A rain fell for over six hours yesterday, and it was undoubtedly caused by the explosion of oxy-hydrogen balloons, red-rock powder and dynamite, which were made by the rain persuaders.

Shortly after 3 o'clock yesterday afternoon a large oxy-hydrogen balloon was sent up at the ranch from where the scientists have made their headquarters. The ranch is about twenty-five miles from this town. The balloon was sent up about one and a quarter miles and was then exploded. It made a report like a severe clap of thunder. There were only a few white clouds floating in the blue sky at the time. The sun was shining, and any old farmer or mariner would have said that it would not rain for a week. The instruments in the possession of the scientists showed that the air was remarkably dry and the barometer pointed at sunset fair.

Ten minutes after the balloon had disappeared in a peal of thunder, a string of kites were set flying and their tails were fastened a quantity of dynamite. This was exploded when the kites were high in the air and then a great quantity of redrock powder which was scattered over the ground for about two miles was set off by electricity. This made a noise like a succession of batteries of artillery being fired.

The smoke rose in the air for about 200 hundred feet, and drifted towards the experts' headquarters. Before it reached there, however, it was driven down to the earth by a torrent of rain which fell. The few fleecy clouds had gathered together, others had formed, the sky had quickly become overcast, and a storm had been created by man's efforts. The barometer began falling from almost the moment that the balloon was exploded. The rain was very heavy, and the centre of the storm was over the ranch. The storm extended, according to the reports from the ranchmen, and from those along the line of the Texas & Pacific Railroad, over an area of not less than one thousand miles, but as it is hard to get any definite reports, it may have reached farther still. The noise of the explosion was heard plainly at Midland and even at ranches forty miles from the scene of the experiments. The people thought it was thunder.

A Tough Fight With a Trout.

An example of how patient the Britisher (or rather Irishman) can be comes from the Westmeath lakes (Mullingar) Ireland. Dennis Flanagan, while fishing in one of these lakes, hooked a magnificent specimen of Lough Ovel trout, weighing fourteen pounds, measuring twenty-nine inches in length, and nineteen and one-half inches in girth. It was a male in splendid condition, and it was hooked in bad fishing weather for that part of the country. It took seventeen hours to play the fish. It was hooked on a small bait during the evening, and seeing no sign of the fish giving way easily, he called his brother and another angler (William Meares), who were witnesses of the contest up to this time, to his assistance. During the long night and morning watches the three men alternately played the fish, which finally succumbed at ten o'clock the next morning.

How the Old Lawyer Examined the New One.

Here is a portion of the examination to which an old lawyer recently told to which he was subjected when he applied for a license to practice. The oldest member of the examination committee interrogated. "Are you familiar with any game of chance?" "No, sir." "Don't you know how to play any game of cards?" "No, sir." "Surely you understand euchre?" "Never heard of it before." "It can't be possible you never indulged in a game of draw poker?" "Yes, sir, it can. I am a member of the church and don't know one card from another." "Well (after a long pause of astonishment) young man, we'll give you a license, but how in the world you're going to make a living for the first two or three years after you start practicing law is a mystery to us."—Chicago News.

The vitality of the mule is little short of amazing.

In Memphis, Tenn., one fell twenty-five feet down an opening in the street. It landed on its head and, the whole being narrow, it was unable to change its position. It was supposed that the beast had broken its neck as a sharp, clicking noise was heard when it struck bottom. After half an hour the mule was hoisted out by the heels and laid on the ground. It showed no signs of life but, notwithstanding, it was given brandy liberally and, in a little while, to the surprise of the thousands of spectators who had collected, the mule rose to his feet and walked off as though nothing unusual had happened.

An old brindle cow belonging to an Indiana man broke into another's field, and in court the owner of the field proved that the cow destroyed the following mentioned property, to wit:

Two four-year-old cherry trees, seven apple trees, five pear trees, one plum tree, 100 head of cabbage, twelve rows of beans five rods long, one row of beans one and a half rods long, fifty to 150 sweet potato plants, one bed of onions, three grapevines, and fourteen blackberry bushes.

The man who stole the chicken made a clean breast of it.

Medical.

BABY'S FACE WAS RAW.

DISTRESSING ITCHING SKIN DISEASE CURED IN ONE MONTH BY THE CUTICURA REMEDIES.

When our boy was six weeks old he had a rash on his cheek. It spread on both cheeks and chin. His face was raw. I doctored with various remedies, but it got no better. My mother advised me to try the Cuticura Remedies. I used them faithfully, and in one week the boy looked better. In one month he was cured, and now he is three years old and no signs of it returning. The child was so bad I had to lie him in a pillow-case, and pin his hands down so that he could not scratch his face. I cannot speak too highly of the Cuticura Remedies. I recommend Cuticura whenever I can. I would be pleased to see any one and talk to them of the good it has done my boy. MRS. CYRUS PROSCH, Coyttersville, Port Lee, P. O., N. J.

N. B. My husband is president of the Prosch Manufacturing Company, proprietors of the "Duplex" and "Triplex" Photographic Shutters, 389 Broome Street, New York City. He disjice undesirable noisiness, but is willing to make sacrifices to benefit others, and assents to this testimonial to encourage the use of Cuticura, and thus bring relief to others.

He will be at the BROCKENHOFF HOUSE. From 8.30 A. M. to 5 P. M.

Those whose eyes are causing discomfort should call upon our Specialist, and they will receive intelligent and skillful attention.

QUEEN & CO. 924 Chestnut St., Philadelphia, Pa. 36 21 ly

Watchmaking--Jewelry.

F. C. RICHARD, JEWELER and OPTICIAN, and dealer in CLOCKS, WATCHES, JEWELRY and SILVERWARE. Special attention given to the Making and Repairing of Watches.

IMPORTANT—If you cannot read this print distinctly by lamp or gaslight in the evening, at a distance of ten inches, your eyesight is failing, no matter what your age, and your eyes need help. Your sight can be improved and preserved if properly corrected. It is a wrong idea that spectacles should be dispensed with as long as possible. If they assist the vision, use them. There is no danger of seeing too well, so long as the print is not magnified; it should look natural size, but plain and distinct. Don't fail to call and have your eyes tested by King's New System, and fitted with Combination spectacles. They will correct and preserve the sight. For sale by F. C. RICHARD, 27 49 42 High St., opp. Arcade, Bellefonte.

Book Bindery.
