

Colleges.

THE PENNSYLVANIA STATE COLLEGE.

Located in one of the most beautiful and healthful spots in the Alleghany Region; Undenominational; Open to Both Sexes; Tuition Free; Board and other Expenses very low. New Buildings and Equipment.

LEADING DEPARTMENTS OF STUDY.

1. AGRICULTURE (Two Courses), and AGRICULTURAL CHEMISTRY; with constant illustrations on the Farm and in the Laboratory.
 2. BOTANY AND HORTICULTURE; theoretical and practical. Students taught original study with the microscope.
 3. CHEMISTRY; with an unusually full and thorough course in the Laboratory.
 4. CIVIL ENGINEERING; ELECTRICAL ENGINEERING; MECHANICAL ENGINEERING. These courses are accompanied with very extensive practical exercises in the Field, the Shop and the Laboratory.
 5. HISTORY; Ancient and Modern, with original investigation.
 6. INDUSTRIAL ART AND DESIGN.
 7. LADIES' COURSE IN LITERATURE AND SCIENCE; Two years. Ample facilities for music, vocal and instrumental.
 8. LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course.
 9. MATHEMATICS AND ASTRONOMY; pure and applied.
 10. MECHANICAL ARTS; combining shop work with study, three years' course; new building and equipment.
 11. MENTAL, MORAL AND POLITICAL SCIENCE; Constitutional Law and History, Political Economy, &c.
 12. MILITARY SCIENCE; instruction theoretical and practical, including each arm of the service.
 13. PREPARATORY DEPARTMENT; Two years, annually graded and thorough.
- Winter term opens January 7th, 1891; Spring term, April 8th, 1891; Commencement week, June 28th to July 2nd. For Catalogue or other information, address
- GEO. W. ATHERTON, LL.D., President,
27 25 State College, Centre county, Pa.

LOST 6 CHILDREN

BUT SAVED THE SEVENTH.

By the Aid of Hood's Sarsaparilla—Read What Mr. Hilbert of Lawrence, Says.

"Ten years ago our child was born. Having lost six children we were naturally anxious as to the health of this one. What was our dismay and sorrow to find that she was apparently doomed to the same fate as the others. She seemed to have little strength as a baby, and did not improve as she grew older. When about 2½ years old she began to falter.

FAINTING FITS, dropped wherever she happened to be. At these times she would turn black and appeared at the point of death. Doctors told us she was in a very bad way from heart trouble. Nothing that we gave her did any good until we began giving her Hood's Sarsaparilla. She gradually began to improve, the fainting fits became less and less frequent, and finally ceased entirely. Her general health improved, until at the end of a year, having taken seven bottles, we stopped giving it to her. At this time she was 4 years old, and although anxious lest the troubles might return, we ceased to worry, she seemed so well. She is now 10 years old and is as

HEALTHY AND BUGGED a child as you will find anywhere and has never shown any indication of a return of the heart difficulty. During the past 6 years perhaps she has taken 3 bottles in all, we only giving it to her irregularly at times when she has complained of feeling tired in the spring and early summer. We feel that we owe a great deal to Hood's Sarsaparilla and cannot say too much in favor of it. It has also done me great good for dyspepsia and has cured my wife of sick headache." EDWARD HILBERT, hair dresser, 183 Broadway, Lawrence, Mass.

HOOD'S SARSAPARILLA and that only. Several of the other members of my family have since used the medicine with beneficial results." THOS. SKILLMAN, 100 DORSET STREET, DUBLIN.

N. B. Be sure to get HOOD'S SARSAPARILLA, Sold by all druggists. \$1; six for \$5. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass. 36 33

KENDALL'S SPAVIN CURE. THE MOST SUCCESSFUL REMEDY ever discovered, as it is certain in its effects and does not blister. Read proof below.

KENDALL'S SPAVIN CURE. BELVERNON, PA., Nov. 27, 1890. DR. B. J. KENDALL, CHICAGO, ILL.: Gents—I would like to make known to those who are almost persuaded to use Kendall's Spavin Cure the fact that I think it is a most excellent Liniment. I have used it on a Blood Spavin. The horse went on three legs for three years when I commenced to use your Kendall's Spavin Cure. I used ten bottles on the horse and have worked him for three years since and has not been lame.

Yours truly, WM. A. CURLE.

