

# Democratic Watchman

Bellefonte, Pa., Feb. 26, 1892.

## The Red River Valley.

The Most Fertile Region in America.

The famous Red River Valley is by some students of such comparative values declared to be the third agricultural region, in point of fertility, in the world there being one Asiatic and one African valley in the foreground beyond it. This Red River Valley takes in many counties of the two Dakotas. It is prairie land of black soil that once formed the bed or deposit of an ancient sea. It reaches up into Canada, beyond Winnipeg, and is a great deal richer at its southern end in the United States than in Canada. This region pours its wealth of grain (or a great part of it) into Minnesota's twin cities, there to exchange it for merchandise. Other cereals and cattle are produced beyond this valley in the new States, and the valley itself returns the same commodities along with its wonderful output of wheat. In the extra fruitful year just closed—wonderful for its crops and for the world wide demand for breadstuffs from this country—the predictions that were based upon the results of the sale of the crops seemed fabulous. For instance, it was boasted that the farmers of the Northwest would make sufficient profits to pay off all their mortgages this year.

It is in the Red River Valley that one may hear of a farmer whose profits last season were close to \$30,000; it is there that men bought farms of great extent, expecting to pay for them in an indefinite number of years, and then paid for them out of the first crop raised upon the land, the wonderful yield of last year. Such is the region at the very doors of the twin cities of the Northwest. If Ceres left the Old World when the worship of her went out of fashion, it must have been to the valley of the Red River that she came. But if mythology is suggested at all by a study of this magnificent region, it is in the collection of the fabled river Pactolus, wherein King Midas washed off his power to turn into gold all that he touched. That may well have been the stream that once swelled from side to side of this valley, for, truly, its sediment retains little less than Midas's power.

We realize the majesty of agriculture as we never did before when we learn that in Minnesota and the two Dakotas the wheat crop alone was worth one hundred and twenty millions of dollars last year. Figure for yourself the estimated yield of one hundred and fifty millions of bushels selling at 75 cents to 82 cents a bushel. In what story of Fairyland is there an account of a literal field of gold to equal that?

There are 8,832,000 acres in the valley, and less than a quarter of it was in crop last year. If every acre were put into wheat, there would be no market for the wheat; it would become a drug. As it is, of the portion that is under cultivation, only about the three-quarters were in wheat, and the yield of last year was estimated at from 30,000,000 to 37,000,000 bushels, grown at the average proportion of 20 bushels to the acre. The wheat crop of the valley, therefore, fetched about \$27,000,000. At 30 cents a bushel, each acre returned \$16. At a cost of from \$6 to \$8. Good land has produced 31 bushels to the acre, and good land farmed scientifically has yielded as high as 47 bushels to the acre, but 20 bushels is the average produce, and the farmer is entitled to a profit of \$10 an acre, with prices as they were last year. Matured farming will raise the yield to an average of 25 bushels an acre.—From "The Capitals of the Northwest," by Julian Ralph, in Harper's Magazine for March.

### A Snabbly Dressed Millionaire.

Mrs. Hetty Green has enjoyed the reputation for a long time of being the most shabbily dressed millionaire who wanders within the precincts of Wall street. Russell Sage wears expensive clothes, but they are not only neat but usually have the appearance of being recently purchased. The only millionaire rival Mrs. Green has in point of shabbiness is old Joe Robinson, who was one of the contractors engaged in the construction of the Union Pacific Railroad and is said to be worth four million dollars. He does not wear any overcoat, because it represents an expenditure of money he is not willing to make. His whole outfit, including hat and boots, would not command two dollars and a half at any well-regulated pawnshop.

He is one of the few stingy millionaires who are perfectly good-natured in their stinginess. He is not cross or crabbed, but greets everybody he knows with the utmost geniality. He and Sidney Dillon are very good friends, but neither the arguments of Mr. Dillon nor of any one else can spur him on to invest money in a wardrobe. The story is told of his seeing a friend on the street not long ago, in conversation with a gentleman whom he did not know. He went up to the two men and was about to speak, when the man who was a stranger to him turned and said he was very sorry but he had no small change. The friend explained the situation, although he was somewhat embarrassed, and the stranger extended profuse apologies to the millionaire.

### How to Test a Horse.

When examining a horse with a view to purchasing, always have him a steep or stony descent at the end of a halter and with no whip near him. Many horses when brought out of the stable are excited by the presence of strangers and become still more so at the sight of a whip. A slight lameness may therefore be momentarily overlooked by the horse himself, just as a man, under strong excitement, will sometimes forget a sore foot. Leading the horse down a slope will show any defect in his forequarters, and running him back will develop any weakness that may exist in his hind legs. Horse sharpers know these facts as well as anybody, so if the horse is in the least affected they will generally avoid a bill when showing off a horse to a probable purchaser.

## Interesting Odds and Ends.

Scrapes Picked Up Here and There Which Contain Worlds of Information for All.

