

# Democratic Watchman

Bellefonte, Pa., Aug. 26, 1892.

## Farm Notes.

The fruit crop is short beyond all doubt.

Apples are 25 per cent. of a full crop in Ohio.

A compact clay is better fitted for grass than tillage.

The turnip crop will give good returns for liberal manuring.

A good veal is worth more in market than some yearlings.

The only kind of fruit which appears not to flourish in California is the apple.

The gasoline stove in the kitchen in hot weather saves some unnecessary heating of the house.

Hedges may be evened some with the shears now. Do not cut back too severely before winter.

Our 2,000,000 bushel corn crop of last year will be followed by one reduced by several million bushels.

A pure blood may be a scrub. A pedigree scrub is the worst kind. Fixed vices are just as bad as fixed virtues are good.

Roll the wheat ground as fast as you plow. We may have a drought, and fail to get a good seed bed unless it is made now.

The New York State Agricultural Society proposes to have "breeders' races, but positively no gambling or pool-selling" at its fair.

If you raise poultry for market why not caponize the young roosters? They will grow one-third larger, and are wanted by consumers.

Wherever the conditions are favorable for the rotting of silage, it is quite possible for the silo lining to rot also if the lining be of wood.

Keep the new canes of raspberries and blackberries cut back if they have made heavy growth, which will induce them to throw out laterals, become stocky, and produce better fruit next season.

Certain cattle foods are more valuable, pound for pound, than others, because of 1. The relative proportion of dry substance contained. 2. The digestibility of that dry substance, and its constitution.

Salt is recommended as an excellent fertilizer around the trunks of quince trees. The salt promotes the growth of the trees, increases the size and quality of the fruit, and also destroys worms or maggots in the soil.

The best place for a coop containing a hen with a brood of chicks is on the asparagus patch. The chicks diligently search the stalks and destroy the asparagus beetle which damages the plants in some locations.

It has been long recognized that the yield of milk is materially affected by the nervous condition of the animal, but only within the last few years has it been demonstrated that the quality of the milk is more affected by nervous changes than the quantity given.

Mature animals are best for breeding purposes. Many herds or flocks have deteriorated because of the animal selection of young and immature animals for breeding. An animal that is not fully matured is lacking in vigor, and its offspring will inherit many of its defects.

Crab grass makes excellent pasture when it is young, but it should not be allowed to take possession of the soil if some better grass can be secured. Crab grass, should it once cover the ground, will appear every summer thereafter thus entailing an enormous amount of labor to prevent it from crowding out the more valuable crops.

Land that has not been favorable to certain crops that are subject to disease, such as potatoes, should be plowed and forty bushels of air-slaked lime applied per acre. The lime will assist in destroying the spores of fungi, and thus aid in preventing rot. Whether beneficial in arresting disease or not the lime will be found useful as a fertilizer, and as a means of decomposing inert matter in the soil.

The roots of large fruit trees form a network over quite a space around each tree, and to attempt to grow crops near the trees will result in small yields of the grain or vegetable grown. Even when rows are filled with manure the roots of the trees will appropriate it. This fact is evidence that fruit trees should receive manure or fertilizer in order to yield large crops of perfect fruit.

## HAND POWER CREAM SEPARATOR.

The chief advantage offered by the cream separator, according to the Delaware station, is greater economy in saving the butter-fat otherwise lost in the skim milk. Certain minor advantages are that the use of ice can be wholly dispensed with or much lessened; that the skim milk can be fed sweet and at nearly the natural temperature; that less room and fewer milk vessels are required with less labor in the care of them. The saving of butter-fat affected by the machine method over the cold setting method is often considerable, in fact a margin of profit so wide as to make or break many manufacturing businesses. Skim milk by the cold setting process sometimes contains as little as 2-10 of 1 per cent. of fat, but very rarely and only by way of exception; it often contains 4-10 or 6-10, sometimes even 1 per cent. more. Probably one-half of one per cent is a fair average allowance, none too high for the cold setting process. But in view of the labor of operating hand-power separators, their use is not to be recommended.

## Destined to Revolutionize the World.

A Wonderful Medicine.—By Some Believed to be an Answer to Prayer, By Others as Being Worth One Thousand Dollars In Gold.

An eminent M. D. in Delaware, writes: "I have administered part of a box of your Golden Specific to one of the worst drunkards in this country, and he has stopped drinking. His wife tells me that his whole system is changing for the better; he is getting his natural look and appetite for food. Specific is destined to revolutionize the world, for there is no better way to shut up the bar-rooms than to cure all of the hangers-on. I intend to devote the rest of my life to curing drunkard with your Specific."

This is but one of thousands of testimonials from responsible people everywhere over the country, touching the genuine merits of a positive remedy for the cure, as well as the prevention of the liquor habit. It is believed by many persons to be the only positive and permanent cure in all the world for drunkenness. Physicians recognize its merits and freely recommend the cure something which is not being done for a so-called cure, which instead of curing the drunkard, is liable to send him to the mad-house, penniless. By using this remedy positively no evil effects will result. It invigorates the system, and completely destroys all desire for strong drink. It is purely a home treatment; and its cost, compared with daily expenses for liquor, is insignificant; its benefits cannot be counted. It makes no difference whether the patient be a moderate drinker or an alcoholic wreck, a speedy cure is guaranteed. Not one known failure among the many thousands of cases treated the past fifteen years. It can be given without the patient's knowledge or inconvenience, the simple way being to administer it in tea, coffee, or food of the patient. A 48-page pamphlet on "Drunkenness Curable," will be sent free on application to Golden Specific Co., Cincinnati, Ohio.

## Heads Are Bigger Now.

Craniums of All Nations' Though Different, are Enlarging Together.

