Farm Notes.

The first essential after milking is to cool the milk. This should be done immediately and as quickly as possible.

Tumble-down or abandoned farms may be the result of negligent farming but the real cause of decline may invariably be traced to the use of scrub stock.

The more like school the farm can be made, the more interest there is developed in work, study and recreation, the less thought there will be of leaving the farm.

Make the change from green to dry food slowly, so that the cow will hardly feel the transition. Sudden and radical revolutions in diet are always to be deprecated.

Do not have an army of cockerels with your hens. If not fat enough to make good eating, keep by themselves till fat—then sell or kill them for home consumption.

Skim milk should always be given to calves warm, and never in a cold condition. When the calf is a month old linseed meal and ground oats may be added to the skim milk with advantage.

Old hens that are too fat to lay will make elegant roasters, and will lay better disposed of as such, than to keep for the few eggs they will lay this winter; at least our experience has taught us that.

By putting bells upon the sheep much annoyance from dogs may be avoided. Have a bell to every fifth or sixth animal, and when they run there will be so much noise that the dogs will think best to retreat.

When turnips are left in the field the sheep will eat them from the ground, no harvesting of the turnips being necessary, and so doing the animals also spread their manure and trample it into the ground, thus enriching the soil.

Many good authorities believe that fall calves can be better raised than spring ones, the argument being that calves coming now are kept in the barn and well fed, thus getting a good start to make the best of the grazing season next year.

A man who keeps his fence repaired, his gates swinging on their hinges, his barn doors hung, his buildings painted, farm machinery out of the front yard, brush and boards and straw in proper places, is likely to find many other desirable conditions attending him.

In England wheat is considered one of the best grains for stock. It sells for less than 80 cents per bushel it is considered cheaper than other grains of equal cost, but when wheat reaches 90 cents it is considered too valuable for stock and is used mostly for bread.

A farmer who does not believe in thoroughbred stock should be consistent, and refuse to accept improved machinery, tile drainage, the silo, the separator and creamery, and all the other things which have aided in making agriculture a better occupation than it was.

Those who have tried it claim that for family use the best butter is that which is washed in brine before taken from the churn and placed on the table without being worked, the butter being as near the granular condition as possible, but such butter cannot well be sent to market.

A large crop of apples may be grown when a live of bees is stationed in the orchard. The pollen is rubbed from their bodies against the pistils of thousands of flowers, which thus become fertilized. Many of the strange feats of hybridizing varieties are due to the agency of bees.

Scrub cattle are in all probability the most expensive luxury by far that the farmers of the United States have today. They cost more than all the monopolists combined can ever hope to wring out of them. Scrub stock is the leech that sucks away at their prosperity 365 days in the year.

Milk sugar constitutes five pounds out of every ten solids in the skim-milk. Just as long as it is sugar will it promote growth, but when once it turns to acid it hinders the deposition of fat especially. When we wish to reduce the fat in our bodies we eat acids. Sour swill is a hindrance rather than help to growth.

Dry cows do not require very rich food, and may be made to consume the coarse provender, such as straw and corn fodder, but they should receive an allowance of grain also. While it is best to have them in good condition they should not be made fat, as they may be liable to milk fever at time of calving.

Do not permit the refuse cabbage leaves and the soft and unsalable heads to waste in the field. They are excellent food for all kinds of stock. Feed them in the stall, if possible, so that all will be utilized. If not, turn the stock in the field as soon as you have removed the good heads—before the rest begin to decay.

The economists who in the early part of this century feared a growth of population which could only be checked by war, pestilence and famine, took no cognizance of agricultural chemistry. Apparently no limit can be placed to the product that may be put at the disposal of man, providing he keeps pace with the methods of science.

Pork barrels should be thoroughly washed with boiling water and concentrated lye. Add a pound of the lye to four gallons of water and scrub the barrel with a brush, using sand also if preferred and rinse well with plenty of boiling water until ready for use, and scrub it again. This work is necessary as pork barrels are not easily cleaned.

Overeating, Not Overworking.

A Doctor Who Thinks Our Brains Are Not Too Heavily Taxed.

Dr. Pye Smith holds that there is no fear of the ordinary man using his brains too much for health, and he does not believe that mental labor or honest work of any kind interferes with health or shortens life a day. He maintains that excessive eating is the abuse that tends to the injury of brainworkers more than any other cause.

Many active brain workers have suddenly broken down and fancied that it was due to brain fatigue, when, as a matter of fact, it was due to over-stuffing their stomachs. The furnace connection with mental machinery became clogged up with ashes and carbon in various shapes and forms, and, as a result, disease came, and before the case was fully appreciated a demoralized condition of the nervous system was manifested and the prosaic cause for the collapse was suppressed under the euphemistic "mental overwork."

Dr. Smith insists that if a man will take nutritious, digestible food in judicious quantity, lives and works regularly and rests when fatigued, cultivating at the same time a philosophical habit and keeping himself aloof from fret and annoyances, the chances are that he can do an almost unlimited amount of work for an indefinite length of time. He must, however, bear in mind that when weariness comes he must rest and not take stimulants and work upon false capital.

