Three essentials for successful wheat growing are good drainage, good tillage and good seed. Turkeys will thrive better and make

a better growth if they can be given a free range, at least till coid weather. An open fire-place in the cellar, with

ventilate the cellar better than by any other process. One noted wheat grower says that for wheat he wants the ground fine and firm and that there is little or no dan-

ger of having the ground too firm. the trees. Pick the pears off and place them on a shelf in a dark location, and they will be greatly improved in quali-

If the grass has taken possession of the strawberry beds, hand work will be necessary to clean the rows. The work will be laborious, but it must be done if a crop is desired next season.

Field mice will never overrun a field where owls exist in large numbers. The principal food of owls is mice, and they

blight, burn the beds over in the fall.

It is not necessary to use wet land in well underdrained.

Corn is a grass—the most gigantic and useful of the entire family. The is indicative of its nutritive quality,

The selection of seed largely influences the yield of the crop for next season. Corn may be made to produce four or five ears on a stalk if the most prolific stalks are used from which to secure seed, as such an experiment has been made with success.

Make an experiment in drainage by tile, draining thoroughly the wettest and heaviest acre on the farm. Then grow a crop of clover, follow it with wheat, and see if the increased yield does not pay back a large interest on the cost of drainage.

Twenty-two acres of land are needed to sustain a man on fresh meat, while the same amount of land under wheat feeds 42 people, under oats 88 people,

weight now as in the winter, as it costs ness and dyspepsia. more to support the body during cold

There is still men that will stand up in convention and say that it makes no difference how little butter fat there is in the milk from which cheese is made. Yet that very cheese is gradually losing its place in the market and "has bemay have to be continued some time to gun with shame to take the lowest rid the system of the malarial poison.

they grew out of the top, and transferring them to the cellar late in the fall, with the protection still on.—Practical Farmer.

Brown rot or gray rot of the grape, also sometimes known as downy mildew, is due to a fungus which thrives in warm, wet weather. Spraying with Bordeaux mixture or ammonia carbonate is a sure cure. The vines should be sprayed every fifteen days from the Ist of July till the fruit begins to turn

Cows are sometimes very dainty, and will select only the best varieties of grass in the pasture, which results in device is doing as much work with one the weeds and inferior kinds of grass ton of coal as it formerly did with ten taking possession of the field, while the best kinds will be destroyed by the of the vast amount of steam every where constant cropping. It may be of ad blown off into the air after doing certain vantage to change the cows to a new work has long occupied engineers, and pasture and turn in sheep to eat the its thorough solution would be worth poorer grass and weeds for a while.

Those who contemplate raising early lambs should lose no time in procuring a pure bred ram of one of the mutton breeds. It will not pay to attempt to secure a profit on lambs unless the male is of a breed that will improve the flock. There is such a great diff ference in the growth of a grade lamb and one that is a scrub as to be notice-able at once. The well-bred lamb will reach market at least a month before

the other. Is the grape rot disappearing? is a question now being discussed. It is possible that owing to the use of the sprayer, the ravages of the rot are being lessened, but in some sections, where spraying has not been practiced, the rot was not severe last year, and its ravages not very great this season. Many vineyards that have failed in previous years have given good crops this season, although their owners did not use any precaution to avoid the disease. Carrying Coals to Newcastle.

It may seem a little odd to imagine America as exporting coal to England. yet the probabilities are, as lately indicated by President McLeod, of the Reading system in a statement, that there is likely to be an early advent of a great period of coal exportation. He points out the magnitude of American resources and the ability of science to indicate the approximate duration of their working, and calls special attention to the fact that there is now no question "more seriously considered by English statesmen than the effect upon the empire of the ultimate exhaustion of the coal supplies of the United Kingdom.' an occasional fire started therein, will

The upper veins in England are being exhausted and deep mining is becoming more dangerous every year and attended with rapidly-increasing expences. England will not long be able to keep up rm and that there is little or no daner of having the ground too firm.

Pears seldom ripen thoroughly on
the trees Pick the pears off and place. As bearing on this subject the Black Dia mond gives some interesting facts. So far as anthricite is concerned, the conditions existent even now are peculiarly adapted to the importation of that article. The great majority of British residences of the better class are surrounded with yards and gardens and well kept flower beds and lawns, often too only spoilt now by the thick volumes of sulphurous smoke belched from chimneys owing to the consumption of soft coal. In London especially the prevalence of where owls exist in large numbers. The principal food of owls is mice, and they diligently hunt for them in the most favorable localities for procuring them.

Old strawberry beds are especially subject to blight and all the other fruit diseases. It pays to renew the beds often. But to lessen the danger from the heady part of metropolitan life. The question of paying a dollar or two more a tion of paying a dollar or two more as the principal food of owls is mice, and they fogs is attributed the major portion of the time to the existence of this factor in the heavy, humid atmosphere. Now it may be fairly argued, and argued in England with considerable success, that the use of anthricite would not only mitigate, but almost obviate this great feature of metropolitan life. The question of paying a dollar or two more as tion of paying a dollar or two more a ton for the attainment of this purpose would play no figure with those whose order to have a pasture. It is true interest rendered the consumption of that some grasses will thrive best on a damp soil, but the most desirable grass- | American soft coal and coke has as great es are grown on rich land that has been an interest and equally bright a future in the building up of an export trade. British soft coal is of a grade far inferior to that of the home product and would experience little trouble in supplanting name Zea, from the Greek Zeia, grain, the British commodity in markets where while the specific name mays or mahiz, a Haytian term, means bread or staff of life.