GERMANTOWN, N. Y., Nov. 2, 1889. DR. B. J. KENDALL, CHICAGO, ILL.: Gents—In praise of Kendall's Spavin Cure I will say, that a year ago I had a valuable young horse become very lame, hock enlarged and swollen. The horsemen about here (we have no Veterinary Surgeon here) pronounced his lameness Blood Spavin or Thoroughpin, they all told me there was no cure for it, he became almost useless, and I considered him almost worthless. A friend told me of the merits of your Kendall's Spavin Cure, so I bought a bottle, and I could see very plainly great improvements immediately from its use, and before the bottle was used up I was satisfied that it was doing him a great deal of good. I bought a second bottle and before it was used up my horse was cured and has been in the team doing heavy work all the season since last April showing no more signs of it. I consider your Kendall's Spavin Cure a valuable medicine, and it should be in every stable in the land.

Respectfully yours, EUGENE DEWITT.

Prices \$1 per bottle, or six bottles for \$5. All druggists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors.

The Size of Silos.

Too Long Exposure the Cause of a Great Deal of Loss.

H. B. Gortler, in a recent issue of Hoard's Dairyman, said: Judging from some pointers picked up in conversation with feeders of ensilage, there are some making the mistake of exposing too much surface for the number of cattle fed. I know of some cases where trouble with milk from ensilage feed was traced to moldy and decayed ensilage caused by too long exposure. Unsound feed of any kind will make milk of the same kind. I have traced off-flavored milk to rotten hay from bottom of stack or mow.

It has occurred to me that we might have a rule to apply to size of compartments in silos. Let it be a certain number of square feet per animal.

Probably a majority of farmers feed some kind of dry coarse feed besides ensilage and do not feed more than one cubic foot per animal per day, and if we remove two inches per day from the exposed surface as advised in the Wisconsin bulletin, we are using one-sixth of a foot in depth daily or one foot in depth in six days. By this rule we could have exposed six square feet per animal to be fed. For twenty cows a silo or compartment ten by twenty would be the proper size. This I believe to be a safe rule.

In cold weather the surface exposed per animal can be increased, but for fall and spring weather. I believe six feet per animal is plenty near enough the danger line.

I have been thinking for some time to give my ideas on this question and hope it is not too late to discuss the matter before we commence filling our silos.

To Our Subscribers

The SPECIAL ANNOUNCEMENT which appeared in our columns some time since, announcing a special arrangement with Dr. B. J. KENDALL Co., of Enosburgh Falls, Vt., publishers of "A Treatise on the Horse and his Diseases," whereby our subscribers were enabled to obtain a copy of that valuable work FREE by sending their address to B. J. KENDALL Co., (and enclosing a two-cent stamp for mailing same) is renewed for a limited period. We trust all will avail themselves of the opportunity of obtaining this valuable work. To every lover of the Horse it is indispensable, as it treats in a simple manner all the diseases which afflict this noble animal. Its phenomenal sale throughout the United States and Canada, make it standard authority. Mention this paper when sending for "Treatise."

How Carl Schurz Learned English.

Few foreigners—indeed few English or Americans—speak and write the English language with the grace and purity of Carl Schurz, and he explains the fact as follows:

"When I first came to America I found that I knew as little practical English as the Yale or Harvard student who has read 'Faint' and 'Piccolomini' knows of German. I went to a bookstore and asked for the classic of the English language. The 'Vicar of Wakefield' was given me. I made a careful translation of the work into German, laid it aside for six weeks, re-translated into English, critically compared the two versions, and knew the English language."—Youth's Companion.

How a Diamond Cuts Glass.

It has been ascertained by a series of experiments that a diamond does not cut out the glass, in the fashion, but forces the particles apart, so that a continuous crack is formed along the line of the intended cut. The crack once begun, very small force is necessary to carry it through the glass, and thus the piece is easily broken off. The superficial crack or cut need not be deep, a depth, according to line measurements, of a 200th part of one inch is quite sufficient to accomplish the purpose, so that the application of much force in using the diamond only wears out the gem without doing the work any better.

Numerous stones, such as quartz and other minerals, when ground into proper form will cut glass like a diamond, but are not so valuable for that purpose, lacking the requisite hardness and soon losing the sharp edge necessary to make the operation a success.—St. Louis Globe Democrat.

Among the Poultry.

It surely pays to keep poultry beyond the third year.

Fowls with small combs and clean limbs are best on the farm.

The hens that moult early, nearly always make good winter layers.

A long-legged, overgrown rooster should never be used for breeding.

