The Mystery of Second Growth Forests.

Among the curious enigmas of nature which have remained unsolved to the present day is the growth of a forest upon the site once occupied by one which differed in character from the latter tles. It is now four years since I stopped, completely cured, and I have since had no seeds from which the second forest sprang had been lying undeveloped in the ground for a great length of time, perhaps centuries, but the improbability of seeds retaining their vitality for such a length of time, and under the conditions to which they would necessarily be exposed, makes that theory rather unplausible; and, besides, this speculation fails to account for the origin of qua system in those days to direct and the seeds necessary to produce the second growth. Y.) has been cured of a stubborn case of skin disease by the use of *Cu-ticura Remedies*. She remarked that her case had baffied the skill of many well-knnym phy-sians. They unanimously pronounce it Ecze-ma, with Rheumatism lurking in the blood. Some predicted that any treatment strong enough to cure the Eczema would surely in-crease the Rheumatism. She used two sets of the *Cuticura Remedies*. The effect was mar-vellous. Her case of Eczema was not only completely cured, but her Rheumatism was greatly relieved during the treatment. Six years have elapsed since the cure was per-formed, her Rheumatism has since never in-creased by the treatment, but rather diminish-ed, and she sees no symptoms of the return of the Eczema which once so completely took possession of her face and body. Miss Atwood delights in telling of the good effects that the Cuticura treatment had upon her, and recom-mends unsolicited the *Cuticura Remedies* for Eczema and all kindred ailments.
