

Bellefonte, Pa., Oct. 30, 1891.

The Soldiers' Nobility

Ochiltree Faced Twenty Thousand Strong Alone, But His Horse Died.

The world-famous raconteur, Thomas P. Ochiltree, is never at a loss to adorn an otherwise commonplace conversation with a story of thrilling adventure, narrow escape or humerous incident. Recently a number of men were telling of narrow escapes, when the colonel told of a close place he got into as follows:

"Gentlemen, I was with General Dick Taylor when he operated against General Banks in the trans-Mississippi department. It was shortly after the battle of Pleasant Hill, and Banks was retreating to Grand core. One day we got near General Banks' army and General Taylor asked me to head a squadron of cavalry and charge. I mounted on a coal black horse, and when I rode out to take command of the squadron I never thought to come back from the charge alive. We had to charge across an open field, a distance of one and one half miles. I drew my sword, put spurs in my horse's sides and dashed forward, ordering the cavalry to follow. Some twenty thousand of Banks' infantry were drawn up in line just on the edge of the field awaiting an attack. Of course when I started I did not know that 20,000 men were waiting to give a werm welcome to a handful of cavalry When within 300 yards of the federals I raised in my stirrups and yelled to the squadron to follow me. I expected to hear each cavalryman vell, but to my dismay all was silent. I turned to look, when, horror upon horror! the squadron was over a mile from me in a swift retreat! I had been riding across the field alone, thinking they were right behind me. They had evidently seen the thousands waiting to pour a storm of shot into us and had retreated, but I did not see them as I am near sighted. Of course I saw them when I yelled. A gleam of bayonets extended for miles in front of me. My horse trembled. I held my breath expecting to be mowed down in a second. Turning my horse I rode leisurely back and not a shot was fired at me. My horse died with nervous prostration half an hour after I got back. Why didn't the federal army fire on me? I learned afterward that they were to fire, but no soldier was pusillanimous enough to shoot one man who had the courage to charge 20,000 men. Gentlemen, I believe in human nature and the nobility of the volunteer soldier since that event.

The Story of Dresden China.

The first hard porcelain made in Europe-for majolica, Palissy ware, and others of the sort are pottery, and not porcelain-was the lovely Dresden ware; and in that line nothing has ever been made to exceed its beauty. Its flowers, its ribbons, and ornaments, are perfection in design and color; there is a rumor that real lace is put into the clay before firing for the parts representing ter has been shown upon the moon's lace, but how that hay be we do not surface. know. It owes its existence to an accident. The chemist, who had been imprisoned by the Elector in order to find the secret of making gold and of the elixir of life, having come across some substance resembling porcelain in the bottom of a crucible, was unable to get it of a pure tint, till a rider one day found a peculiar white clay on his horse's hoofs, which he had dried and sifted and sold for hair powder, and the unfortunate chemist, using it and observing its weight, experimented with it, and straightway the Dresden ware—or Meissen, as it is more correctly called became a success, the first sculptors and colorists of the day lending their art to its perfection. Cruelty, or rather ty-ranny, has often attended on Dresden china; for Frederick the Great, having sent great quantities of this white earth to Berlin, took captive the best workers in the Meissen and sent them after it. never allowing them to see home again: and presently he obliged the Jews in his dominion to buy the china, he thus manufactured by refusing them marriage licenses till they had procured a service, thus gaining an immense annual rev-

enue .- Haryers Bazar. Why Wild Horses are Tough.

"Rest and fat are the greatest enimies of the horse," is a saying of the Arabs, and if every horse owner would embody its truth in his practice, there would be little need to write anything further on the subject. Its observance would be potent to improve the horse in health, strength, virility, endurance and longevity, and by "holding up the glass of nature," correct the irrational treatment and abnormal conditions under which he is often reared Not that the conditions surrounding the horse in a state of nature should be wholly imitated, for they do not all tend to his improvement in the qualities adapted to man's use. But it is worthy of note that the wild horse is tough, sound and healthy, and making due allowance for the influence of natural selection or the survival of the fittest when it is observed that he is seldom in a state of rest, that he lives unconfined in the open air, upon natural food, it may reasonably connect these as cause and effect, and safely consider exercise, pure air and simple diet the fundamental conditions upon which to build up, by skill in breeding and training, the highest and most perfect equine type.

Bashful Men.

