#### NEW PEAS.

To give measurable values to the trials of new peas it is of course necessary to cultivate standard varieties under the same conditions for comparison. No attempt of this kind was made last summer, but it is stated, as a matter of judgment, that the preference is given to Heroine and Shropshire Hero over any similar intermediate wrinkled pea previously tried, while Mayor, for a somewhat later pea, is worthy of trial.

The varieties tested were Shropshire Hero, Heroine, Mayor, Admiral, New Dwarf Prolific and Nott's Excelsior. All were planted April 1. Following are notes made concerning them: Shropshire Hero-Vines 21 qy 3 feet; vigorous like those of Stratagem; large leaves: extra large pods; about eight

large seeds to the pod. Prolific, intermediate. Heroine-Vines not quite so tall as Shropshire Hero same foliage; matures same time; pods as large; better fill-

of the Stratagem order. Mayor-Vines 21 feet; ripens atter Heroine and Shropshire Hero two or three days; pods medium sized not

well filled. Admiral-It may be said for this that it bears for a long time, the later pods being exceptionally well filled, so that the pod is crowded as the catalogue illustrations are often made to appear; the pods, though under size, often hold eight small sized seeds; vines five feet tall, branching and thrifty. It may further be said that The variety seems to be thoroughly fixed and carefully selected.

Nott's Excelsior is reported as the best of the early dwarf wrinkled peas Vines eighteen inches, more productive than Wonder or Little Gem. As fair size, averaging six seeds of fair

## CUTTING AND CURING CLOVER.

Be sure and cut the clover early, before the seed has formed, Clover is a biennial, one of those plants that begin to die when once it has produced seed. Here is the point: By cutting before the seed forms you can cut two crops in one season and still keep the root alive. At least it will not die because its purpose has been fulfilled. This year we shall need all the hay we can get. Skillful management of our clover meadows will give us a large additional yield of hay and have the roots right for next season. That wise farmer, the late Hiram Smith, once showed us a field of medium clover nine years old from which he had taken that year fully three tons per acre in three cuttings. But there is another great advantage in early cutting. The hay for milk and better purposes is worth double that of the ordinary grade, says as good authority as Hoard's Dairyman.

The thick stems of a rank growth of clover make it hard to cure by the or dinary means of exposure to the sun. Long before these stems are dried through the tender, thin leaves will be shriveled up and broken off. This necessitates curing clover by heating and with as little stirring as possible, and that only when freshly cut. American Cultivator says that the best way is to follow the mower with the hay tedder with only the least interruption- Then as soon as the leaves have dried rake the clover and put it in cock. It may seem dry because the leaves will rustle, but leave it twentyfour hours, or, if need be, thirty-six or forty-eight. Then open and it will be found moist inside. The moisture has come from the stems, and when this has dried off the hay will be cur- the right nostril, which was closed for ed sufficiently to go into the barn or stack. The slight heating which hay thus gets out not only does not injure it, but really makes it more palatable to stock.

#### On the Threshold.

Standing at womanhood's door is she, Clad in her virginal purity, A creature fair as the lilles be. And, like the liles, alas, how frail; They are borne to earth when the storms

prevail,
And their life goes out in the summer gale
When we see a frail and lovely creature, standing on the threshold between girlhood and womanbood, we shiver with a fear of what may be, because we have seen so many succumb at this critical period of life. What is needed at this time is a tonic and invigorant—something that will promote pro-per functional action of the females organs. The only remedy to be depended on is Dr. Pierce's Favorite Prescrip-

This unequaled medicine, which cures diseases peculiar to woman, is especially valuable at the period when the girl crosses the threshold of womanhood. Used at such a time, it never fails to produce a most beneficial result and many a fragile girl has been tided over one of life's most trying periods by it.

#### Identification.

This is a most laughable game. Half the company try to guess the names of the other half by the appearance of their fingers, eyes, ears or noses, the rest of their persons being concealed. Divide the players into two equal groups and place them in an adjoining rooms. Then stretch a sheet having a small hole in the centre across the communicating doorway, taking care that it reaches quite to the floor, and is high enough to cenceal the tallest player. Side No. 1 leads, and No. 2 is to guess the names of the persons who appear at the aperture. Each member of No. 1, in turn puts a finger through the hole, and one guess is allowed each player of No. 2. As the guesses are made they are recorded, and when all the players of No. 1 have been guessed at, the person in No. 2 who has made the greatest number of successfu! guesses is declared the winner. Side No. 2 should also keep a record of those who appear at the hole, so there will be no mistake as to the order of the appearances. The parties then change places and the game proceeds as before. Noses eyes, ears or hands may be displayed at the aperture instead of fingers. Sometimes a single guesser is appointed, and as soon as he makes a successful guess the player thus "identified" take his

DIE. CURED IN SIX WEEKS BY
CUTICURA REMEDIES.

I have been afflicted for twenty years with an obstinate skin disease, called by some M. D.s Psoriasis, and others Leprosy, commencing on my scalp; and, in spite of all I could do, with the help of the most skifful doctors, it slowly but surely extended, until a year ago this winter it covered my entire person in the form of dry scales. For the last three years I have been unable to do any labor, and suffering intensely all the time. Every morning there could be nearly a dustpanful of scales taken from the sheet on my bed, some of them half as large as the envelope containing this letter. In the latter part of the winter my skin commenced cracking open. Itried everything, almost, that could be thought of, without any relief. The 12th of June I started West, in hopes I could reach the Hot Springs. I reached Detroit, and was so low I thought I should have to go to the hospital, but finally got as far as Lansing, 'Mich., where I had a sister living. One Dr. — treated me about two weeks, but did me no good. All thought I had but a short time to live. I earnestly prayed to die. Cracked through the skin all over my back, across my ribs, arms, hands, limbs; feet badly swolled; toe-nails came off; finger-nails dead, and hard as a bone; hair dead, dry and lifeless as old straw. O my God! how I did suffer. My sister. Mrs. E. H. Davis, had a small part of a box of Cuticura in the house. She wouldn't give up; said, "We will try Cuticura." Some was applied on one hand and arm. Eureka! there was relief; stopped the terrible burning sensation from the word go. They immediately got the Cuticura. Cuticura Resolvent and Soap. I commenced by taking one tablespoonful of Resolvent tree times a day, after meals; had a bath once a day, water about blood heat; used Cuticura Soap freely; applied Cuticura morning and evening. Result; returned to my home in just six weeks from the time I left, and my skin as smooth as this sheet of paper.