It is interesting to observe how the shape of a man's head acts as an index to his nationality—that is, if you know how to consult the index. As a proof of this, notice how long and narrow the average American head is. Hats made in England will not fit such a head at all, the head being so long "fore and aft" as to make the hat too wide at the sides. With the German it is the reverse, if any difference. The head of a true Rhineland is wide at the temples; if the hat is the exact length, in nine cases out of ten it has to be stretched sideways in order to make it fit. English heads are wide, but not so pronounced as those of the Germans. There is more of a "sliding scale" with them as to the relative length and breadth. The Celtic head is almost invariably round or oval, and without pronounced ethnological "pumps." For general smoothness of the cranial protuberance, the Italian comes next to the Celts, either of the two being the classic Greeks in that respect. Odd as it may seem, anatomists declare that the Turkish skull is almost identical in shape size, etc., with that of the enlightened nineteenth century inhabitant of the United States. Hat dealers, such as makers, furnishers, etc., say that the head of all nations are gradually growing larger. In 1860 the average hat used was 6½; to-day it is 7½.

—Rev. E. A. Buck, the minister who has been such a true friend of Miss Lizzie A. Borden in her hour of sorrow, ought to sue the papers which have printed his alleged portrait for criminal libel. He is a pleasant faced, cheerful and vivacious old gentleman whose whole life has been a labor of love for charitable and kindly purposes, and though he is only assistant pastor of a fashionable congregation, all the mission work of the parish falls upon his shoulders, and he does vastly more clerical and charity work than any other minister in the town. Unfortunately for him he comes within the ranks of those hard-working pastors whom Goldsmith depicted in the country parson who was "passing rich on forty pounds a year."

—Massachusetts has given a last resting place to two presidents, New Hampshire to one, New York to three Pennsylvania to one, Ohio to two, Illinois to one, Kentucky to one, Tennessee to three, and Virginia—the "mother of presidents"—to five.

—A Maine farmer is angry because an artist who sketched a clump of beeches in one of his pastures received \$280 for the picture, while he got only \$150 for the pasture, trees and all.

—He—"Miss McFlimsey always seems to be cool, no matter how warm it is."

She—"Well, that is natural; you see she puts on so many airs."

—More than \$6,000,000 were invested in new corporations in this State during the month of July.

—It is no uncommon thing to see fisherman of China wearing stockings made of human hair.

## Business Notices.

Children Cry for Pitcher's Castoria.

When baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

## Stimulants.

Why do physicians recommend Klein's Silver Age and Duquesne Rye Whiskies? Because, first, they are pure old and reliable—because they have prescribed them for their patients, and found that no other medicine would nourish and tone up the system so rapidly and thoroughly. Silver Age costs only \$1.50 per full quart, and Duquesne 1.25 per quart. The best hotels and dealers in liquors keep them for their choice customers. For sale to the trade generally by Simon Shloss, Williamsport Pa. 37-30

### ECZEMA ON A LADY

STUBBORN CASE OF SKIN DISEASE CURED HER FACE AND BODY. MANY DOCTORS BAFFLED. MARVELLOUS AND COMPLETE CURE BY CUTICURA SIX YEARS HAVE ELAPSED AND NO RETURN.

A lady customer of ours (Miss Fannie Atwood of Caroline Depot, N. Y.) has been cured of a stubborn case of skin disease by the use of Cuticura Remedies. She remarked that her case had baffled the skill of many well-known physicians. They unanimously pronounced it Eczema, with Rheumatism lurking in the blood. Some predicted that any treatment and strong enough to cure the Eczema would surely increase the Rheumatism. She used two sets of the Cuticura Remedies. The effect was marvellous. Her case of Eczema was not only completely cured, but her Rheumatism was greatly relieved during the treatment. Six years have elapsed since the cure was performed, her Rheumatism has since never increased by the treatment, but rather diminished, and she enjoys the best of health. The Eczema which once so completely took possession of her face and body. Miss Atwood delights in telling of the good effects that the Cuticura treatment had upon her, and recommends unreservedly the Cuticura Remedies, for Eczema and all kindred ailments. Your preparations find ready sale; indeed Cuticura Soap is on the list to buy almost continuously.

HASKIN & TOOD, Druggists, Ithaca, New York.

### CUTICURA RESOLVENT

### FINE SELECTED

### BLENDED TEAS.

It is a pretty well settled principal with all expert tea men that the highest perfection in tea cannot be attained from any one kind or variety of tea plant. But that the best value and choicest flavor can be obtained only by a skillful blending of carefully selected high grade goods of different varieties.

When teas are perfectly blended the original flavor of each variety disappears in the blend, and from the combination we get something entirely new and much finer than any of the original flavors.

We have a new blend of our own. In the preparation of which we have spent considerable time, and labor and have also had the aid and counsel of several as good tea men as are to be found in the United States. It is with entire confidence that we offer the goods for sale and unhesitatingly claim them to be very superior both in value and flavor.

If you want a cup of ROYAL TEA, try our new blended goods.

We also carry a full line of Teas, Oolongs, Japan, Young Hyson, Imperials, Gunpowder, English Breakfast, also several grades of blended goods, and can suit the trade on anything in the tea line.

You may not be exactly suited on the goods you are using, and we feel confident that you will be able to get from us just what you are wanting. We sell fine teas at very reasonable prices. Try them.

We have a clean dry sugar 8lbs for 30cts. the cheapest sugar ever sold in Bellefonte.

Respectfully,

SECHLER & CO. BELLEFONTE, PA.

### SCHOFIELD'S NEW

### HARNESS HOUSE.

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

### GRANDEST DISPLAYS OF

### Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 28x50 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past, and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in the philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (7) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assertion that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand. 50 SETS OF LIGHT