Are there any bashful men now extant among us? Not among the rising generation of "Young American," most surely. Perhaps some may exist in the form of some antiquarian or library man, who, when dragged from his lair, may be covered with confusion, trying to make a bow or frame a compliment after the latest approved mode. the etiquette lover meet one of these re-eluses on his own "hunting grounds" and it would be he who would be the bashful man. We are inclined to the opinion, which will no doubt be comforting to the diffident and blushing of self-confident person is generally the one who has the least ballast.

She—"I am sorry for you, but I have a bet with him of a box of gloves that I would not."

Interesting Odds and Ends.

Scraps Picked Up Here and There Which Contain Worlds of Information for All.

New York has 36,5)3 dogs. California has 246 banks. Berlin's debt is \$56,000,000.

India contains 286,000,000 people. Cholera is raging in parts of Japan. Uncle Sam has 4000 failures yearly. Chicago is to have a \$1,200,000 theatre.

An average locomotive costs \$10,000. The Alps stand in six different States. The United States have 325 electric

London has another hydrophobia London employs 500,000 factory

The United States contain 30,000 millionaires. The fruit yield has been a good one in Rhode Island.

Iron has been rolled to the thinness of . 1800th of an inch. A \$15,000,000 railroad tunnel is to be

ored through the Alps. Japan wants reciprocity or some closer trade relations with China.

A new method to utilize coal culm has been successfully tried. About 32,000,000 of peasants in Russia are destitute and must be provided

Governor Knapp estimates the production of gold and silver in Alaska at \$1,000,000.

Fifty horses a day is the average death rate among the equine population of Chicago. Antimony is found extensively in

Portugal, the largest beds being situated near Braganza. The reports from the phosphate dig*

gings in Florida show the industry to be unprofitable. It is probable that the new track laid in the United States this year will fall

below 5000 miles. The Dominion Government appointed Thursday, November 12, as the day of public thanksgiving.

Arrangements are being made to lay a cable from Nassau to Jupiter Inlet, on the coast of Florida. The French make paper umbrellas,

rendered wholly waterproof by gelatined bichromate of potassium. An electric flying machine was recently made to rise to height of seventy

feet and fly about 400 yards. American maize flour is to be tried in Germany as a substitute for the cheap breadstuff now in use there.

The German Government has placed an order in the hands of American agents for eighty-five tons of aluminum. A French electrician has gotten up a

device by which he can send 150 typewritten words per minute over a single By the use of the camera, with powful telescopes a new and very large cra-

Professor Hazen, of the National Weather Bureu, declares that the rainmaking experiments in Texas have been total failures.

The sturgeon is toothless and draws in its food by suction, but the shark has hundreds of teeth set in rows that sometimes number ten.

A seamless steel boat made from one piece of metal by hydraulic pressure promises to be very desirable. It will last a great while and cannot leak. The Kentucky Court of Appeals has

affirmed a judgment of \$800 and costs against the Louisville and Nashville Railroad Company for repairing its tracks on a Sunday.

The largest locomotive yet built in Europe was recently sent out of the Hirschau works in Munich, Bavaria. It is forty-six feet over all and weighs eighty-four tons.

Telescopic steel masts or rods are to be used in lighting the public squares in Brussels, Belgium. The object of this system is to preserve the beauties of the parks in the daytime.

The effective range of the modern magazine rifle is not less than a mile and the maximum range not less than two miles. There is danger from richochet up to a distance of a mile.

As heat resistants we may mention asbestos, plaster-of-paris, uncalcined gypsum, sand, clay, ashes, charcoal, soap-stone, pumice stone, chalk, infusorial earth, mineral wool, rock, wool.

Electricity is playing an important part in the working of heavy guns, ammunition hoists, and winches in the French Navy. New ships are being fitted with electric appliances in lieu of hydraulic gear.

The practice of placing the green boughs of the eucalyptus tree in sick rooms is growing in Australia. They not only act as disinfectants, but the volatile scent has also a beneficial indu-

ence on consumptive patients. The Spanish Board of Admiralty pro poses to build a caravel, a vessel similiar to those in which Columbus made his voyage of discovery. It is intended that the vessels be exhibited first at Buelva and afterwards at the Chicago

fair. By means of a powerful jet of compressed air a German engineer drives dry cement down into the sand or mud at the bottom of the stream, so that the water immediately fixes the cement and it becomes like soild rock, suitable for

An American machine which will successfully work out the fibre of sisal from the plant has produced a boom in that industry never realized with the English machines heretofore used. The new machine does not cut the fibre, and the product leaves the machine ready for the market.