The scraps from the table soaked in sweet milk are good for young turkeys.

Do not allow rubbish to accumulate around the poultry yard; it affords a refuge for rats.

Millet seed makes a good food for poultry. Usually at this time of year it can be bought cheap.

A little oats and barley make a good ration for the fowls that are to be kept for breeding and laying.

Sunflower seed can be fed liberally with profit while hens are moulting. Alternate with linseed oil meal.

"INDIFFERENCE."—"Can you trace your family back a dozen generations?" "I could if I desired, but I don't want to."

"Why?" "I might be ashamed of myself if I did."

NOT ALL BRAIN WORK.—Physician—Do you ever take any exercise? Cholly—Aw yaas—I woll my own cighawettes.

A Great Country, and How to Reach It.

Owing to the great amount of interest shown in the northwestern states, and especially in Montana and Washington, the Northern Pacific Railroad has prepared two folders, entitled "Golden Montana" and "Fruitful Washington," which contain a great many interesting and valuable details in reference to climate, topography, agriculture, stock-raising, mining, lumbering, government and railroad lands, homesteads and other subjects of interest to the capitalist, business man or settler. These folders can now be obtained on application to the General Passenger Agent of the road.

It should be borne in mind by travelers to the Northwest that, among other things, the Northern Pacific Railroad offers the following advantages: It is the direct line to principal points in Minnesota, North Dakota, Montana, Idaho, Oregon and Washington; It has two trains daily to Helena and Butte, Mont., Spokane, Tacoma and Seattle, Wash., and Portland, Ore.; It has complete equipment of Pullman first class sleeping cars, dining cars, day coaches, Pullman tourist and free colonist sleepers, the cars being new, comfortable and neat; It has through sleeping car service every day from Chicago, Ill., to Montana and Pacific Coast points, of Pullman first-class and tourist sleeping cars in connection with the Wisconsin Central line, and vestibuled first-class sleepers via C. M. & St. P. Ry.; It passes through the grandest scenery, seven states and the great young cities of the northwest; The service is complete in every respect, the "Yellowstone Park and Dining Car Route" being, in fact, a thoroughly first-class line to travel over.

District Passenger Agents of the Company will supply publications referred to above, with maps, time tables, rates or other special information, or communications addressed to Chas. S. Fee, G. P. & T. A., St. Paul Minn., will receive prompt attention.

The Southern Exposition and Future Prosperity.

The Baltimore Manufacturer's Record in a recent article on the prosperity of the country, gives the following:

"The South will share to the fullest extent in this great prosperity. With the return of financial activity the capitalists of the North and of Europe, who have understood that the South is the best field in the world for safe and profitable investments, will put their money into this section more freely than they have ever done. The Manufacturers' Record, has made many predictions in the past about the prospects of the South, and our readers will bear testimony to the fact that they have been more than fulfilled. It makes another prediction. During the latter part of this year there will be increased activity throughout the South, followed in 1892 by still better times, with heavy investments of outside money in railroads, in mineral and timber properties and in manufacturing enterprises, and the South will make rapid and substantial progress in the development of its iron interests, in the creation of a steel business which will rapidly expand to large proportions, in the building up of a still greater foreign commerce, and in the growth of Southern seaports. These will be some of the leading lines of advancement, but great progress will be made in the general industrial and business interests of the whole South."

The sentence in italics is worthy of special attention. The great Southern Exposition is to be held in Raleigh, N. C., during the months of October and November. There will be shown the products and manufactures of the Southern States. There the people of the South will gather; and the Northern investors can meet those who have lands to sell, or who can offer other lines of investments. The Exposition will be an Exchange for the whole country. Low rates of travel will be offered from New York City.

The Game Laws.

A Few Interesting Points for Local Nimrods to Make a Note of.

Quail and rabbit: November 1 to December 15, inclusive. Penalty \$20 each and every offense.

Grey squirrel: Sept. 15 to Dec. 15, inclusive. Penalty, \$50 each and every offense.

Woodcock: July 1 to July 31, inclusive; Oct. 1 to Dec. 15, inclusive. Penalty, \$20 each and every offense.

English snipe: March 1 to April 30, inclusive; Oct. 1 to Dec. 15. Penalty, \$20 each and every offense.

Shall bird: Aug. 26 to Dec. 15, inclusive. Penalty, \$5, each and every offense.

It is unlawful to hunt with gun, or dog and gun, on Sunday. To be found in the fields or woods on Sunday with a gun is prima facie evidence. Penalty, \$25 each and every offense.

