## Farm Notes.

Japanese fruits have proved of great value in several sections of the United States.

Prof. J. T. Burrill, of Illinois, believes that a class of pear trees can be originated that will be free of blight.

Dairying in Sweden has had most remarkable development both as regards the quantity and quality of the products.

Giving the boy a pet animal to raise and care for as his own will do much in the way of giving him a preference for the farm.

The practice of whitewashing trees is not injurious, but commendable. It destroys eggs of insects and insects themselves which the bark harbors.

Pansies may be seeded in the beds this month. They will be well rooted before winter, and if mulched in the fall will start early and begin to bloom as soon as the spring opens.

Anthraxnose—rusty spots upon the pods—is a disease especially apt to affect the yellow wax varieties of snap beans. Dusting lime over the vines at the first appearance is the best remedy yet found.

Here is a little item of information that may be of help to anyone possessing a garden troubled by the cut worm. The best remedy is to put a piece of tin or stiff cardboard around each plant as it is set out.

Spinach is usually sown in the fall. One of the best and easiest methods is to broadcast the seed, but this must be done on land that is free from weeds. Spinach is a hardy plant and can stand quite a low degree of cold.

Thousands of trees exhaust themselves in the attempt to produce fruit, and only yield that which is worthless, when a small outlay for fertilizer would not only add more vigor to the trees, but also render the fruit saleable.

One canning company in Salem, Ore., has canned 50,000 pounds of strawberries this season. The value of the fruit is about \$2000. Half a dozen other canneries at different points have been preserving nearly the same amount each.

Sprouts growing up from the roots of trees take nourishment that should go to the trees. The sprouts are really weeds, and should not be allowed to grow even an inch. Unless kept down they not only injure the trees, but render them unsightly.

Calves that are weaned from their dams when but a few days old are not easily raised during the warm season. Give them fresh milk four times a day, and as soon as they can be taught to take it give them oatmeal gruel with a small quantity of linseed meal added.

When clover is sown in the fall, on light sandy soil, it is not injured from being thrown out by the frost as is the case on some kinds of clay soils. Sandy soils that will not produce clover, when the seed is sown in the spring, will often allow a good catch when the seed is put in during August or September.

Bagging young grapes as a protection against the rot, having been tried with success, the bagging of tomatoes has also been resorted to, the result being that the tomatoes were free from rot and the quality improved. The experiment is worth a trial next season. It is now too late to meet with full success.

It will require hand weeding in the rows of strawberries in order to have them clean, and the best time to pull weeds is when the ground is soft—just after a rain—as the grass, also, can be pulled out. The ground between the rows should be well cultivated in order to afford a loose soil for the runners.

In the wild state, or when specially developed to the beef type, the cow barely yields sufficient milk for the rearing of her young, but moulded along dairy lines, she becomes a source of great profit to the dairy farmer by converting coarse, cheap food into the more concentrated and valuable product—milk.

It is the opinion of an eminent authority that in a few years linen cloth will be as common and as cheap as cotton, on account of the new processes of rotting flax. The cultivation of bacteria for this purpose, which will do in a few hours what is now the work of weeks and months, is one of the ways in which science comes to the aid of agriculture.

Ventilation of the cellar is a problem. In the summer the windows may be kept open, but in building a barn or house, with a cellar underneath, ventilation in winter must be considered. Of all methods that have been tried that of a chimney with an open fireplace has been found the best, as a fire not only permits of riding the cellar of a portion of the moisture, but creates a draught which carries all foul air upward.

Why do the seeds of weeds endure the cold of winter and spring up early in the year to crowd out the crops? It is due to the fact that farmers first allow the weeds to seed instead of destroying them when they are young, and then burying the seeds with the plow in the fall, which covers them as a protection against frost. Having given the weed seeds a warm and secure bed for the winter the farmer brings them to the surface again in the spring, and thus affords the conditions most favorable to their germination and rapid growth.

## Mrs. Harrison's Improvement.

Thanks to the Mountain Air, She is Getting Better Every Day.

SARANAC LAKE.—The past week has been rather a quiet one at Loon Lake, where Mrs. Harrison is staying. The report that Mrs. Harrison had quick consumption and was dying was absolutely without foundation. Mrs. Harrison has improved wonderfully since her coming to the Adirondacks, so much so, indeed, that her physician did not worry upon leaving her for several days during the week and making a visit to Washington. When Mrs. Harrison first came to Loon Lake she was carried from the carriage to the cottage in the arms of her husband. She was then very weak and all was sadness for several days. The President walked about the cottage for hours at a time, apparently in a dejected mood. As soon, however, as Mrs. Harrison began to show signs of improvement, there was a marked change in the manner of the President, and he laughed and talked freely to all who approached him.

