## Farm Notes.

Fatten your turkeys before Thanksgiving, so as to secure higher prices. There is only about four weeks to that time.

The strawberry plants delight in moisture during the spring, but they are easily injured in winter if the soil is damp or wet.

Burning over a field of dry grass and weeds cleans the surface, destroys some of the seeds, and lessens the harboring places of insects.

It is better to haul the manure to the fields than to secure it to rains and melting snows during the winter when heaped in the barnyard.

It will pay to drain if only a simple drain tile or a ditch is used to carry off water from damp ground, but it will pay better to drain properly.

It is admitted that slop-fed cows will produce rich milk, compared with that from other foods, but such milk ferments easily and is more liable to give off foul odors.

It is cheaper to make a good road than a bad one. The money expended on the wear and tear of your wagons, of your horses and harness is enough to make a good road.

Professor W. A. Henry found by experiment that it cost \$2.61 to produce a hundred pounds of gain with lambs, \$3.03 to secure the same gain with pigs of about the same age.

Ducks will enjoy themselves on a pond, but they quickly succumb if compelled to sleep in a damp location. Make a board floor to your duck house and keep it covered with hay or straw.

Pure bred live stock is a leading educator. The man who once begins breeding becomes a student of animal life. The result is a humane and intelligent man with a prosperous and progressive family.

Although clover is rich in nitrogen, yet it takes but little nitrogen from the soil, returning more than it receives. It is very partial to lime and potash. Sulphate of lime (land plaster) is a special fertilizer for clover or some soils.

The rations for the cows at the Chicago Fair will be according to a selected formula, without regard to the size of the animal or to the work it will perform. The ration will be a heavy one for some cows and a light one for others.

It requires a large amount of water when sprinkling plants during a dry season. Three gallons of water will not more than soak a space two feet square to the depth of two inches; hence to attempt to water a large area by sprinkling is almost an impossibility.

There is one advantage in keeping a pig or two, even if one is not disposed to produce pork for the market, and that is in securing quality. If you produce your own pork and lard and you will then know from what the pork is produced and that the lard is not adulterated.

If farmers after plowing their land in the fall would apply about 10 bushels of lime per acre they would find the land much benefited thereby. It is only necessary to apply the lime on the surface, as the rains and snows will carry it down soon enough. On light, sandy soils lime may be applied both in the fall and in the spring.

The strainer only takes the solid filth from the milk. No strainer can separate odors or soluble matter from milk. A switch of a cow's tail may contaminate a whole pail of milk, and the solid and liquid manures of the stalls may easily be mingled with the milk. Cleanliness begins at the stall, for it is there that the greatest danger to milk is found.

What has lime to do with nitrogen in the soil? It may be stated that the nitrification of the soil is more or less due to the busy microbes existing therein, and they work best in the presence of lime. By applying lime, therefore, the farmer not only adds a required mineral substance to the soil but also increases the proportion of ready-prepared nitrogen as plant food.

England does not grow wheat to any extent, as her farmers find it more profitable to sell milk, butter, and choice meats as well as fruits and vegetables, the farmers paying high rents for the use of the farms. It will pay farmers in this country to do the same. Small areas that are highly fertilized, and well cultivated, are always profitable compared with large farms.

Wool may not pay on farms that are closely cultivated, but sheep will pay. The sheep does not depend on its fleece only to give a profit. When a farmer keeps sheep he produces wool, mutton and lamb. There are many farms upon which sheep give a large profit and yet but little is made on wool. The fine wool breeds are not the best mutton sheep, and in England the merino is almost unknown on the farms, as English farmers make a specialty of choice mutton.

A new fodder plant, called lathyrus sylvestris, is now being grown on the grounds of several of the experiment stations, and if it proves to be all that is claimed for it, the plant will be a valuable addition to the list of fodder plants. It is said to contain a high per cent. of albumenoids, and is a variety of wild pea. It produces twenty or more crops, and stands both drought and severe cold, growing on dry, sandy soils, and has a deep root. It contains more fat, protein and carbohydrates than clover.

### ECZEMA ON A LADY.

STUBBORN CASE OF SKIN DISEASE CURED HER FACE AND BODY. MANY DOCTORS BAFFLED.

### MARVELLOUS AND COMPLETE CURE BY CUTICURA. SIX YEARS HAVE ELAPSED AND NO RETURN.

A lady customer of ours (Miss Fanny Atwood of Caroline Depot, N. Y.) has been cured of a stubborn case of skin disease by the use of Cuticura Remedies. She remarked that her case had baffled the skill of many well known physicians. They unanimously pronounced it Eczema, with rheumatism lurking in the blood. Some predicted that any treatment strong enough to cure the Eczema would surely increase the rheumatism. She used two sets of the Cuticura Remedies. The effect was marvellous. Her case of Eczema was not only completely cured, but her Rheumatism was greatly relieved during the treatment. Six years have elapsed since the cure was performed, her Rheumatism has since never increased by the treatment, but rather diminished, and she sees no symptoms of its return of the eczema which once so completely took possession of her face and body. Miss Atwood delights in telling of the good effects that the Cuticura treatment had upon her, and recommends unhesitatingly the Cuticura Remedies for Eczema and all kindred ailments. Your preparations find ready sale; indeed, Cuticura Soap is on the list to buy almost continuously. DRUGGISTS S. ILLIAC, N. Y.

### FINE SELECTED

### BLENDED TEAS.

It is a pretty well settled principal with all expert tea men that the highest perfection in tea cannot be attained from any one kind or variety of tea plant. But that the best value and choicest flavor can be obtained only by a skillful blending of carefully selected high grade goods of different varieties. When teas are perfectly blended the original flavor of each variety disappears in the blend, and from the combination we get something entirely new and much finer than any of the original flavors.

We have a new blend of our own. In the preparation of which we have spent considerable time and labor and have also had the aid and counsel of several as good tea men as are to be found in the United States. It is with entire confidence that we offer the goods for sale and unhesitatingly claim them to be very superior both in value and flavor.

If you want a cup of ROYAL TEA, try our new blended goods.

We also carry a full line of Teas, Oolongs, Japan, Young Hyson, Imperials, Gunpowder, English Breakfast, also several grades of blended goods, and can suit the trade on anything in the tea line.

You may not be exactly suited on the goods you are using, and we feel confident that you will be able to get from us just what you are wanting. We sell fine teas at very reasonable prices. Try them.

We have a clean dry sugar 8lbs for 30c. the cheapest sugar ever sold in Bellefonte.

### SCHOFIELD'S NEW HARNESS HOUSE

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

### GREATEST DISPLAYS OF

### Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive saleroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be nicely displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x74 feet and the store 29x50 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburg.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves. When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (7) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assertion that none of them can say, as we can say "NO ONE OWES US ONE CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand. 50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards. LARGE STOCK OF HEAVY HARNESS, prices from \$25.00 and upwards. 500 HORSE COLLARS from \$1.50 to \$5.00 each, over \$100 worth of HARNESS OILS and
