Democratic Watchman. Bellefonte, Pa., April 8, 1892. **Farm Notes**

Those who profess to have tried the experiment claim that the harness is superior to the yoke for an ox. In the Southern States the harness is often used by some.

The tools on the farm should all be sharpened now. No good workman uses dull tools, and the farmer is no exception as he cannot afford to lose time at this season of the year.

Experiments made for the purpose show that the copper sulphate does not injure the soil when it is used for spraying, as plants grew vigorously in a soil containing one per cent. of copper sul-phate, in solution, the experiments being made on small plots.

Plenty of manure is essential to all crops, but there never was a time, on any farm, when it did not pay, and pay well, to use fertilizers that are purchas ed bring something to the farm and add to its fertility. They also hasten crops owing to the greater solubility of the different elements composing them.

A variety of stock calls for a variety of food. Feeding corn exclusively to all classes of stock is extravagant, even when corn is cheap, as it may not satisfy the requirements of the animals The best results are obtained from a variety of food, as it supplies all necessities and, as a consequence, cheapens the cost.

Weeds should be fought from the start. Do not wait until they are well under way, but kill them when they are young. The cultivator will kill the weeds and benfit the crop at the same time if it is used more frequently It is safe to assert that the harrow and cultivator are not used as much as should be done. They are really la bor-saving implements.

Parsley makes a pretty edging for borlers, and can be made both orna-mental and useful. The seed is slow in germinating that the grass takes pos-session of the ground before the young parsley plants appear. Sow the seed in a row, and keep the grass out until the plants get well started. In the fal! or succeeding spring transplant portion, of the parsley bed to the desired location, as the plants will soon spread and protect themselves.

Disease is not always avoided, and it sometimes appears when least expected. Filth is the source of disease in a majority of cases. To keep a hog on fermenting slop and to compel it to eat the vilest food that can be procured is to subject the animal to cholera. Another source of disease is in-breeding. When farmers learn that by procuring males of different blood from their stock, they will also learn that hardiness and vigor also been gained.

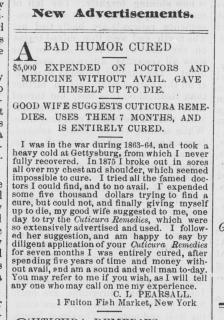

The war against insects and fungi must begin when the trees are in blossom. In fact it is now deemed essen-

A clothing dealer, in Boston, advertised all-wool pantaloons for \$2, advising the public to make haste and secure the great bargain, saying : "They will not last long." Probably they would not Neither will your health last long if you don't take care of it. Keep Dr. Pierce's Pleasant Pellets in your house. They are indispensable to every family, as they positively cure biliousness, with its endless train of distressing ailments-sick headache, irritabiliiy, constipationdizziness and indigestion ; a marvelous specific for liver and kidney troubles and a pure vegetable compound. They are sugar-coated, the smallest pills made and the best, because they do all they promise. All druggists sell them, and the proprietors guarantee them, and re-fund the price if they fall.

Too Careless With the English Lan-

guage.

---In New South Wales 12 banks and financial syndicates own about 45,-000,000 acres of land, one institution alone owning 8,500,000.

UTICURA REMEDIES.

These grateful testimonials tell the story of

These grateful testimonials tell the story of great physical suffering, of mental anguish, by reason of humiliating disfigurations, and of threatened dangers happily and speedily ended, by the *Cuticura Remedies*, the greatest Skin Cures, Blood Purifiers and Humor Reme-dies the world has ever k nown. *Cuticura Resolvent*, the new Blood and Skin Purifier internally (to cleanse the blood of all impurities and poisonous clements), and *Cuticura Soap*, an exquisite Skin Purifier and Beautifier, ex-ternally (to clear the skin and scalp and re-store the hair), cure every disease and humor of the skin, scalp, and blood, with loss of hair, from infanoy to age, from pimples to scrofula, when the best physicians, hospitals, and all other remedies fail.

Sold everywhere. Price, CUTICUEA 50c.; SOAP, 25c.; RESOLVENT, \$1.00. Prepared by the Por-TER DRUG AND CHEMICAL CORPORATION, Boston. Sond for "How to Cure Skin Disease," 64 pages, 50 illustrations, and 100 testimonials.