It now has undistanced industry is already transpiring in certain parts of the West Indies where the Alabama product is making rapid headway. With it now has undisturbed monopoly. This the increased difficulties and attendant expenses of British mining will come a decrease in the ability of the British product to hold its own in the competition, and with the loss in profits will come the loss of incentive for export and the consequent control by American merchants of markets where a vast quantity of coal is now consumed .-Wilkesbarre Record.

Malaria GermsFill the Air and Poisons the Drinking Water.

Each season of the year has its special liability to disease. The months of Au-Changing the cows from one pasture gust, September and October always bring with them more or less malaria, to another not only promotes the appetite, and permits of a greater variety of food, but also allows the grass on the pastures to better withstand dry seasons. It is a mistake to allow cattle to graze a pasture too closely.

bring with them more or less maiaria, according to the locality. Malaria is due to a little organism which is generated in water, producing millions of spores, or eggs, with which the water is filled. People drinking such water have malaria. Or, again, if such water dais up under ground, the spores are dries up under ground, the spores are under potatoes, Indian corn and rice 176 people, and under the plantain or bread-fruit tree 6000 people.

It is an advantage to carry the stock into the winter in a fat condition. An animal will gain twice as much in weight now as in the winter as it costs.

For malaria in all its forms there weather, a large proportion of the food being converted into heat instead of into fat.

There is still men that will stand at the food being converted into heat instead of into fat.

There is still men that will stand at the food being converted into heat instead of the malarial poison and arouses each function of the body to a healthy action, No

For sale at most drug stores, each bot-A correspondent say she never had such nice celery as last year, when the bleaching was done by wrapping the plants loosely in paper, adding more as free to any address.

A Notable Invention.

A problem which has been puzzling mechinical engineers all over the world ever since steam as a motive power came into general use has at last been solved, it appears. British papers state that an engineer living in Glasgow has lately completed, after nineteen years' experimenting, a device for steam engines by which all steam is returned back to the boiler after doing its work in the cylinders, In several cases, it is said, he has many millions of dollars in many ways.

In one respect the North Pole is like a woman's pocket. Very likely it is there, but no man could ever find it.

Leaf by Leaf.

The dropping of the leaves is not always caused by the ending of summer, or the advent of the fall season, but indeed by many causes. So with the health and life of the human being. One by one they are carried to an early grave. You take a cold and say, "Oh' well, it is nothing but a cold," and so it is, but if not checked in time and neglected, it leads to consumption and other diseases. Prevent it, stop it, by using a pure rye whisky. Ministers, physician and hospital superintendents agree in recommending as a perfect stimulent, Klein's Silver Age or Duquesne Ryes. The former sells at \$1.50 and the latter at \$1.25 per full quart sold by S. Shloss, Williamsport, Pa

DRURITUS 15 YEARS

UNDER DOCTOR'S TREATMENT FOUR DIFFERENT TIMES. NO RELIEF WHATEVER. OURED BY CUT-ICURA.

I have used the Cuticura Remedies, and found them to be just as you represented. They have given me a perfect cure. I have been troubled with pruritus for over fifteen years, and have been under the doctor's treatment four different times, with no relief whatever, until I tried the Cuticura Remedies. After using them just one week, I found that life was not such a burden after all, and am satisfied that I shall never be troubled again. Such faith I have in your remedies. You can send any one that is troubled with pruritus, and I will satisfy them what it has done for me. I will not restrict you from publishing this communication, but would rather not. The remedies are so good that it would be rather selfish in me not to speak of their good qualities.

S9th St. and 1st Avenue, New York.

FACE FULL OF SORES

My face was all fuli of sores, and itched so that I could scratch my face to pieces, and a kind of watery fluid ran out. I had tried all blood medicines except Cuticura Remedies, which were the only ones that did me any good. My face is now all clear, and I feel like a new-born child.

HINE SELECTED

BLENDED TEAS.

It is a pretty well settled principal with all expert tea men that the highest perfection in tea cannot be attained from any one kind or variety of tea plant. But that the best value and choicest flavor can be obtained only by a skillful blending of carefully selected high grade goods of different varieties.

When teas are perfectly blended the original flavor of each variety disappears in the blend, and from the combination we get something entirely new and much finer than any of the original flavors.

We have a new blend of our own. In the preparation of which we have spent considerable time" and labor and have also had the aid and counsel of several as good tea men as are to be found in the United States. It is with entire confidence that we offer the goods for sale and unhesitatingly claim them to be very superior both in value and flavor.

If you want a cup of ROYAL TEA, try our new blended goods.

We also carry a full line of Teas, Oolongs, Japan, Young Hyson, Imperials, Gunpowder, English Breakfast, also several grades of blended goods, and can suit the trade on anything in the tea line. You may not be exactly suited on the goods you are using, and we feel confident that you will be able to get from us just what you are wanting. We sell

fine teas at very reasonable prices. Try them. We have a clean dry sugar 8lbs for 3octs. the cheapest sugar ever sold in Bellefonte.

Respectfully,

SECHLER & CO. BELLEFONTE, PA.

SCHOFIELD'S NEW

HARNESS HOUSE.

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAYS OF Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive salesroom ever used in this town, as herete' re the custom has been to sell goods in th. room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 20x60 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in

of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (1) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assection that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand.

The following are kept constantly on hand.

50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards, LARGE STOCK OF HEAVY HARNESS per set\$25.00 and upwards, 500 HORSE COLLARS from \$1.50 to \$5.00 each, over \$100.00 worth of HARNESS OILS and AXLE GREASE, \$400 worth of Fly Nets sold cheap \$150 worth of whips from 15c to \$3.00 each, Horse Brushes, Cury Combs Sponges, Chamois, RIDING

Sponges, Chamois, RIDING SADDLES, LADY SIDE SADDLES SADDLES, LADY SIDE SADDLES