WHAT HE WANTED.—A rusty appearing fellow drifted into a broker's office not long since, and approaching the manager said that he wished to make an investment, and that he wanted to buy something good.

"How does silver strike you?" queried the broker.

"Too good to pass up," said the farmer. "Well," said the broker, "if you want something cheap buy lead."

"I don't think lead's any good," replied the farmer. "Have ye got some good tin?" he continued.

"No, tin was busted some months ago. Why don't you try Consolidated Gas?" continued the broker.

"Consolidated gas!" exclaimed the stranger. "I've heard tell on pails and jugs of paper (I suppose they use old ones they kin buy cheap), but I'll be dinged if they air now makin' on 'em of gas."

"What do you want in gas, anyhow?" roared the broker.

"I came in to buy some milkpails," replied the stranger; "a fellow down here says as how this was a bucket shop."—Buffalo Enquirer.

—Aluminum has been suggested as a material for coins, but there are objections to it. It has always a greasy feel, due to the presence of a slight but unavoidable film oxide of aluminum over its surface.

Battles and Rain Making.

It is generally supposed that the theory of rain making by exploding shells filled with dynamite and powder is a very modern idea, derived from the fact that severe rains have nearly always followed the great battles of the civil war where artillery was used, and that the concussion caused atmospheric conditions that accumulated moisture. Upon this theory the recent congressional experiments were made and much public money ended in a bang and a smoke.

Had the authorities consulted the WATCHMAN it could have given them some gratuitous information that would have prevented them from going off halfcocked.

Hundreds, yes nearly two thousand, years ago and before gunpowder or any other concussion producing matter was discovered or thought of, in the life of that great Roman, Caius Marius is this passage.

"It is observed, indeed, that extraordinary rains generally fall after great battles; whether it be that some deity chooses to wash and purify the earth with water from above, or whether the blood and corruption, by the moist and heavy vapors they emit, thicken the air, which is liable to be altered by the smallest cause."

From this it is evident that some other cause than concussion is responsible for the rains after great battles.

Perhaps a lot of people have to be killed, and we would recommend that the next experiments be made upon the delinquent subscribers of country newspapers. By this means they will be placed where they will do the most good.

A WISE VIRGIN.—"He'll never get over my jilting him."

"Why, was he so in love with you?" "Oh, no. He was so in love with himself."

EVERY PATRIOT

should read a good newspaper. In the selection of a newspaper many considerations should govern. First, it should be one that endeavors to give all the news without prejudice. It should be printed on good paper. It should be independent—in favor of all that is good, upright, clean. Such a newspaper is

THE PATRIOT,

printed in Harrisburg. It is under new management—enlarged, handsome, bold in the right, fearless in denouncing wrong; is always and unswervingly Democratic. It is the only Democratic newspaper at the State Capital. It makes a specialty of Department News. It is the only paper in Central Pennsylvania that receives and prints full Associated Press Reports, obtained by it over its own wires. It presents each day Special Correspondence from all points tributary to Harrisburg, all the Harrisburg News, Fashion Notes, Household Hints, Domestic Recipes, Society Gossip, Scientific, Humorous and Political Articles, Short Stories and Sketches. Its Market Reports are complete, both as to Finance and Commerce. Its Live Stock Markets are prepared specially for The Patriot, and have only been successfully imitated by one other newspaper in the State. The Saturday Sermon of Spurgeon, London, is a great feature. The Patriot wants the rascals turned out or locked up. To this end it heartily urges the election of Wright and Tilden as the only means to stop the plundering of the public treasury.

The Weekly Patriot, 8 pages, is only \$1 a year. It maintains the best features of the daily, including the Spurgeon Sermon. First take your home paper, then it. Send for circulars and sample (free) of either daily or weekly.

Liberal rates for campaign or otherwise, Address THE PATRIOT COMPANY, D. A. Orr, President Harrisburg, Pa. J. G. Orr, Treasurer 36-37

Oculists and Opticians.

QUEEN & CO. The famous firm of Oculists and Opticians OF PHILADELPHIA, Have arranged to send one of their Specialists on the EYE to BELLEFONTE, WEDNESDAY, OCT. 21st

He will be at the BROCKENHOFF HOUSE. From 8.30 A. M. to 5 P. M.

Those whose eyes are causing discomfort should call upon our Specialist, and they will receive intelligent and skillful attention.