—He—"So you just positively will not give me one kiss? And I had a \$10 bet with Tom Bickle that you

Telling Time.

How it May be Done Without the Use of Sun-Dial or Chronometer.

There is a great difference in individuals as to the sense of time-that is, as to the power of carrying time along with Some persons carry it so well that they can tell you at almost an instant what the time of day is, to within a few minutes. Others have so little sense of time that they may be said to be living in eternity. Time pieces are a concession to the inability of most of us to carry our time. And no doubt it is true that man's ability to be his own timepiece has lessened directly with the increase in the number and variety of mechanical devices for telling time. Perhaps the learned people know just what go to make up the sense of time in the mind.

One may be all wrong when he says it seems to him that the power to carry the time in one's head is the result of the power of noting the changes in nature and the association through long experience of these with certain times of day. They form a serious of very minute and subtle perceptions and recognitions-the difference in the quality of daylight at certain times of the day, the length of shadows, the recognitions of certain sounds as characteristic of one time of day more than another, a whole chain of observations and deductions that your mind is carrying on without your knowing it while you think you are entirely busy with other things. Through all this you carry along with you the sense of what the time must be. You don't know you know it, but you do, and you learn to trust you sense of

That is, if you have trained it. If you haven't, if you have always been in the habit of consulting a timepiece when you want to know the time, you'll have The ability to interpret the time of day from the looks of things about you is one that has to be trained. Lay aside your watch for six months and you'll find at the end of that time you will have precious little need for it. The few primitive people that have been missed by the enterprising missionary in his circling witness to the truth of this. They can tell time as accurately as any timepiece could tell them. There is no doubt if it was any gain to the Saxons when King Alfred began to put his candles into lanthorns as mechanical aids to measuring time. Doubtless their brains were their time pieces.

Blood Will Tell.

Of course it will-that is if it is good healthy blood. It will grow in the cheek, and tell the story of perfect physical health. If it does not, if the complexion is devoid of color, the muscles weak and flaccid, something is wrong, and something ought to be done about it at once, for in such cases delays are dangerous. For torpid liver, "biliousness," and the thousand and one ills to which these conditions of the system lead, there is no remedy in the world equal to Dr. Prierce's Golden Medical Discovery. Boils, pimples, eruptions, scrofulous sores, salt-rheum, and all kindred diseases are

She Could Wait.

A Texas lady sent her colored servant over to the house of a sick neighbor. "Mrs. Smith saunt me over to ask how your husband am comin on dis mawn-

"Very bad, indeed. The doctor says he may die any minute," was the reply.
"Den I reckon I had better wait a little while, as I hasn't got nuffin else to

CCHOFIELD'S NEW

HARNESS HOUSE.

We extend a most cordial invitation to our atrons and the public, in general, to witnesse of the

GRANDEST DISPLAYS OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the lerge warm ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harpe. Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 29x60 added makes it the largest establishment of its kind outside

leather. Our factory now occupies a room 16x74 feet and the store 29x60 added makes it the largest establishment of its kind outside of Philadelphia and Pitts burg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (!) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand. SETS OF LIGHT HARNESS, prices from 50 SETS OF LIGHT HARNESS, prices from \$5.00 to \$15.00 and upwards, LARGE STOCK OF HEAVY HARNESS per set\$25.00 and upwards, 500 HORSE COLLARS from \$1,50 to \$5.00 each, over \$100.00 worth of HARNESS OILS and AXLE GREASE, \$400 worth of Fly Nets sold cheap

\$400 worth of Fly Nets sold cheap
\$150 worth of whips
from 15c to \$3.00 each,
Horse Brushes, Cury Combs
Sponges, Chamois, RIPING
SADDLES, LADY SIDE SADDLES
Harness Soap, Knee Dusters, at low
prices, Saddlery-hardware always on hand
for sale, darness Leather as low as 25c per
pound. We keep everything to be found in a
FIRST CLASS HARNESS STORE—no changing over 20 years in the same room. No two FIRST CLASS HARNESS STORE—no changing, over 20 years in the same room. No two shops in the same town to catch trade—NO SELLING OUT for the want of trade or prices. Four harness-makers at steady work this winter, This is our idea of protection to labor, when other houses discharged their hands, they soon found work with us.
