

## Colleges.

### THE PENNSYLVANIA STATE COLLEGE.

*Located in one of the most Beautiful and Healthful Spots in the Alleghany Region; Undenominational; Open to Both Sexes; Tuition Free; Board and other Expenses very low. New Buildings and Equipment.*

LEADING DEPARTMENTS OF STUDY:

1. AGRICULTURE (Two Courses), and AGRICULTURAL CHEMISTRY; with constant illustrations on the Farm, and in the Laboratory.
  2. BOTANY AND HORTICULTURE; theoretical and practical. Students taught originally with the microscope.
  3. CHEMISTRY; with an unusually full and thorough course in the Laboratory.
  4. CIVIL ENGINEERING; ELECTRICAL ENGINEERING; MINING; and ELECTRICAL ENGINEERING. These courses are accompanied with very extensive practical exercises in the Field, the Shop and the Laboratory.
  5. HISTORY Ancient and Modern, with original investigation.
  6. INDUSTRIAL ART AND DESIGN.
  7. LADIES' COURSE IN LITERATURE AND SCIENCE. Two years complete facilities for moral, mental and spiritual development.
  8. LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course.
  9. MATHEMATICS AND ASTRONOMY; pure and applied.
  10. MECHANIC ARTS; combining shop work with study; three years' course; new building and equipment.
  11. MENTAL, MORAL AND POLITICAL SCIENCE; Constitutional Law and History, Political Economy, &c.
  12. MEDICAL SCIENCE; instruction theoretical and practical, including each arm of the service.
  13. PREPARATORY DEPARTMENT; Two years carefully graded throughout.
- Wintersessions January 7th, 1891; Spring term April 1st, 1891; Commencement week, June 28th to July 2nd. For Catalogue or other information, address,
- GEO. W. ATHERTON, LL.D.,  
President,  
27 25 State College, Centre County, Pa.

## Coal and Wood.

### EDWARD K. RHOADS,

Shipping and Commission Merchant,  
—DEALER IN—

ANTHRACITE,

BUTUMINOUS &  
WOODLAND

—C O A L —+

GRAIN, CORN EARS,

SHELLED CORN, OATS,

STRAW and BALED HAY,

KINDLING WOOD,

by the bunch or cord as may suit purchasers.

Respectfully solicits the patronage of his friends and the public, at

—HIS COAL YARD—

near the Passenger Station. Telephone 712.

## Hardware.

### HARDWARE AND STOVES

—AT—

—JAS. HARRIS & CO.'S—  
—AT—

LOWER PRICES THAN EVER.

NOTICE—Thanking our friends for their liberal patronage, we desire to express our determination to merit a continuance of the same, by a low scale of PRICES IN HARDWARE ...

We buy largely for cash, and doing our own work, we afford a call cheaper and give our friends the benefit, which we will always make it a point to do.

—A FIRST-CLASS TIN SHOP—

CONNECTED WITH OUR STORE.

ALL OTHER THINGS DESIRABLE IN HARDWARE FOR THE WANTS AND USE OF THE PEOPLE, WITH PRICES MARKED SO THAT ALL CAN SEE,

—AT LOWEST PRICES—

For Everybody.

—JAS. HARRIS & CO.,—  
BELLFONTE, PA.

## Machinery.

JENKINS & LINGLE,  
[Successors to W. P. Duncan & Co.]

BELLFONTE, PA.,

IRON FOUNDERS

and

MACHINISTS.

Manufacturers of the

VULCAN CUSHIONED POWER HAMMER

BELLFONTE TURBINE

WATER WHEEL,

STEAM ENGINES, SAW MILLS,

FLOURING MILLS,

ROLLING MILLS, &c., &c.,

Works near P. R. R. Depot.

## Medicinal.

### LOST 6 CHILDREN BUT SAVED THE SEVENTH.

By the Aid of Hood's Sarsaparilla—Read What Mr. Hubert of Lawrence, Says.

"Ten years ago our child was born. Having lost six children we were naturally anxious as to the health of this one. What was our dismay and sorrow to find that she was apparently doomed to the same fate as the others. She seemed to have little strength as a baby, and did not improve as she grew older. When about 2½ years old she began to have

#### Fainting Fits.

dropped wherever she happened to be. At these times she would turn black and appear at the point of death. Doctors told us she was in a bad way from heart trouble.