Fall of the Leaf.
The bright, green foliage of summer which is now variegated with golden tints, and leafless trees will soon preface the coming of winter's chilly blasts. Nature has been more than usually lavish in her gifts and abundant crops make the heart of the husbandman glad. With the advent of fall it will be well for all to take proper safeguards against disease. A pure stimulant tones up the feeblest system. For this purpose use Klein's world-famed "Silver Age" or "Duquesne" rye. Both are warranted absolutely pure. They sell respectively at \$1.50 and \$1.25 per full quart. Sold by S. Schloss, Agent Williamsport Pa.

ECZEMA ON A LADY.
STUBBORN CASE OF SKIN DISEASE COVERED HER FACE AND BODY. MANY DOCTORS BAFLED.

MARVELLOUS AND COMPLETE CURE BY CUTICURA. SIX YEARS HAVE ELAPSED AND NO RETURN.

A lady customer of ours (Miss Fanny Atwood of Caroline Depot, N. Y.) has been cured of a stubborn case of skin disease by the use of Cuticura Remedies. She remarked that her case had baffled the skill of many well-known physicians. They unanimously pronounced it Eczema, with Rheumatism lurking in the blood. Some predicted that any treatment strong enough to cure the Eczema would surely increase the Rheumatism. She used two sets of the Cuticura Remedies. The effect was marvellous. Her case of Eczema was not only completely cured, but her Rheumatism was greatly relieved during the treatment. Six years have elapsed since the cure was performed, her Rheumatism has since never increased by the treatment, but rather diminished, and she sees no symptoms of the return of the Eczema which once so completely took possession of her face and body. Miss Atwood delights in telling of the good effects that the Cuticura treatment had upon her, and recommends unhesitatingly the Cuticura Remedies for Eczema and kindred ailments. Your preparations find ready sale; indeed, Cuticura Soap is on the list to buy almost continuously. HASKIN & FODD, Druggists, Ithaca, N. Y.

FINE SELECTED

BLENDED TEAS.

It is a pretty well settled principal with all expert tea men that the highest perfection in tea cannot be attained from any one kind or variety of tea plant. But that the best value and choicest flavor can be obtained only by a skillful blending of carefully selected high grade goods of different varieties.

When teas are perfectly blended the original flavor of each variety disappears in the blend, and from the combination we get something entirely new and much finer than any of the original flavors.

We have a new blend of our own. In the preparation of which we have spent considerable time, and labor and have also had the aid and counsel of several as good tea men as are to be found in the United States. It is with entire confidence that we offer the goods for sale and unhesitatingly claim them to be very superior both in value and flavor.

If you want a cup of ROYAL TEA, try our new blended goods.

We also carry a full line of Teas, Oolongs, Japan, Young Hyson, Imperials, Gunpowder, English Breakfast, also several grades of blended goods, and can suit the trade on anything in the tea line. You may not be exactly suited on the goods you are using, and we feel confident that you will be able to get from us just what you are wanting. We sell fine teas at very reasonable prices. Try them.

We have a clean dry sugar 8lbs for 30cts. the cheapest sugar ever sold in Bellefonte.

SCHOFIELD'S NEW

HARNESS HOUSE

We extend a most cordial invitation to our patrons and the public, in general, to witness one of the

GRANDEST DISPLAYS OF

Light and Heavy Harness

ever put on the Bellefonte market, which will be made in the large room, formerly occupied by Harper Bros., on Spring street. It has been added to my factory and will be used exclusively for the sale of harness, being the first exclusive saleroom ever used in this town, as heretofore the custom has been to sell goods in the room in which they were made. This elegant room has been refitted and furnished with glass cases in which the harness can be neatly displayed and still kept away from heat and dust, the enemies of long wear in leather. Our factory now occupies a room 16x75 feet and the store 26x20 added makes it the largest establishment of its kind outside of Philadelphia and Pittsburgh.

We are prepared to offer better bargains in the future than we have done in the past and we want everyone to see our goods and get prices for when you do this, out of self defense you will buy. Our profits are not large, but by selling lots of goods we can afford to live in Bellefonte. We are not indulging in idle philanthropy. It is purely business. We are not making much, but trade is growing and that is what we are interested in now. Profits will take care of themselves.

When other houses discharged their workmen during the winter they were all put to work in my factory, nevertheless the big (3) houses of this city and county would smile if we compared ourselves to them, but we do not mean to be so odious, except to venture the assertion that none of them can say, as we can say "NO ONE OWES US A CENT THAT WE CAN'T GET." This is the whole story.

The following are kept constantly on hand. 50 SETS OF LIGHT HARNESS, prices from \$8.00 to \$15.00 and upwards. LARGE STOCK OF HEAVY HARNESS per set \$25.00 and upwards. 300 HORSE COLLARS from \$1.50 to \$5.00 each, over \$100.00 worth of HARNESS OILS and AXLE GREASE, \$400 worth of Fly Nets sold cheap \$10 worth of whips from 15c to \$3.00 each. Horse Brushes, Curry Combs, Sponges, Chamois, RIDING SADDLES, LADY SIDESADDLES, Harness Soap, Knee Dusters, at low prices. Saddlery-hardware always on hand for sale. Harness Leather as low as 25c per pound. We keep everything to be found in a FIRST CLASS HARNESS STORE—no changing, over 20 years in the same room. No other shops in the same town to catch trade—NO SELLING OUT for the want of trade or prices. Four harness-makers at steady work this winter. This is our idea of protection to labor, when other houses discharged their hands, they soon found work with us.