Mrs. Harrison still takes her meals in the cottage, while Lieutenant and Mrs. Parker and Mrs. Dinnick eat in a private dining room to the hotel. When the party first came to Loon Lake they were seated at a small table about in the centre of the general dining room. All went well and everybody was satisfied until several persons "who wanted to see the President" came along, and gazed with the greatest curiosity and wonder upon the Chief Executive.

They were so bold and offensive in their manner that Mr. Harrison requested to be given a private dining room, that the demonstration might not be repeated, for, as he said, "he did not think he should be treated as a dime museum freak, for he came to the mountains the same as any ordinary guest." The improvement in Mrs. Harrison's condition has been marked and as each day passes she approaches nearer the goal of good health.

## Multitudinous Testimonials.

Recommend Golden Specific as the Positive, Permanent, Economical and Harmless Cure for Drunkenness.

All advertised cures for the liquor habit do not cure. There are institutions for the cure of drunkenness, where men seeking to rid themselves of a habit may spend all that they have for "that which is not bread," and stand a good chance to return home physical and mental wrecks. Some have found the costly, deadly sanitarium the shortest cut to the asylum. To be pronounced cured is one thing, but to be cured is quite another thing. It's a poor remedy whose cure is worse than the disease. Golden Specific as a cure for drunkenness is recommended to thoughtful people for these reasons: It is a positively permanent cure and it is guaranteed. Not one known case of failure out of thousands of cases treated in every land and climate under the sun. On the diagnosis of drunkenness being a disease this remedy works like a charm, arresting the disease within a short space of time, whether in its incipient or advanced stage. Shattered nerves are rebuilt and restored to their normal condition. From the first dose a dislike for liquor is created, which, as the treatment advances amounts to an utter dislike for it. It's a cure whose ingredients have been known for years to the medical fraternity as being positively harmless. It is one of the greatest nerve restorers in the world.

It being a home treatment, and inexpensive, further recommends it. Surrounded by friends and relatives, at home the patient knowingly or unknowingly may find healing and health through his tea, coffee or food. In this way many wives, mothers and sisters have been instrumental in bringing about marvelous cures. It is strangely true that the majority of drinking men are averse to being healed of their infirmity. A \$3 box of Golden Specific by mail may bring joy to your heart and home. One box is often quite sufficient. On application to Golden Specific Company, Cincinnati, Ohio, a 48 page pamphlet on "Drunkenness Curable," full of valuable testimonials and information will be sent free.

From the St. Louis Globe Democrat.

The English ivy attains so great an age that in England they say it never dies. There are ivy stocks ten or twelve inches in diameter which are known to have been planted as slips six hundred to eight hundred years ago. An English winter is not severe enough to kill it, while the extreme moisture of the climate induces a luxuriant growth and a rich green which is surpassed by nothing in the vegetable kingdom. It is planted against old walls and often trained on screens to conceal unsightly buildings, and every where forms one of the most attractive features in an English landscape.

At Ellis Island.

Hagan. "How long do a man have to be in this country before he kin vote?"  
O'Toole. "That depends; if he comes late in November he might have to wait nearly a year."

—The ice man can make ice for you further than any one else.

"I would like to sound the praise of Hood's Sarsaparilla over the entire universe," writes Mrs. Longenecker of Union Deposit, Penn.

## Business Notices.

Children Cry for Pitcher's Castoria.

When baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

## Stimulants.

Why do physicians recommend Klein's Silver Age and Duquesne Rye Whiskies? Because, first, they are pure old and reliable—because they have prescribed them for their patients, and found that no other medicine would nourish and tone up the system so rapidly and thoroughly. Silver Age costs only \$1.50 per full quart, and Duquesne 1.25 per quart. The best hotels and dealers in liquors keep them for their choice customers. For sale to the trade generally by Simon Shloss, Williamsport Pa. 37-30

## New Advertisements.

EZEMA ON A LADY

STUBBORN CASE OF SKIN DISEASE COVERED HER FACE AND BODY. MANY DOCTORS BAFLED.