China has 400,000,000 people and only 40 miles of railroad. Shad are used as money in many of the North Sea islands. For every foot of stature a man should weigh twenty-six pounds. Thirty-four pounds of raw sugar will make twenty-one pounds refined. One of the smallest coins in size is the new centurored gold piece of Guatemala. In one California county 3,172 jack rabbits were killed in seventeen days recently.

Wax came into use for candles in the twelfth century, and wax candle were esteemed a luxury in 1300, being but little used. In twelve years the city of Paris has expended \$270,000 on statues and \$85,000 on ornamental fountains. Ninety per cent. of the freshmen and sophomore classes in Yale are said to favor the substitution of science or modern language for the classics.

The new census of the Ponobscot Indian tribe show the tribe to number 336 a gain of nine during the year. They raised 3,500 bushels of potatoes in 1891. The really did clear a million and a quarter in the recent deal in Reading Mr. Wanamaker could well afford to make another handsome contribution to the Harrison campaign fund.

On the three evening during the exercises dedicated to the World's exposition buildings, October 11, 12, and 13, fireworks to the value of \$25,000 will be displayed. The contract has already been let. Owing to the great cost of coal in Italy, manufacturers there are using lignite, two varieties of which are abundant in that country. Recent experiments prove that lignite is a probable substitute for coal.

They say that Thomas Nast, the great cartoonist, grows younger as the years pile up their burden on his shoulders. In his New Jersey home at Morristown he is some times seen cantering about on horseback like a boy. If Gov. Bois feel his ears tingle nowadays he should be appraised of the fact that every Democratic paper in the land is saying nice things about him, and even the Republican journals assent, by their silence, to his praise.

The telephone line between Manitowish and Pike's Peak has just been completed a distance of about nine miles. It is the highest telephone in the world. The Peak is 14,115 in height, while the village of Manitowish is 6,563 feet above thesea. A chain shot was dug up the other day in a street in Seattle, Wash. It is supposed to be one of the missiles thrown from the guns of the United States sloop Decatur at the time of the Indian engagement that occurred there in December, 1855.

Divers in the clear waters of the tropical seas find that fish of different colors when frightened do not all dart in the same direction, but that each different kind takes shelter in that portion of the submarine growth nearest in color to that of the fish.

Washington's old headquarters at Valley Forge will soon pass into the hands of a patriotic association. A body of patriotic Philadelphians, headed by Postmaster General Wanamaker, and the Daughters of the Revolution both desire the property. Within the Antarctic circle there has never been found a flowering plant. In the Arctic regions there are 762 different species of flowers. Fifty of this number are really polar flowers of varied colors; the remainder are almost colorless, being mainly of a yellowish hue.

It may be mentioned that a cigarette smoker send no fewer than 4,000,000,000 of dust particles, more or less, into the air with every puff he makes. What, then, must be the state of the air in close smoking rooms, where a dozen are puffing away as hard as they can? French scientists are puzzling over a spider which was discovered in a cavity in a stone. It is estimated that the stone must be at least 4,000 years old; this notwithstanding, however, the spider is quite lively and very youthful in its antics. It is blind and has no mouth.

Seth Lowe, the youthful President of Columbia College, is a man of somewhat portly figure, with the general appearance of a prosperous merchant or banker. His face is smoothly shaven, except for a short mustache, and a correspondent says there never was a stern or surly expression on it. The seat of the coronation chair of England, Queen Victoria's "throne," is made of a monster slab of sandstone. Brewer's "Dictionary of Phrase and Fable" says, "It was brought from Scobe by Edward I. and is said to be the stone upon which Jacob rested his head the night of his famous vision."

The demand for platinum for use in science has raised its value to three-quarters that of gold. Three years ago it was worth \$80 a pound. It now costs \$160, or 11 times more than silver. It is found in small quantities in Peru, Columbia, Brazil, the Ural Mountains, California, Oregon and Borneo. The yearly output has never been more than four tons and is now three.

Of the 162,000,000 people, or thereabout, who are estimated to have been using seven languages in the year 1801, the English speakers were less than 13 per cent., while the Spanish were 16, the Germans 18.4, the Russians 13.9 and the French 19.6. This aggregate population has now grown to 400,000,000, of which the English speaking people number close upon 125,000,000. From 13 per cent. we have advanced to 31 per cent.

Chinamen's hats merely rest on the top of the head and are kept in place by a cord or band beneath the chin. The cost varies indefinitely. The hat proper ranges from \$1 to \$4; the peacock's feather from 30 cents to \$2, and the buttons from 60 cents to \$5,000. The high priced buttons are cut from rubies, caruncles, and garnets, and set in handsome cases of solid gold. Li Hung Chang, the Chinese premier, owns one said to be worth \$10,000.