DIMPLES, black-heads, red, rough, chapped. and oily skin cured by Cu-ticura Soap.

NO RHEUMHTIZ ABOUT ME!

Electric Belts. R. JUDD'S ELECTRIC BEL Short time only I will send my Electric Belts and Trusses. ON 6 MONTHS If You Wish Health, Address DR. C. B. JUDD, Detreit, Mich. TRIAL. ON 6

My Electric Belts are the lightest, simplest, most durable, and gene rated five times more Electricity than any other. Superior to any Box Battery made. A Battery and Belt combined, and produces sufficient Electricity to produce a shock, and should be used by male and temale, old and young. As much of a household necessity as sugar, tea and coffee. Not only a cure for disesse but also a preven-tive. MONTHS TRIAL.

BUTTE CITY, MONT., Jan. 16, 1892.—Within the last eighteen months we have been taken in over \$1,000 for Judd's Electric Belts and Trusses, and have never had a single complaint, but have had many compliments passed upon them. My reference, Banks and Mercantile Agencies. 37 13 ly n r

PERRINE, 31 36 1y 38 N. Third St., Philadelphia. 407 215 92 Saddlery. 415 200 400 11 S^{CHOFIELD'S} NEW 12 of 200 HARNESS HOUSE. We extend a most cordial invitation to our patrons and the public, in general, to witness one of the 20 2 of 199 GRANDEST DISPLAYS OF Unknown. Light and Heavy Harness ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclu-sively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 20x60 added makes it the largest establishment of its kind outside 70 371 290 123 130 320 250 the largest establishment of its kind outside of Philadelphia and Pittsburg. of Philadelphia and Pittsburg. We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves. When other houses discharged their work-men during the winter they were all put to work in my factory, nevertheless the big (?) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the as-section that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story. 401 300 413 46 150100 100 Wm. Cook. 383 400

COMMISSIONERS SALE OF UN-SEATED LANDS. In pursuance of an Act of Assembly passed on the 29th day of March; A. D. 1824, the Com-missioners of Centre county will sell at Public Sale, at the Court House, in the borough of Bellefonte, on Wednesday, the 13th day of April, A. tial to commence the work of destruc-tion before the winter passes away, as the sposes may be in the ground and may havin growth before their pre-tage of the spose of the s may begin growth before their presence is known, according to the con-ditions for development. While some kinds of fruit may be treated with the solutions used as preventives as late as May, yet the sooner spraying of the trees, vines and soil begins the better,

For many years it was unsettled whether plants derived aitrogen from the atmosphere, through the agency of the leaves, or from the soil entirely. Scientists have, however, by growing plants in sterilized soil, tully demon-strated as a fact that the air provides a portion of the required nitrogen to plants, which is taken by the leaves, but some plants have greater capacity for apprepriating nitrogen than others. Clover, being a plant that draws upon the atmosphere for nitrogen, consequently enriches the soil by leaving a large proportion of its nitrogen in the roots of the plants.

The use of the sprayer and the application of the various remedies received general attention last year, yet there are large numbers of fruit growers who have not fully realized the importance of such work; while many who were willing to adopt any method suggested made the mistake of deferring the work until too late in the season. To meet with complete success, it is important that the spores be destroyed before they find lodgment on the plants, as the soil may be a fruitful source from which the spores come. Hence the best fruit growers spray the trees, vines and the soil also several times before the blossoms appear and continue the work after each rain until the danger is over.

Science has made known that the diseases of fruit are really due to the ravages of minute microscopic organisms, which affect nearly all varieties of fruit, and in addition to this the desof fruit, and in addition to this the des-tructive work of well-known insects must be prevented. The grape is at-tacked by rot and mildew, the pear is affected by two kinds of blight apple seah destroys the apple, the tometo us scab destroys the apple, the tomato is blighted, the rot attacks the white and scab destroys the apple, the tomato is blighted, the rot attacks the white and sweet potato, and rusts and smelts seem to have a wild range. Should the plants escape these pests the rose-bug, potato beetle, curculio, codling moth, currant worms, and numerous moth, currant worms, and numerous other insects are ready to rob the fruit grower of his plants and truit, the only remedy in his power being to begin early, and by the use of fungicides and insecticides, keep his enemies in check or possibly destroy them. Discussed arising free.