Nothing that we gave her did any good until desperation, we began giving her Hood's Sarsaparilla. She gradually began to improve, the fainting fits became less and less frequent, and finally ceased entirely. Her general health improved, until at the end of a year, having taken seven bottles, we stopped giving it to her. At this time she was 4 years old, and although anxious lest the trouble might return, we ceased to worry, she seemed so well. She is now 10 years old and is as

#### HEALTHY AND RUGGED

a child as you will find anywhere and has never shown any indication of a return of the heart difficulty. During the past 6 years, perhaps she has taken 3 bottles in all, we only giving it to her irregularly at times when she was not strong.

—W. H. HOOD, Agent and Modern, with original investigation.

—INDUSTRIAL ART AND DESIGN.

—LADIES' COURSE IN LITERATURE AND SCIENCE. Two years complete facilities for moral, mental and spiritual development.

—LANGUAGE AND LITERATURE; Latin (optional), French, German and English (required), one or more continued through the entire course.

—MATHEMATICS AND ASTRONOMY; pure and applied.

—MECHANIC ARTS; combining shop work with study; three years' course; new building and equipment.

—MENTAL, MORAL AND POLITICAL SCIENCE; Constitutional Law and History, Political Economy, &c.

—MEDICAL SCIENCE; instruction theoretical and practical, including each arm of the service.

—PREPARATORY DEPARTMENT; Two years carefully graded throughout.

## Democratic Watchman.

Bellefonte, Pa., Oct. 30, 1891.

#### Beats it Looks Very Victuous.

#### A Woman's Opinion of Women Who Ride Bicycles.

I think the most vicious thing I ever saw in all my life is a woman on a bicycle, and Washington is full of them. I had thought that cigarette smoking was the worst thing a woman could do but I have changed my mind, says a woman correspondent of the St. Louis Republic. I don't know why I think it vicious, it is just one of those queer things I cannot explain, but if I had a boy who was going to be married, and he came to me and said: "Mother, she is the nicest girl in the world and she rides the bicycle with me," I should say, "if forbid the bans," and I should get in a church and do it, and I would be the worst mother-in-law that ever lived until the bicycle was broken. You don't like it I do. It may seem to you jaunty, but I doubt it. But how would you like to see your mother ride a bicycle? Or how would you like to see your grandmother ride a bicycle? Don't you think it is just making her a little less girlish, if she is young enough to be called Minnie? Don't you think it is making her a little less sweet if she is called Lily? And don't you think it is taking away a bit from her dignity if you call her Dorothy? I think you do. You can imagine a girl, who for you can call Jack, or Tom, or Dick, on a bicycle, but not a woman you would want to kneel down before and say: "Bless me before I go out into the world." You can ask that of a woman who has committed a woman's follies, but cannot ask it of a woman whom you have seen in a divided skirt on a bicycle. Oh, no! Of course that is just what you and I think; but, after all, what you and I think, and what some other man's wife thinks, and what some other woman's husband thinks, and what all the rest think, is what after all decides what is right and wrong in the world.

#### LIFE OF STREET-CAR HORSES.

The average life of horses on the New York street-car lines varies greatly. On the Broadway and Seventh-ave. line, where the work is extremely heavy and every car carries from three hundred to five hundred passengers daily, three years is about as long as a horse can stand it. On the Third-ave. line, where long trips are made and heavy work is required, the average life of the horse is three and one-half years. Both of these companies by the best horses in the market and have stringent rules against the overworking of horses, but the travel is heavy and competitor has forced the best possible speed. These two companies have found, therefore, that while a few years ago a horse was good for five or six years service, the changing conditions have reduced this to three and one-half years at the best.

On the Sixth-ave. line work required of horses is not so wearing. President Burtis said that the life of their horses averaged five years. "It is no trouble to dispose of our worn-out animals," he said. "Nearly all the horses which we sell because their feet give out are good for many years of satisfactory work in some other capacity."

On three or four of the less important street car lines in this city horses are driven seven years and in some instances have been known to do good work for eight or nine years, but at the end of that time they are good for nothing else.

The Thirteenth-avenue line has a horse which the drivers say will never be too old to pull a street car. He has been on the track every day for the last seven years, and gets along as well now as the day he was brought from the country seven years ago. They call him "Old Cast Iron," because he seems never to wear out.—New York Tribune.

WM. A. CURL.

DR. B. J. KENDALL Co., Enoosburgh Falls, Vt.

Gents—in praise of Kendall's Spavin Cure I will say, that a year ago I had a valuable young horse become lame, and I sent him to Dr. B. J. Kendall, who was then in charge of the hospital. The horse was sent on three legs for three years when I commenced to use your Kendall's Spavin Cure. I used ten bottles on the horse and have worked him for three years since and has not been lame.

Yours truly,

EUGENE DEWITT.

GERMANIOWN, N. Y., Nov. 2, 1890.