MARVELOUS AND COMPLETE CURE BY CUTICURA SIX YEARS HAVE ELAPSED AND NO RETURN.

A lady customer of ours (Miss Fannie Atwood of Caroline Depot, N. Y.) has been cured of a stubborn case of skin disease by the use of Cuticura Remedies. She remarks that her case baffled the skill of many well-known physicians. They unanimously pronounced it Eczema with Rheumatism lurking in the blood. Some predicted that any treatment would be completely ineffectual. Her case was so serious that she was unable to work, and she was almost blind from the pain. Six years have elapsed since the cure was performed, but her Rheumatism has since never returned, and she sees no symptoms of the return of it, and she sees no symptoms of the return of it, and she sees no symptoms of the return of it. Her case is a most remarkable one, and she is now a healthy and happy woman. She is now a healthy and happy woman. She is now a healthy and happy woman.

HASKIN & TOOD, Druggists, Ithaca, New York.

## CUTICURA RESOLVENT

The new Blood and Skin Purifier and greatest of Humors Remedies, internally (to cleanse the blood of all impurities, and thus remove the cause), and Cuticura, the great Skin Cure, and Cuticura Soap, an exquisite Skin Beautifier, externally (to cleanse the skin and scalp and restore the hair), cures every species of agonizing itching, burning, scaly, and pimply diseases of the skin, scalp, and head.

FINE SELECTED

BLENDED TEAS.

It is a pretty well settled principal with all expert tea men that the highest perfection in tea cannot be attained from any one kind or variety of tea plant. But that the best value and choicest flavor can be obtained only by a skillful blending of carefully selected high grade goods of different varieties.

When teas are perfectly blended the original flavor of each variety disappears in the blend, and from the combination we get something entirely new and much finer than any of the original flavors.

We have a new blend of our own. In the preparation of which we have spent considerable time and labor and have also had the aid and counsel of several as good tea men as are to be found in the United States. It is with entire confidence that we offer the goods for sale and unhesitatingly claim them to be very superior both in value and flavor.

If you want a cup of ROYAL TEA, try our new blended goods.

We also carry a full line of Teas, Oolongs, Japan, Young Hyson, Imperials, Gunpowder, English Breakfast, also several grades of blended goods, and can suit the trade on anything in the tea line.

You may not be exactly suited on the goods you are using, and we feel confident that you will be able to get from us just what you are wanting. We sell fine teas at very reasonable prices. Try them.

We have a clean dry sugar 8lbs for 50cts. the cheapest sugar ever sold in Bellefonte.

Respectfully,

SECHLER & CO.,  
BELLEFONTE, PA.

Orders will be received at this office, or address, F. L. HUTTER,  
Book Binder Third and Market Streets,  
25 18 Harrisburg, Pa.

## Saddlery.

SCHOFIELD'S NEW

HARNESS HOUSE.

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAYS OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be most exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 26x20 added makes it the largest establishment of its kind outside of Philadelphia and Harrisburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in philanthropy. We are not indulging in idle talk. We are not making much, but trade is growing and will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (7) houses of this city and county would smile if I mean to be so odious, except to venture the assertion that none of them can say, as we can say, "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand.

50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards, LARGE STOCK OF HEAVY HARNESS, prices from \$25.00 and upwards, 800 HORSE COLLARS from \$1.00 to \$5.00 each, over \$1000 worth of HARNESS OILS and AXLE GREASE.

\$400 worth of Fly Nets sold cheap from 15c to \$3.00 each.

Horse Brushes, Curry Combs, Sponges, Chamolis, RULING SADDLES, LADY SIDESADDLES, Harness Soap, Knee Dusters, and all prices, Saddlery hardware always on hand for sale, Harness Leather as low as 25c per pound. We keep everything to be found in a FIRST CLASS HARNESS STORE—no changing, over 20 years in the same room. No two shops in the same town to equal us in price. SELLING OUT for the want of trade or price. Four harness-makers at steady work this winter. This is our idea of protection to labor, when other houses discharged their hands, they soon found work with us.

J. S. SCHOFIELD,  
Spring street, Bellefonte, Pa.

## Illuminating Oil.

CROWN ACME.

THE BEST BURNING OIL THAT CAN BE MADE FROM PETROLEUM

It gives a Brilliant Light, it does not smoke, it does not char the Wick, it has a High Fire Test, it does not Explose.