## A Queer Way of Choosing a Wife.

It has remained for a young clergyman, a missionary, to take the palm for phlegmatic choice of a wife. Having decided that it would be advisable to be accompanied to the mission field by a wife, he undertook to select her with his head not thinking it necessary that his heart need be considered in the matter. He first made a list of attributes desirable in the wife of a missionary; then he went about with the different young women of his acquaintance, he watched for the development of any characteristics corresponding with his record.

When he discovered any he marked a point opposite the young woman's name. When the time came to make the choice he offered himself to that young woman who had achieved the highest percentage in this unique table, and, alas! it was accepted. The only redeeming feature of the transaction is his admission made some years after his wedding to a friend, "My wife," he says, "was never courted before her marriage, but she has been assiduously so."—New York Times.

## The Torchlight Procession.

Detroit Free Press. There were only two people in the saloon at that hour besides the white apron behind the bar. One of them was three-fourths drunk and four-fifths asleep in the corner, and the other, with a blistering red nose, was pacing up and down the sawdust in front of him. He followed the movements of the walker with half open unsteady eyes for nearly half an hour and then he called the barkeeper. "I shay, barkeep," he muttered as the gentleman came over. "I shay." "Well, what is it, drunkie?" inquired the barkeeper, pleasantly. "I shay, longsh thash torsh light p'chesun goin' 'u be marshin' through here? I wan' t' go to sleep."

## Would You Be Attractive?

You must be healthy. Would you be healthy, always keep within reach ready for any emergency. Dr. Pierce's Pleasant Pellets, the perfection of physics! Headache, biliousness, constipation, a coated tongue, always indicate a torpid liver. These magical Pellets act directly upon the liver—the fountain-head of many ills—correcting all disorders, driving out all impurities, stimulating healthy action. The best Liver Pills; mildly giving all the benefit and none of the discomfort of other pills.

## The Best Way.

"And now," continued the photographer to his student, "please look pleasant." "To achieve that desirable end suppose you lend me five dollars." "I have found out a gift for my fair." Naturally it may be supposed it is a flower for her hair, a diamond for her finger, or a box of candy, but it far better than these. It is a bottle of that famous Salvation Oil to cure her neuralgia, pretty dear.

The New Jersey young lady who suffered so much from hiccoughs has been cured by inhaling four to six drops of nitrate of amyle placed on a handkerchief. Hereafter, instead of the funny men making Oldsack indicate his condition by the time honored "hic" they will have to work in some nitrate of amyle.

## Business Notices.

### Children Cry for Pitcher's Castoria.

When baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

### Philadelphia Card.

EDWARD W. MILLER, WITH WOOD, BROWN & CO., DEALERS IN HOSIERY, NOTIONS, WHITE GOODS & 429 Market Street, PHILADELPHIA, PA.

### MUTUAL LIFE INSURANCE COMPANY OF NEW YORK.

WHEN solicited to insure in other companies remember that the Mutual Life Insurance Company of New York, is entitled to your first consideration since it holds the foremost place among the Life Insurance Institutions of the world, and offers superior advantages in all the features of business, together with unequalled financial security.

1. It is the OLDEST active Life Insurance Company in the country.
2. It is the LARGEST Life Insurance Company in the world.
3. It is the STRONGEST financial institution in the world, its assets amounting to \$150,000,000 with a surplus of \$10,000,000.
4. It is the SAFEST company in which to insure, being conservative in its management and careful in the selection of its risks.
5. It is the CHEAPEST company in which to insure. It has returned in dividends to its policy holders over \$93,000,000, thus reducing the actual cost of insurance to a minimum.
6. It is the BEST company in which to insure as it combines all the advantages of age, large and select membership, financial strength, absolute security, and the cheapest insurance that is possible under any contract which has a definite value to the beneficiary.
7. It has no stockholders to claim a share of the profits. Its assets and surplus all belong to the insured.
8. Its ratio of expenses to receipts is less than that of any other company. Its interest receipts alone have exceeded its expenses by \$55,000,000 and its death claims by \$11,000,000.
9. Its new forms of Policies containing the Distribution Survivorship principle, together with its guaranteed seven per cent. Consols combine more advantages with fewer restrictions than any other investment insurance contract ever offered. It consolidates Insurance, Endowment, Investment and annual Income in one Policy giving protection to the family and a future income to the insured, if living. A guaranteed insurance and income is named in the policy.
10. It places no restrictions upon travel, occupation or residence after two years.
11. Being Non Forfeitable and Incontestable it provides a legacy and not a lawsuit.
12. All claims are paid immediately upon acceptance of proofs of death.

For further information apply to J. A. WOODCOCK, Dist. Agt. Office on High St., opposite Court House, Bellefonte, Pa.

## Insurance.

### J. C. WEAVER, GENERAL INSURANCE AGENT, Bellefonte, Pa.

Policies written in standard Cash Companies at lowest rates indemnity against Fire, Lightning, Tornado, Cyclone, and wind storm. Office between Reynolds' Bank and Garman's Hotel. 34 12 1y
